

# NewEarth University COVID-19 Intelligence Brief

Thomas J. Brown, NewEarth University

This NewEarth University COVID-19 Intelligence Brief informs from primary sources, a distillation of data contrary to the official narrative, from the most reliable mainstream and alternative sources available, to allow intelligent decision-making.

The scope is daunting, with new information flowing by the minute in an ever-evolving crisis. This is but a snapshot of a period in the event stream. The message however is clear, mainstream media distorts, official infection and death numbers are intentionally exaggerated to create fear, virus and vaccine science is unsettled, despotic tendencies in bureaucrats emerge. We direct the reader to researching the ideas and links in this paper to keep abreast and make intelligent decisions for the betterment of humanity. The greater picture is not amenable to sound bite reality, and thereby requires intelligent consideration of diverse data streams.

## Pandemic Origins

The official narrative is that a pathogenic virus, SARS-CoV-2, originated in bats and jumped to humans via unsanitary conditions at a Wuhan wild animal food market, where, unsurprisingly, no bats are sold.<sup>1</sup> The attendant disease is termed COVID-19. There is evidence it was active around the world prior to the official story.<sup>2,3</sup>

A secondary narrative attendant to this is that SARS-CoV-2 is the product of Chinese bioweapon research being undertaken at the Wuhan Institute of Virology (WIV) near to the market and was accidentally or intentionally released.

There are curiosities and mysteries surrounding the happenings in Wuhan. The 7th (2019) Military World Games began in Wuhan October 18, 2019, the same day as Event 201 in the USA began.

The Wuhan Games hosted around 10,000 athletes from over 100 countries competing.<sup>4</sup> Reports are that cell phone activity data shows a complete shutdown of a high-security section of the Wuhan lab for 2.5 weeks

#### Satellite Data, Internet Searches Suggest COVID-19 Hit China 'Long Before' Previously Known: Harvard

Significant spikes in hospital traffic and Baidu internet searches for terms related to COVID-19 suggest that the virus hit Wuhan, China "beginning in late Summer and early Fall 2019," according to a new study by Harvard Medical School.<sup>6</sup>

#### Analysis of hospital traffic and search engine data in Wuhan China indicates early disease activity in the Fall of 2019<sup>7</sup>

New York based **Event 201** was "a high-level pandemic exercise" hosted by Johns Hopkins with the World Economic Forum and the Bill and Melinda Gates Foundation, an exercise that mirrored exactly what was immediately unfolding with the COVID-19 pandemic.<sup>8</sup>

There are questionable connections to the Wuhan lab with the main Western drivers of the global vaccination drive. The Wuhan Institute WIV was researching related bat coronaviruses, partly with funding from U.S. NIAID, who had to cease University of North Carolina (UNC) based research due to perceived pandemic dangers.<sup>9</sup> Chinese scientist **Shi Zhengli**, director of the Center for Emerging Infectious Diseases at WIV, specialised in SARS coronaviruses under tutelage of Prof **Ralph Baric** at the UNC. When Baric's research was stopped at UNC it was shifted to WIV under Shi's direction.<sup>10</sup>

#### COVID-19: Further Evidence that the Virus Originated in the US

The Taiwanese physician noted that in August of 2019 the US had a flurry of lung pneumonias or similar, which the Americans blamed on 'vaping' from e-cigarettes, but which, according to the scientist, the symptoms and conditions could not be explained by e-cigarettes. He said he wrote to the US officials telling them he suspected those deaths were likely due to the coronavirus. He claims his warnings were ignored. Immediately prior to that, the CDC totally shut down the US Military's main bio-lab at Fort Detrick, Maryland, due to an absence of safeguards against pathogen leakages, issuing a complete "cease and desist" order to the military. It was immediately after this event that the 'e-cigarette' epidemic arose.<sup>11</sup>

Patents on related coronaviruses are held by various organizations including the Crown owned Pirbright Institute, holding U.S. Pat. No. 10,130,701<sup>12</sup>, while some of these appear unrelated, they could still be utilised strategically to prevent others from patenting similar viruses and vaccines. Manipulating these types of viruses has been the subject of high-level laboratory research for decades.

**Luc Montagnier**, Nobel Prize winner for HIV, says that SARS-COV-2 is "manmade."<sup>13</sup>

<sup>13</sup> <https://www.gilmorehealth.com/chinese-coronavirus-is-a-man-made-virus-according-to-luc-montagnier-the-man-who-discovered-hiv/>

On a different note, polymath Professor **Chandra Wickramasinghe** predicted on November 25th, 2019 that there would be a new viral strain of cosmic origin in the coming months, based on his and astronomer Fred Hoyle's virus from space thesis, with the new deep solar minimum in progress.<sup>14</sup> A meteoric fireball event was witnessed on October 11, 2019 over China. Its considered breakup and spread through the troposphere as a potential virus deposition source "is certainly consistent (thus far) with what has happened in relation to the new coronavirus epidemic between November 2019 and the present day (3 February 2020)."<sup>15</sup>

Whatever the origin, the Chinese government went into a state of emergency to control the spread of the pathogen. Despite their efforts, infection pockets arose around the world, allegedly from infected travelers spreading the disease, causing governments globally to take drastic measures upon their populations to quell the spread. One must wonder how it got from Wuhan to all the old people in New York City and Milan, Italy retirement homes so quickly.

Official sources claim we are in the grips of a terrible pandemic. There are certainly people falling ill and some dying. The official narrative is found in the mainstream media.<sup>16</sup> Yet there are a growing number of voices from top medical professionals and numerous valid data to doubt the veracity of this narrative, those alternative voices limned in this report, with references. It appears the lockdowns have limited effects on the spread. There is no doubt the "lockdown" will cause more death and mayhem than any effects of the virus.<sup>17</sup> And now before this report is finalized we see protests and riots with no regards to the lockdown whatsoever.

The entire COVID-19 situation is being referred to by many as a "plandemic" amongst those reasonably distrustful of the official narrative. An honest intellect considers the extant data.

## 21 Powerful Facts That Demolish the Official COVID-19 Narrative<sup>18</sup>

There is definitely a novel virus in circulation present as a factor in serious illness.<sup>19</sup> People are dying, mostly elderly with extant chronic conditions, from what appears in many cases to be a serious upper respiratory infection, but in others something more mysterious, strange blood clotting, strokes and frostbite-like "covid toes" in young people,<sup>20,21,22,23</sup> though COVID-19 is said to not affect children.

These are symptoms of hypoxic injury, victims initially have low oxygen in their bloodstream, no fever, no respiratory distress, no white blood cell count elevation, only an increase in liver enzymes, there is no evidence of viral infection. Advancing symptoms are fever, coughing, ground glass reaction and fluid retention in the lungs, where bacterial infections take over. While there is a tested viral presence, how this is acting as a cofactor in these effects remains to be discovered. Nobody has died directly from COVID-19, it is a "scientific impossibility" according to many doctors.<sup>24</sup>

“Covid-19 Does Not Lead to a “Typical” Acute Respiratory Distress Syndrome”

Patients with Covid-19 pneumonia, fulfilling the Berlin criteria of ARDS, present an atypical form of the syndrome. Indeed, the primary characteristics we are observing (confirmed by colleagues in other hospitals), is the dissociation between their relatively well-preserved lung mechanics and the severity of hypoxemia.<sup>26</sup>

Coronavirus May Be a Blood Vessel Disease, Which Explains Everything  
*Many of the infection’s bizarre symptoms have one thing in common*

In April, blood clots emerged as one of the many mysterious symptoms attributed to Covid-19, a disease that had initially been thought to largely affect the lungs in the form of pneumonia. Quickly after came reports of young people dying due to coronavirus-related strokes. Next it was Covid toes — painful red or purple digits. What do all of these symptoms have in common? An impairment in blood circulation. Add in the fact that 40% of deaths from Covid-19 are related to cardiovascular complications, and the disease starts to look like a vascular infection instead of a purely respiratory one. A respiratory virus infecting blood cells and circulating through the body is virtually unheard of.<sup>27</sup>

## **Virosphere**

For perspective, consider viruses in the environment. People have such fear of viruses, as though they are solely evil pathogenic microbes, like bullets from a gun, that we must trust our monolithic medical monopolies to save us from, with their costly and often deadly countermeasures. Yet viruses pervade our bodies and biosphere, as natural processes of life.

Viruses are the most prevalent “life” form on Earth, the dominant microbe. While not alive in the respiratory-reproductive sense, viruses exhibit remarkably adaptable behavior and integration into the functioning of all levels of life in Earth’s biosphere.

<sup>29</sup> <https://jennifermargulis.net/glyphosate-and-covid-19-connection/>

Our virome comprises viruses pervading our body as functional members of our microbiome, approximately 380 trillion in each human!<sup>30,31</sup> Our “junk” DNA is composed of approximately 10% retrovirus DNA (the human genome is only 1.5% of our DNA). This non-protein coding DNA is actively involved in gene expression.

Ancient viral DNA remnants in our DNA are essential for pluripotency to occur in stem cells, that is, to differentiate into the diverse cells of our bodies.<sup>32</sup> Viral DNA is critical for production of salivary amylase, functioning of stem cells in the fetus, development of the human placenta, and for allowing a mother’s immune system to tolerate the fetus and not reject it as a foreign body.<sup>33</sup> Humans are in many ways constructed and controlled by viral activities.

There are bacteriophage viruses filling the oceans, equal in mass globally to 75 million blue whales, in process controlling the temperature, thereby being a major influence on Earth’s weather.<sup>34,35,36</sup> Rivers of viruses and bacteria flow through the upper troposphere, and can be the formative nuclei of raindrops.<sup>37</sup> Viruses are everywhere in soil and in plants.<sup>38</sup>

Luis Villareal, Professor of Molecular Biology and Biochemistry, Virology Department head at U.C. Irvine, takes a “virus first” approach to what he calls “nonlinear evolution”. He says we live in a “virosphere”. His motto is *Ex virus omnia* (from virus everything).<sup>39</sup>

In other words, we cannot live without our many complex interactions with viruses. Our biosphere is dependent upon them. Science has much still to learn. This instilled fear of viruses solely as worrying pathogens is an outmoded, simplified, very incorrect perspective. It brings into question the entire science of vaccines, as an illogical approach to one alleged virus out of 300+ trillion in our system.

## Viruses and Exosomes -- Germ and Terrain Theories

The common definition of a virus affecting biological life is:

Any of various submicroscopic agents that infect living organisms, often causing disease, and that consist of a single or double strand of RNA or DNA surrounded by a protein coat. Unable to replicate without a host cell, viruses are typically not considered living organisms.<sup>40</sup>

Many new discoveries are constantly arising in this field of research. The stunning similarities between exosomes, essential plant and animal messenger cells, and virions, the protein-coated transmission vectors of viruses outside of cells, is worthy of consideration in light of this latest research. Some schools of thought connect the two as a single type, whose function and protein structure depend on the biological state of an organism, in chemical or energetic terms. Further research is raising important questions as to the validity of the current paradigm.

<sup>40</sup> The American Heritage Dictionary of the English Language, 5th Edition

One of the developing narratives around the pandemic is that viruses are not pathogenic vectors, that they are simply modified exosomes due to malefic terrain parameters. They appear as markers when a disease condition is present. There are notable current proponents of this perspective, such as Dr. Andrew Kaufmann, M.D.<sup>41,42</sup>

Dr. Kaufmann notes that Koch's postulates have not been fulfilled for SARS-CoV-2. Koch himself stated later in life that there was more to the picture, as there are obviously carriers of asymptomatic pathogens.

#### Scientists Have Utterly Failed to Prove that the Coronavirus Fulfills Koch's Postulates<sup>43</sup>

The paper, Aetiology: Koch's postulates fulfilled for SARS virus, claims that Koch's postulates have been fulfilled for this virus; however, it fails on the first postulate, as there are numerous asymptomatic carriers. While rather poorly titled, it does apparently demonstrate potential vector transmission:

Severe acute respiratory syndrome (SARS) has recently emerged as a new human disease, resulting globally in 435 deaths from 6,234 probable cases (as of 3 May 2003). Here we provide proof from experimental infection of *cynomolgus macaques* (*Macaca fascicularis*) that the newly discovered SARS-associated coronavirus (SCV) is the aetiological agent of this disease.<sup>44</sup>

In Conserved and host-specific features of influenza virion architecture, the question is begged, with the underlying assumption of viral priority in the instance:

The virions of many viruses are complex and pleomorphic, making them difficult to analyse in detail. ... Influenza virions share an underlying protein composition with exosomes, suggesting that influenza virions form by subverting microvesicle production. ... For all combinations of influenza virus and host, most of the host proteins identified in virions have also been identified in exosomes .... Influenza virions therefore resemble exosomes both in their hydrodynamic properties and in their protein composition.<sup>45</sup>

#### The Trojan exosome hypothesis:

The Trojan exosome hypothesis predicts that retroviral particles and exosomes will contain a similar array of host cell lipids and proteins, use the same protein targeting and vesicle biogenesis pathway, and move between cells in the absence of a retroviral Env protein. A review of the empirical data finds support for each of these predictions.<sup>46</sup>

#### When is a virus an exosome?

The virus is fully an exosome in every sense of the word.<sup>47</sup>

That last statement is a quote by one of the authors of The Trojan exosome hypothesis, Dr. James Hildreth, M.D., president of Meharry Medical College, a leading researcher in virology. Dr. Hildreth considers SARS-CoV-2 to be a contagious virus. However, he considers HIV-1, the most contagious virion of the HIV family, to be an exosome.<sup>48</sup>

"I have never said that SARS CoV2 is an exosome. I have been saying for years that HIV-1 is an exosome but the biogenesis of these two viruses are very different. The exosome hypothesis cannot be applied to all viruses --

clearly most viruses are not. And frankly, we are still learning about the SARS CoV2 virus' biology including its assembly and budding mechanisms." -- James Hildreth, M.D.<sup>49</sup>

### Is COVID-19 virus an Exosome? Ken Witwer & Jan Lötvall -- the extracellular vesicle angle

"So clearly there are similarities between the Extracellular Vesicles or exosomes and the coronavirus, they're absolutely different in many aspects, even though these viruses carry some of the cellular proteins that are dominated by the viral proteins, the viral genome." -- Professor Jan Lötvall, University of Gothenburg

"We can say that the coronavirus is an Extracellular Vesicle, but we have to be careful to make the distinction of the biogenesis being directed by something else other than the normal EV generation pathways of ectosomes and exosomes. In this case, yes, those pathways are being used, but there's an evil genius behind the scenes that's supplying some of the components to make this thing infectious and pathogenic." -- Ken Witwer, associate professor at Johns Hopkins<sup>50</sup>

### Exosomes and Their Role in Viral Infections

The endocytic pathway and the budding of viruses, especially enveloped viruses, share many common features. Both processes require generation of membrane curving, packaging of specific cargo, and membrane budding for release from the cell. What is most surprising is that different viruses with very different evolutionary paths appear to converge in their use of the host endocytic pathway in the entry and exit from their host cells.<sup>51</sup>

The exosome / virion relationship is quite fascinating. There is perhaps not a germ theory vs terrain theory dialectic to be argued out, there are valid evidences to consider for each.

### Germ Theory Versus Terrain: The Wrong Side Won the Day<sup>52</sup>

There are still many startling discoveries to be made along these lines, as the lines blur in advancing knowledge in cross-species messenger molecule communication. Food derived exosomes are seen to be implicated in the regulation of gene expression, that is our food can contribute to protein synthesis amongst other actions, as thereby potentially any exosome and other related Extracellular Vesicles.<sup>53</sup>

Consider medical researchers who question the science behind the HIV retrovirus causing AIDS, pejoratively labelled "AIDS deniers" by orthodoxy. There is much discussion on both sides of this matter. As we noted above, Dr. Hildreth considers HIV-1 to be an exosome.

Dr. Robert Willner, who at the time (1994) had 40 years of medical experience, injected himself with HIV to prove it doesn't cause AIDS.<sup>54</sup> There were many people who tested positive for HIV with no symptoms, and people with the classic symptoms who tested negative.

Forgotten scientist Antoine Bechamp (1816-1908) described extremely tiny biologically active components he termed *microzymas* (“the third anatomical element of the blood”) as the builders and destroyers of cells: they build when the terrain is in a healthy state; they break down tissues when the terrain is unhealthy, the latter being the basis of “germ”-related diseases:

The microzyma is at the beginning and end of all organization. It is the fundamental anatomical element whereby the cellules, the tissues, the organs, the whole of an organism are constituted.<sup>60</sup>

GERM THEORY (PASTEUR)	CELLULAR THEORY (BECHAMP).
1. Disease arises from micro-organisms outside the body.	Disease arises from micro-organisms within the cells of the body.
2. Micro-organisms are generally to be guarded against.	These intracellular micro-organisms normally function to build and assist in the metabolic processes of the body.
3. The function of micro-organisms is constant.	The function of these organisms changes to assist in the catabolic (disintegration) processes of the host organism when that organism dies or is injured, which may be chemical as well as mechanical.
4. The shapes and colours of micro-organisms are constant	Micro-organisms change their shapes and colours to reflect the medium
5. Every disease is associated with a particular micro-organism	Every disease is associated with a particular condition.
6. Micro-organisms are primary causal agents.	Micro-organisms become "pathogenic" as the health of the host organism deteriorates. Hence, the condition of the host organism is the primary causal agent.
7. Disease can "strike" anybody.	Disease is built by unhealthy conditions.
8. To prevent disease we have to "build defences".	To prevent disease we have to create health.

A recent book, The Invisible Rainbow by Arthur Firstenberg, chronicles the stages of man-made electrification of Earth’s atmosphere and relates them to various pandemics.<sup>61,62</sup> Firstenberg attributes the 1918 “Spanish” Flu epidemic to early radiowave electrification, but this epidemic has also been strongly related to experimental vaccines.<sup>63</sup> There is however value to his thesis. The dangers of electromagnetic pollution on the biosphere will be covered later in this brief.

### Comets and Contagion: Evolution, Plague, and Diseases From Space

For much of history comets have been associated with death and disease. There is increasing evidence that life on Earth originated in comets and other stellar debris. If passing comets have continued to deposit viruses and microorganisms on this planet, this may explain why ancient astronomers and civilizations attributed the periodic outbreak of plague to these stellar objects. Although ancient fears and reverence of comets may be coincidental with the outbreaks of pandemics, they may also have a factual basis.<sup>64</sup>

There are the Soviet studies on Heliobiology, tracking viral disease waves with solar and geomagnetic activity. Electromagnetic energies, both synthetic and natural, have a direct impact on human health. Honest scientific investigation demands this greater consideration. Look at polio and geocosmic forces!

Sunspot Dynamics Are Reflected in Human Physiology and Pathophysiology<sup>66</sup>

Science is not settled at all in this arena; in fact, science by nature is never settled. To say so is either a fundamentalist dogma or a lie with an agenda. These data describe that there exist significant scientific questions, logically in the instance to be following onto the nature and quality of the COVID-19 testing. Which thereby raises serious questions about the legitimacy of the global lockdown.

**SARS-CoV-2 Testing -- General, Variable and Corrupted**

There are two main testing types for viruses of this type. One is the Polymerase Chain Reaction (PCR), invented by Kary Mullis, an ardent critic of what he saw as the misuse of his invention to promote incorrect theories on viruses, as the PCR cannot directly detect viruses. The other main type is testing for antibodies in the blood, aka the serological test. But antibodies are not the only biological response to pathogens, and some people cannot produce antibodies. The PCR tests for foreign RNA fragments, which can come from a number of biological sources other than viruses. The serological tests test for antibodies to those foreign RNA fragments. No actual viruses are detected; they are assumed.

**COVID-19 TEST a FRAUD?**

QUOTES about the PCR (Polymerase Chain Reaction) Test:

1. "...these (PCR) tests cannot detect free, infectious viruses at all."  
- INVENTOR of the PCR test, Kary B. Mullis
2. "I'm skeptical that a PCR test is ever true."  
- Dr. David Rasnick, bio-chemist, protease developer
3. "...if you're (PCR) testing asymptomatic people, up to 80% of positives could be false positive."  
- David Crowe, Canadian Researcher

*"The Centers for Disease Control and Prevention is conflating the results of two different types of coronavirus tests, distorting several important metrics and providing the country with an inaccurate picture of the state of the pandemic."*<sup>67</sup>

Available tests for SARS-CoV-2 include: Roche cobas; Abbott RealTime SARS-CoV-2; Abbott ID NOW COVID-19; and, the Cepheid Xpert Xpress SARS-CoV-2. None detect any virus directly.

There is yet to be found a study that shows the SARS-COV-2 virus genome isolated, purified, and visualized via electron micrograph. The virus has not been purified, so the tests are not calibrated to 'COVID-19'. They're calibrated to proteins derived from the putative 30,000 base COVID-19 genome.

We do find sites such as **nextstrain.org** providing charting of the Genomic epidemiology of novel coronavirus.<sup>68</sup> It appears the SARS-CoV-2 virus and its variants are being well tracked. But with all these questions on testing, how reliable is this data?

*"If health authorities vastly underestimated the prevalence of the virus at the beginning of the pandemic, why did the virus nevertheless wait until lockdowns were imposed to suddenly start killing at levels which exceeded normal deaths?"<sup>69</sup>*

Without thorough retrospective testing, using reliable methods - not a RT-PCR test which was never intended for use as a diagnostic tool and which a major study out of China showed gives false positives as high as 80% - a spike in cases before the lockdowns cannot be assumed to be anything but an increase in testing.

With antibody testing, antigens or viral proteins are incorporated. Ideally, they come from a pure virus, purification of the virus has not occurred, and the antigens are created artificially from proteins based on portions of the 30,000 base RNA genome that is believed to come from the virus. Time series from the time of infection through at least the decline of IgM antibodies are not provided in any test study. With no documentation of this it shows that the models predicting a smooth rise, peak, then decline of IgM antibodies are either too simplistic or wrong. A test developed from Wadsworth Center New York found 40% of samples negative for antibodies 11-15 days after symptoms started, indicating antibodies coming and going randomly rather than in a smooth predictable fashion.

70+% of deaths in Ontario and 80+% in Quebec were in care homes. Authorities cannot claim this was unforeseen given they had stats from Italy, China and Washington. The elderly and disabled were abandoned.

In Spain, a document from SECPAL says if a care home patient with difficult breathing is not accepted for ICU they must be put on 'palliative care' which includes morphine and halperidol, and if they are still experiencing signs of pain, mizadolam. A pan-European document recommends morphine, mizadolam, haldol for respiratory distress, ARDS, even cough requires morphine.

If similar documents from other places turn up it is not unreasonable to suspect euthanasia, to put it euphemistically.

The way 'Covid deaths' are being counted is a national scandal -- We have no idea how many lives have really been lost to the disease<sup>70</sup>

In the paper Talking the talk, but not walking the walk: RT-qPCR as a paradigm for the lack of reproducibility in molecular research author Stephen Bustin notes:

The reverse transcription real-time quantitative PCR (RT-qPCR) is probably the most straightforward measurement technique available for RNA quantification and is widely used in research, diagnostic, forensic and biotechnology applications. Despite the impact of the minimum information for the publication of quantitative PCR experiments (MIQE) guidelines, which aim to improve the robustness and the transparency of reporting of RT-qPCR data, we demonstrate that elementary protocol errors, inappropriate data analysis and inadequate reporting continue to be rife and conclude that the majority of published RT-qPCR data are likely to represent technical noise.<sup>71</sup>

#### Coronavirus – Testing: What are we doing? What does it mean?

A PCR test can only be used to identify DNA viruses; the SARS-CoV2 virus is an RNA virus. Therefore, multiple steps must be taken to “magnify” the amount of genetic material in the specimen. Researchers used a method called RT-PCR, reverse transcription-polymerase chain reaction, to specifically identify the SARS-CoV-2 virus. It’s a complicated process.<sup>72</sup>

#### Scientists Say the COVID19 Test Kits Do Not Work, Are Worthless, and Give Impossible Results

The CDC and FDA both admit the COVID19 test kits suffer from false positives and false negatives. They just fail to tell you those rates. But others have revealed those rates. The false-positive rate of positive results was 80.33% and 85% false negative rate. The test kits don’t work.<sup>74</sup>

Positive results are indicative of active infection with 2019-nCoV but do not rule out bacterial infection or co-infection with other viruses. The agent detected may not be the definite cause of disease. Detection of viral RNA may not indicate the presence of infectious virus or that 2019-nCoV is the causative agent for clinical symptoms.<sup>76</sup>

#### UK government admits COVID-19 antibody tests don’t work

“The UK government has admitted that none of the 17.5m antibody tests it ordered in the fight against the coronavirus pandemic work well enough to be used. “Sadly, the tests we have looked at to date have not performed well,” wrote Professor John Bell, Regius Professor of Medicine at Oxford university on Monday. “We see many false negatives (tests where no antibody is detected despite the fact we know it is there) and we also see false positives. None of the tests we have validated would meet the criteria for a good test as agreed with the Medicines and Healthcare products Regulatory Agency.”<sup>77</sup>

### Tanzania president questions coronavirus kits after animal test

President Magufuli says tests were found to be faulty after goat, sheep and pawpaw samples test positive for COVID-19. They had randomly obtained several non-human samples, including from a pawpaw, a goat and a sheep, but had assigned them human names and ages. These samples were then submitted to Tanzania's laboratory to test for the coronavirus, with the lab technicians left deliberately unaware of their origins. Samples from the pawpaw and the goat tested positive for COVID-19, the president said, adding this meant it was likely that some people were being tested positive when, in fact, they were not infected by the coronavirus.<sup>81</sup>

In assays of The blood DNA virome in 8,000 humans much contamination from vaccines was found:

Of possible relevance to transfusion medicine, we identified Merkel cell polyomavirus in 49 individuals, papillomavirus in blood of 13 individuals, parvovirus B19 in 6 individuals, and the presence of herpesvirus 8 in 3 individuals. The presence of DNA sequences from two RNA viruses was unexpected: Hepatitis C virus is revealing of an integration event, while the influenza virus sequence resulted from immunization with a DNA vaccine. Age, sex and ancestry contributed significantly to the prevalence of infection. The remaining 75 viruses mostly reflect extensive contamination of commercial reagents and from the environment. These technical problems represent a major challenge for the identification of novel human pathogens. Increasing availability of human whole-genome sequences will contribute substantial amounts of data on the composition of the normal and pathogenic human blood virome. Distinguishing contaminants from real human viruses is challenging.<sup>82</sup>

CDC: Coronavirus antibody tests could be wrong 50% of the time<sup>85</sup>

Coronavirus Antibody Tests Have a Mathematical Pitfall -- *The accuracy of screening tests is highly dependent on the infection rate*

Antibody tests do have potential shortcomings: they may detect ineffective antibodies, they do not indicate if an infection is still active, and they fail to detect infection if administered before antibodies develop. A new test's accuracy can also be difficult to determine because of a lack of data. Still, such tests have been proposed as a way for individuals to find out if they have already been infected with the novel coronavirus. But a mathematical wrinkle makes these tests—and in fact, all screening tests—hard to interpret: even with a very accurate test, the fewer people in a population who have a condition, the more likely it is that an individual's positive result is wrong. If it is, people might think they have the antibodies (and thus may have immunity), when in fact they do not.<sup>86</sup>

About five cases involved COVID-positive people whose deaths involved gunshot wounds, she said. “Our current dashboard reflects anyone who died, that tested positive for COVID, irrespective of cause of death,” [Cathy Wasserman, state epidemiologist] said.<sup>87</sup>

Considering these many scientific perspectives as to the accuracy of the testing, the entire basis of the planetary lockdown comes into serious question. An ulterior motive is entirely possible.

German Official Leaks Report Denouncing Corona as ‘A Global False Alarm’

Germany’s federal government and mainstream media are engaged in damage control after a report that challenges the established Corona narrative leaked from the interior ministry.

The report focuses on the “manifold and heavy consequences of the Corona measures” and warns that these are “grave”. More people are dying because of state-imposed Corona-measures than they are being killed by the virus.

Initially, the government tried to dismiss the report as “the work of one employee”, and its contents as “his own opinion” – while the journalists closed ranks, no questions asked, with the politicians. But the 93-pages report titled “Analysis of the Crisis Management” has been drafted by a scientific panel appointed by the interior ministry and composed by external medical experts from several German universities. The report was the initiative of a department of the interior ministry called Unit KM4 and in charge with the “Protection of critical infrastructures”.<sup>88</sup>

On Thursday 07 May 2020, a Sovereign Grand Jury was convened in a virtual and secure session in the British Isles, under the protection of the Treaty of Universal Community Trust, to consider allegations in relation to the Coronavirus pandemic. The jury was asked to rule on whether there was sufficient evidence of pandemic fraud, upon the evidence submitted into the public domain by numerous doctors, experts and eye witnesses, to justify a formal Grand Jury investigation. ... Unanimously, the Grand Jury ruled that there is enough prima facie evidence to justify a hearing of the expert and eye witness testimony under oath, which will take place at the earliest opportunity.<sup>90</sup>

Ferguson, one of the world's most influential disease modelers, used his knowingly failed model to predict approximately over 2,200,000 in the USA and 510,000 deaths in the UK. As of May 5, 2020 the total COVID-19 deaths since Feb 1, 2020 on cdc.gov is 39,910 vs 751,953 total deaths in that period. The UK has registered 29,427 in the same period. Ferguson's exaggerated figures were the basis upon which world leaders enforced severely suppressive measures on their populations. However, the repressive lockdowns continue.<sup>92</sup>

Professor Ferguson has now resigned from his government advisory position for breaking the lockdown rules by having an affair with a married woman.<sup>93</sup>

#### Prof Neil Ferguson's Pandemic Model Shredded By Experts

Ferguson's Imperial College paper was one-sided, not peer reviewed and missed critical elements. His underlying computer model code was also unpublished, which meant that no one could examine it for potential errors. and numbers are seriously misrepresented. There is no doubt that people are dying from what appears in many cases to be a serious upper respiratory infection, but in others something more mysterious.

From Italian association of clinical and forensic pathologists:

Thanks to autopsies performed by the Italians ... it has been shown that it is not pneumonia ... but it is: disseminated intravascular coagulation (thrombosis). Therefore, the way to fight it is with antibiotics, antivirals, anti-inflammatories and anticoagulants. According to valuable information from Italian pathologists, ventilators and intensive care units were never needed. If this is true for all cases, we are about to resolve it earlier than expected. Important and new about Coranovirus: Around the world, COVID-19 is being attacked wrongly due to a serious pathophysiological diagnosis error.<sup>99</sup>

What is unique in this current situation is that anybody who dies with even a suspicion of having contact with the virus is counted as a COVID-19 death. This phantom death attribution program has seriously distorted the global picture, and has been the main driver behind the shutdowns of global countries and economies.

There is much comparison between COVID-19 death rates and seasonal flu, despite the fact that coronaviruses cause colds, not flu.<sup>100</sup>

As of May 4, 2020, there are approximately 250,000 “confirmed” COVID-19 deaths.<sup>101,102</sup>

Compare to:

Up to 650 000 people die of respiratory diseases linked to seasonal flu each year<sup>103</sup>

But what if the seasonal flu numbers are already corrupted? Here is a filing, claiming so, with the Assistant Secretary for Planning and Evaluation, U.S. Department of Health and Human Services by Kenneth Stoller of the International Hyperbaric Medical Association:

CDC -- Influenza Deaths: Request for Correction (RFC)

### CDC reviewing 'stunning' universal testing results from Boston homeless shelter

The Centers for Disease Control and Prevention is now "actively looking into" results from universal COVID-19 testing at Pine Street Inn homeless shelter. The broad-scale testing took place at the shelter in Boston's South End a week and a half ago because of a small cluster of cases there. Of the 397 people tested, 146 people tested positive. Not a single one had any symptoms.

"It was like a double knockout punch. The number of positives was shocking, but the fact that 100 percent of the positives had no symptoms was equally shocking," said Dr. Jim O'Connell, president of Boston Health Care for the Homeless Program.<sup>117</sup>

### If new data suggesting COVID-19 no more lethal than Flu is correct, should the world REVERSE its lockdown strategy?

A recent Stanford University study found the COVID-19 infection rate is probably between 50 and 85 times higher than official figures had previously indicated. The study looked for antibodies in 3,330 people in Santa Clara County. Antibodies develop in the blood after someone has been infected with the coronavirus and cleared it. And a much greater proportion of Santa Clarans had them than official figures had at that point suggested.<sup>118</sup>

In the 5 months since the outbreak spread throughout China and the Asian region, Taiwan has implemented no lockdowns, no shutdowns of public transportation, no draconian autocratic measures or crackdown on civil liberties, and has seen no uptick in deaths. In fact, in the last 5 months they have a grand total of 6 COVID-19 deaths! International tourists are gone, but locals are traveling and enjoying life. In fact, on their most recent holiday weekend in early April, 1.5 million people descended on 11 of the country's biggest resort areas. Guess what ... Everyone is still doing well!<sup>120</sup>

### High 'COVID-19 Deaths' in NYC, Negligence or a 'COVID-for-Cash' Mistreatment of Patients in Hospitals?<sup>121</sup>

The Most Important Coronavirus Statistic: 42% Of U.S. Deaths Are From 0.6% Of The Population

<sup>122</sup>

New Data Suggest the Coronavirus Isn't as Deadly as We Thought -- *A study finds 50 to 85 times as many infections as known cases -- meaning a far lower fatality rate.*<sup>123</sup>

We see suspicious activity, such as two leading COVID-19 researchers, who knew each other, **dying under mysterious and sinister circumstances within a month of each other**, at the height of the plandemic;

**James Taylor**, an expert on computational biology, who raised a heated debate about "genomic data sharing for #covid19 #SARSCoV2 research" two days before his death, the cause of which remains unreported; and,

**Dr. Bing Liu**, an alleged murder-suicide, that anybody who knew him doubts as true cause. Dr "Bing was on the verge of making very significant findings toward understanding the cellular mechanisms that underlie SARS-CoV-2 infection and the cellular basis of the following complications." "The other remarkable detail is how closely aligned Bing Liu and James Taylor's academic resumes were. Both academics were involved in the obscure field of computational systems biology, as well as machine-learning techniques to better predict the behavior of biological species."<sup>129</sup>

There have also been claims of "Hospitals Injecting COVID-19 Patients with Lethal Drug to Kill Them". While these have been anecdotal, there is one case where a "*Dominican woman leaves a voicemail for her husband before she is murdered by injection in a New York City Hospital.*"<sup>130</sup>

## World Bank Estimates 60 Million People May Fall Into Extreme Poverty Due To Coronavirus<sup>131</sup>

### Coronavirus: India's pandemic lockdown turns into a human tragedy<sup>132</sup>

And nothing like the WHO passing out conflicting information a day apart, which makes one wonder what their true intent is. It's as though they intend to create confusion to prevent a clear picture.

### Asymptomatic spread of coronavirus is 'very rare,' WHO says

Government responses should focus on detecting and isolating infected people with symptoms, the World Health Organization said. Preliminary evidence from the earliest outbreaks indicated the virus could spread even if people didn't have symptoms. But the WHO says that while asymptomatic spread can occur, it is "very rare."<sup>133</sup>

The very next day:

### WHO walks back comments on asymptomatic coronavirus spread, says much is still unknown

Dr. Maria Van Kerkhove, head of the WHO's emerging diseases and zoonosis unit, said it's a "really complex question" and much is still unknown.<sup>134</sup>

### The CDC has lost all credibility -- Any individual or institution that had been so often wrong would have lost public trust long ago.<sup>135</sup>

### The lack of evidence lockdowns actually worked is a world scandal -- There is still not a shred of real proof that the planet's reckless stay-at-home experiment made any difference<sup>136</sup>

### Is The 'Second Wave' Another Coronavirus Hoax?

Just a week or so ago the mainstream media and thousands representing the "medical community" told us we must throw out the "stay-at-home" orders and go to the streets to protest the death of George Floyd at the hands of the police. .... The virus only attacks people leaving their homes to protest the stay-at-home orders. Now, after thousands of businesses – many of them black-owned – have been reduced to rubble and innocent people in the inner cities no longer have anywhere to shop for the basic necessities of life, the mainstream media has backed off of its non-stop coverage of the protests. Suddenly last week they all simultaneously embraced a new fear story to terrify the masses: a "second wave" of coronavirus was among us. It was targeting those states that dared to "open up" their economies and begin a return to relatively normal lives.<sup>137</sup>

## **Low Cost Available Treatments**

There are readily available valid treatments for the symptoms attributed to COVID-19 that do not compromise the immune system like vaccines. The normal approach to recovery with flu is rest and nutrition. In more serious cases, with pneumonia-like symptoms such as from coronaviruses, **ozone**, **chloroquine**, **hydroxychloroquine**, **vitamin C**, and **melatonin** are being used successfully. Example references for each mentioned treatment are provided here:

## A Plausible "Penny" Costing Effective Treatment for Corona Virus -- Ozone Therapy

Novel coronavirus SARS-CoV-2 is rapidly spreading worldwide with a significant mortality rate. Coronaviruses have abundant cysteine in their spike proteins that may be easily and safely exploited with ozone (or other oxidation) therapy.

[Oxygen Therapy] may be ideal therapy for viruses. In order to successfully penetrate cells, many viruses require membrane glycoproteins to be in the reduced R-S-H form rather than oxidized (R-S-S-R). Ozone inactivates many viruses directly.<sup>138</sup>

## COVID-19, Pneumonia & Inflammasomes -- The Melatonin Connection<sup>139</sup>

### Chloroquine is a potent inhibitor of SARS coronavirus infection and spread

We report, however, that chloroquine has strong antiviral effects on SARS-CoV infection of primate cells. These inhibitory effects are observed when the cells are treated with the drug either before or after exposure to the virus, suggesting both prophylactic and therapeutic advantage.<sup>140</sup>

### Breakthrough: Chloroquine phosphate has shown apparent efficacy in treatment of COVID-19 associated pneumonia in clinical studies.

Chloroquine phosphate, an old drug for treatment of malaria, is shown to have apparent efficacy and acceptable safety against COVID-19 associated pneumonia in multicenter clinical trials conducted in China. The drug is recommended to be included in the next version of the Guidelines for the Prevention, Diagnosis, and Treatment of Pneumonia Caused by COVID-19 issued by the National Health Commission of the People's Republic of China for treatment of COVID-19 infection in larger populations in the future.<sup>141</sup>

### Henry Ford uses hydroxychloroquine to treat COVID-19 symptoms, says benefits outweigh risks

We feel that there is data both from the early published studies as well as from our colleagues in China that have treated a number of patients to justify its use in the therapy of sicker patients that are hospitalized with coronavirus infection.<sup>142</sup>

### Chinese Medical Team Report Successful Treatment Of Coronavirus With High-Dose Vitamin C

[T]he Shanghai Medical Association (SMA) in China has published a consensus on the comprehensive treatment of coronavirus disease. Based on the study of more than 300 clinical patients and developed by 30 experts in the treatment of new coronavirus pneumonia, it recommends high-dose vitamin C for even light infection with the virus. The dose recommended in the consensus is 50 to 100 mg per kilogram of bodyweight per day. For severe and critically ill patients, up to 200 mg per kilogram of bodyweight per day is advised, injected intravenously.<sup>143</sup>

### Doctor sees success in experimental COVID-19 treatment using Melatonin

In Medina County, Doctor Richard Neel tells us he thinks he could be onto something. He is treating COVID-19 patients with high-doses of Melatonin. "Melatonin could be a great, useful compound to counter the virus," Neel said. Neel, who served on a team of chemical and biological weapons experts for The Pentagon, has studied the effects of Melatonin for years. "One of my jobs was looking for countermeasures against chemical, biological and radiological weapons," Neel said. "In the course of my research, I came across Melatonin, which is just a remarkable compound," Neel said.<sup>144</sup>

## Italian MDs Study Results on Homeopathic Treatment of 50 COVID-19 Patients None of Whom Needed Hospitalization

A group of 24 Italian medical doctors with an additional specialization in homeopathic medicines treated 50 patients with diagnosed or highly probable cases of COVID-19. Patients were prescribed a single individually selected homeopathic medicine based on each patient's unique syndrome of symptoms, as per the homeopathic methodology. A review of 26 countries' hospitalization rates for patients with COVID-19 is 32%. In Italy, the hospitalization rate is 20.4%, and the rate of patients in intensive care units is 18.7%. A listing of each homeopathic medicine prescribed is listed in this report. This study of 50 patients treated with homeopathic medicines found that their hospitalization rate was zero.<sup>145</sup>

## Madagascar hands out 'miracle' virus cure as it lifts lockdown

Unarmed Madagascar soldiers went door-to-door in the capital Antananarivo, doling out sachets of a local herbal tea touted by President Andry Rajoelina as a powerful remedy against the novel coronavirus. Baptised Covid-Organics, the tonic is derived from artemisia - a plant with proven efficacy in treating malaria - as well as other indigenous herbs. It has been developed by the Madagascar Institute of Applied Research (IMRA) but has not been tested internationally. "This herbal tea gives results in seven days," Rajoelina announced at its official launch on Tuesday. "We can change the history of the entire world," he said, after downing a dose. "Two people have now been cured by this treatment."<sup>146</sup>

The subject of vaccines is vast and contentious, beyond this paper's scope. Here we present pertinent information on potential COVID-19 vaccines. Coronaviruses are the cause of the common cold, which affect the upper respiratory system, and for which no successful vaccine has been manufactured. Flu is caused by influenza A,B,C & D viruses. Influenza A viruses are those attributed to pandemic potential, such as the H1N1.

There are people, driven by money, power and ideology within and related -- via funding sources -- to governmental and private medical establishments, that want to vaccinate everyone on Earth, with whatever it is they will put into it. Bill Gates has clearly stated this is his goal. This appears to be the real agenda behind the COVID-19 exercise, which by now is shown to be a gross misappropriation of rights based on gross misrepresentation of science and data.

### Immunization Agenda 2030: A Global Strategy to Leave No One Behind

With the support of countries and partners, WHO is leading the co-creation of a new global vision and strategy to address these challenges over the next decade, to be endorsed by the World Health Assembly. IA 2030 envisions a world where everyone, everywhere, at every age, fully benefits from vaccines to improve health and well-being.<sup>152</sup>

The vaccine industry is fraught with fraud and questionable science:

### "Forced to falsify vaccine efficacy test" claims Merck Scientist

They [Virologists Stephen A. Krahlung and Joan A. Wlochowski] describe a supervisor manually changing test results that showed the vaccine wasn't working; hurriedly destroying garbage-bags full of evidence to keep the fraud from being exposed; and lying to FDA regulators who came to the lab after being alerted by the whistleblowers. A top Merck vaccine official told Krahlung the matter was a "business decision," the suit says, and he was twice told the company would make sure he went to jail if he told federal regulators the truth.<sup>153</sup>

### We've never made a successful vaccine for a coronavirus before. This is why it's so difficult

For those pinning their hopes on a COVID-19 vaccine to return life to normal, an Australian expert in vaccine development has a reality check -- it probably won't happen soon. The reality is that this particular coronavirus is posing challenges that scientists haven't dealt with before, according to Ian Frazer from the University of Queensland. He said the challenge is that coronaviruses have historically been hard to make safe vaccines for, partly because the virus infects the upper respiratory tract, which our immune system isn't great at protecting.<sup>154</sup>

### Flu shots and the risk of coronavirus infections

A randomized placebo-controlled trial in children showed that flu shots increased fivefold the risk of acute respiratory infections caused by a group of noninfluenza viruses, including coronaviruses. (Cowling et al, Clin Infect Dis 2012;54:1778) ... Such an observation may seem counterintuitive, but it is possible that influenza vaccines alter our immune systems non-specifically to increase susceptibility to other infections; this has been observed with DTP and other vaccines. (Benn et al, Trends in Immunology, May 2013) There are other immune mechanisms that might also explain the observation. To investigate this possibility, a case-control study is in order as we study and care for the victims of covid-19. Influenza vaccines have become sacred cows in some quarters, but they shouldn't be.<sup>155</sup>

### Deaths in a trial of the HPV vaccine

The death of girls who were a part of a Human Papilloma Virus vaccine trial has raised an alarm about the nature of research in India as well as the value attached by the state to the lives of its citizens. The trial was being conducted in Andhra Pradesh and Gujarat by the NGO PATH with support from the Indian Council of Medical Research and local health authorities. They were funded by the Bill and Melinda Gates Foundation.<sup>158</sup>

## A Killer Enterprise: How One of Big Pharma's Most Corrupt Companies Plans to Corner the COVID-19 Cure Market

One of the most politically-connected yet scandal ridden vaccine companies in the United States, with troubling ties to the 2001 anthrax attacks and opioid crisis, is set to profit handsomely from the current Coronavirus crisis. Not only did Emergent Biosolutions profit from national anthrax fears, they would also cash in on subsequent pandemic panics and later receive substantial backing from the Bill Gates-backed Coalition for Epidemic Preparedness Innovations (CEPI). Emergent's history of corruption and profiteering has in no way prevented them from cashing in on the COVID-19 global health crisis. On March 10, Emergent announced a partnership with Novavax to produce a COVID-19 vaccine, a vaccine also backed by the Bill Gates-backed Coalition for Epidemic Preparedness Innovations (CEPI). CEPI had previously partnered with Emergent Biosolutions, giving them over \$60 million in 2018. Emergent further expanded its partnership with NovaVax on March 31.<sup>159</sup>

*"You essentially turn your body into its own vaccine manufacturing unit."* -- Bill Gates on his proposed RNA vaccine for COVID-19

Pharma has 80 COVID vaccines in development, but Gates & Fauci pushed Moderna's "Frankenstein jab" to the front of the line. Scientists & ethicists are sounding alarms. The vaccine uses a new, untested, and very controversial experimental RNA technology that Gates has backed for over a decade. Instead of injecting an antigen & adjuvant as with traditional vaccines, Moderna plugs a small piece of coronavirus genetic code into human cells, altering DNA throughout the human body and reprogramming our cells to produce antibodies to fight the virus. MRNA vaccines are a form of genetic engineering called "germ line gene editing". Moderna's genetic alterations are passed down to future generations. In January The Geneva Statement the world's leading ethicists and scientists called for an end to this kind of experimentation.<sup>160</sup>

## Bats, Gene Editing & Bioweapons: Recent Darpa Experiments Raise Concerns Amid Coronavirus Outbreak

DARPA recently spent millions on research involving bats and coronaviruses, as well as gene editing "bioweapons" prior to the recent coronavirus outbreak. Professor Adrian Hill describes the efforts to create a vaccine as “a race against the virus disappearing, and against time. We said earlier in the year that there was an 80% chance of developing an effective vaccine by September. But at the moment, there's a 50% chance that we get no result at all. We're in the bizarre position of wanting COVID to stay, at least for a little while.”<sup>162</sup>

### Only a COVID-19 vaccine will allow return to 'normalcy': UN chief

"We need an ambitious effort to ensure that international stakeholders operate through a harmonised, integrated and leveraged approach to maximise the speed and scale needed for the universal deployment of such a vaccine by the end of 2020," he insisted.<sup>163</sup>

### VACCINE CONSPIRACY: U.S. Government Colludes With Big Pharma To Poison The American People

There should be absolutely no doubt about it: The outrageous and odious childhood vaccination regimes instituted across the 50 states and territories of the USA are the product of a multi-decade conspiracy on the part of the US Federal Government and its many health-related organs and corporate collaborators. Just who are those many co-conspirators?<sup>164</sup>

### Doubts raised over Oxford coronavirus vaccine after ALL of the monkeys that took part in the trial are found to have contracted the disease<sup>165</sup>

### All Test Subjects of Bill Gates' Vaccine Ended Up With Coronavirus

What could possibly go wrong with fast-tracking a hastily put-together vaccine to treat an illness with a .26% fatality rate and mass-producing the concoction for dissemination? That's what some in the medical community want to do with Bill Gates' new vaccine for coronavirus, which he began working on – curiously – a short time before coronavirus went viral. What could go wrong has now been made public, as Bill Gates' shoddily-hastened vaccine has been determined to make all animal test subjects get COVID-19 when exposed to the virus.<sup>166</sup>

### Bill Gates predicts 700,000 victims from corona vaccination

"We have ... you know ... one in ten thousand ... ah ... side effects. Thats ... you know ... way more. Seven hundred thousand ... ah ... you know ... people who will suffer from that. So, really understanding the safety at gigantic scale across all age ranges – you know – pregnant, male, female, undernourished and existing comorbidities. It's very, very hard and that actual decision of ,OK, let's go and give this vaccine to the entire world'... ah ... governments will have to be involved because there will be some risk and indemnification needed before that ... ah ... can be decided on.”<sup>167</sup>

## Dissenting Governmental & Professional Voices

*"Knowing what we know today about COVID-19's Infection Fatality Rate, asymmetric impact by age and medical condition, non-transmissibility by asymptomatic people and in outdoor settings, near-zero fatality rate for children, and the basic understanding of viruses through Farr's law, locking down society was a bone-headed policy decision so devastating to society that historians may judge it as the all-time worst decision ever made. Worse, as these clear facts have become available, many policy-makers haven't shifted their positions, despite the fact that every hour under any stage of lockdown has a domino-effect of devastation to society. Meanwhile, the media—with a few notable exceptions—is oddly silent on all the good news. Luckily, an unexpected group of heroes across the political landscape—many of them doctors and scientists—have emerged to tell the truth, despite facing extreme criticism and censorship from an angry mob desperate to continue fighting an imaginary war."*<sup>184</sup>

There is a growing number of dissenting professional voices concerning all aspects of the alleged pandemic. Here are but a few to question the veracity of the official:

**Belarus President Alexander Lukashenko** asks, *"Is this pandemic, this coronavirus, a man-made phenomenon? I don't know the answer yet, but I have my suspicions. Are politicians and others using this situation for their own purposes? You and I both know the answer to that question. You already see how it is used today ... Doesn't it seem to you that the powerful forces of the world would like to remake the world, without a 'war' (Emmanuel Macron has already called it a war), through this so-called 'corona-psychosis', or 'info-demic'? Many people are asking: 'what will happen after the pandemic?'"*<sup>185</sup>

**Italian MP Sara Cunial** has denounced Bill Gates as a "vaccine criminal", entered into the official record on the floor of the Italian Parliament, urging their President to hand Gates over to the International Criminal Court for crimes against humanity, for his connections to deadly vaccines, lockdowns, depopulation policies, and plans to microchip the human race, asserting that the "real goal of all of this is total control." MP Cunial asks the president *"if you won't do this, tell us how we should define you, the 'friend lawyer' who takes orders from a criminal."*<sup>186</sup>

The **Foreign Ministry of Burundi** has expelled the WHO coronavirus team, *"declared persona non grata and as such, must leave the territory of Burundi."* There has been no public reason, an official has privately accused it *"of unacceptable interference in its management of the coronavirus."*<sup>187, 188</sup>

**Madagascar President Andry Rajoelina** claims that the WHO offered him a US\$20 million bribe to poison the COVID Organics herbal remedy which has been curing people there.<sup>189,190</sup>

**Barrister Ikenga Imo Ugochinyere**, spokesperson for opposition The Coalition of United Political Parties (CUPP) of Nigeria, has stated that intelligence reports indicate that Bill Gates offered a bribe of US\$10 million for speedy passage of a compulsory vaccine bill to the leadership of the House of Representatives led by **Femi Gbajabamila**. Barrister Ugochinyere states that *"The plan to push the passing of the bill is evil."*<sup>191</sup>

**Former American Congressman Trey Gowdy**, in discussion of dealing with restrictive coronavirus lockdown orders: *"we have this thing called civil disobedience and people can engage in it."*<sup>192</sup>

**President John Magufuli** of Tanzania called for investigation of COVID-19 test kits used there, after instructing security forces to check the quality by submitting non-human samples of pawpaw, goat and sheep to the testing facility, with the tests coming out positive for the virus. *“There is something happening. I said before we should not accept that every aid is meant to be good for this nation.”*<sup>193,194</sup>

Sri Lankan **Cardinal Malcolm Ranjith** has called for an investigation into the cause of the coronavirus pandemic. *“We know that in several areas of the world researchers of all types for various reasons are engaging in research to destroy human life and nature. Some of these viruses are the products of aimless experiments. ... Producing such things is a very serious crime for mankind. ... I ask the Lord to reveal who made these poisonous seeds. The United Nations or international organizations must find out who is behind these incidents and punish them. Such research should be banned,”* said Cardinal Ranjith.<sup>195</sup>

### **Nnamdi Kanu accuses Bill, Melinda Gates of planning to kill Africans using vaccine**

**Nnamdi Kanu**, the leader of the Indigenous People of Biafra, IPOB, has alleged that billionaire businessman, Bill Gates and his wife, Melinda are planning to kill Africans using the Coronavirus vaccine. *“Bill Gates and co tried to reduce the black African population, they first tried it in South Africa with HIV and it failed them and backfired. ... they want you to vaccinate not because they want to protect you from Coronavirus but to kill you off, to sterilize our women.”*<sup>196</sup>

**Professor John Oxford**, English virologist, Professor at Queen Mary, University of London:

“Personally, I view this Covid outbreak as akin to a bad winter influenza epidemic. In this case we have had 8000 deaths this last year in the ‘at risk’ groups viz over 65% people with heart disease etc. I do not feel this current Covid will exceed this number. We are suffering from a media epidemic!”<sup>197</sup>

Professor John Oxford is one of the UK’s foremost virus experts and runs the UK’s only secure isolation ward for testing treatments for viruses on behalf of a company called Open Orphan (ORPH). He has today sent a letter lashing out at a “media epidemic” and saying that COVID-19 is in fact less bad than a normal flu season. He says there will be fewer than 8,000 UK deaths from Coronavirus.<sup>198</sup>

**John Ioannidis** -- C.F. Rehnberg Chair in Disease Prevention, Professor of Medicine, of Health Research and Policy, of Biomedical Data Science, and of Statistics; Co-Director, Meta-Research Innovation Center at Stanford:

The current coronavirus disease, COVID-19, has been called a once-in-a-century pandemic. But it may also be a once-in-a-century evidence fiasco. ... The data collected so far on how many people are infected and how the epidemic is evolving are utterly unreliable. ... Reasonable estimates for the case fatality ratio in the general U.S. population vary from 0.05% to 1%.

That huge range markedly affects how severe the pandemic is and what should be done. A population-wide case fatality rate of 0.05% is lower than seasonal influenza. If that is the true rate, locking down the world with potentially tremendous social and financial consequences may be totally irrational. It’s like an elephant being attacked by a house cat. Frustrated and trying to avoid the cat, the elephant accidentally jumps off a cliff and dies.<sup>199</sup>

This is an agenda that has nothing to do with this infection. And none of the science supports the numbers they're giving, the numbers of deaths. The people are said to be dying of COVID-19 ... it doesn't support a single one of Koch's postulates or Hill's criteria, or every person with the virus has to have the disease. Most people don't have the disease. In fact the German numbers are less than .8%. So this can only be considered to be a plague of corruption to take away constitutional, religious and every other kind of freedoms which have been taken from America by the agenda of this vaccine program.<sup>200,201,202</sup>

**Professor Peter C. Gøtzsche:** *"Official numbers are wildly exaggerated."*<sup>203</sup>

**Joel W. Hay**, professor & founder of the Department of Pharmaceutical Economics and Policy at the University of Southern California; Health Economist at the Harbor UCLA Center for Vaccine Research.

We could end this lockdown in 72 hours if officials ordered testing of stored blood samples in hospitals, blood donor centers, clinics and labs. Evidence is mounting that suggests COVID-19 was present on US soil as early as November. Stored samples of blood from September 2019 on can and should be tested with antibody assays that will indicate the presence of viral antibodies long before lockdowns were implemented. If antibodies are present then this is indisputable proof that COVID-19 was already rampant in the population in 2019.

COVID19 is very similar to the SARS virus that caused the 2003 outbreak and other coronaviruses. Scientists have been working on vaccines and therapy for SARS since 2003 without success, so staying in lockdown until a Covid-19 vaccine is developed is not a feasible option. Viral load tests (PCR) and serology tests (antibodies) are currently available, although both types of tests have false negatives and false positives.<sup>204</sup>

Epidemiologist: Coronavirus could be 'exterminated' if lockdowns were lifted

*"Going outdoors is what stops every respiratory disease"* -- Knut Wittkowski, previously the longtime head of the Department of Biostatistics, Epidemiology, and Research Design at the Rockefeller University in New York City, said in an interview with the Press and the Public Project that the coronavirus could be "exterminated" if we permitted most people to lead normal lives and sheltered the most vulnerable parts of society until the danger had passed.<sup>210</sup>

More than 600 of the nation's physicians sent a letter to President Trump this week calling the coronavirus shutdowns a "mass casualty incident" with "exponentially growing negative health consequences" to millions of non COVID patients.<sup>211</sup>

## Global Lockdown -- Crackdown on Human Rights

The lack of evidence lockdowns actually worked is a scandal -- There is still not a shred of real proof that the planet's reckless stay-at-home experiment made any difference.<sup>212</sup>

Coronavirus: You Have Given Your Freedom Away Abandon Critical Thinking Too<sup>213</sup>

In face of the official narrative, governments globally locking down their populations using various means, voluntary performance to police state type enforcement. Tracking apps for phones and monitoring drones are being implemented. The question naturally arises: will all these rights -- being sacrificed in the of curtailing the pandemic -- ever be gained again? Considering the valid questions raised on etiology and epidemiology, one must question the true intent, and consider their actions moving forward.

Some curious elements to the picture! Military command retreats to nuclear proof bunkers?

COVID-19 Drives Command Teams Charged With Homeland Defense Into Cheyenne Mountain Bunker -- Another US military command and control element is also now isolated in a third, undisclosed location.

U.S. Northern Command has dispersed essential command and control teams to multiple hardened locations, including the famous Cheyenne Mountain bunker complex in Colorado, as well as another unspecified site, and is keeping them in isolation. The command took these steps to help ensure these personnel can continue to watch around the clock for potential threats to the U.S. homeland as the COVID-19 pandemic continues to expand across the country and around the world.<sup>214</sup>

### Will COVID-19 End the Age of Mass Protests?

Global mass political protests reached a historic high at the end of 2019. Then, in a twist of fate, the COVID-19 pandemic virtually eliminated street protests that had, for a decade, increased globally at an annual rate of 11.5 percent. **While social distancing has doused the flames of tens of millions taking to the streets, the embers that ignited protests in 114 countries last year are still glowing hot.** There is strong reason to believe that once the health crisis ebbs, there will be a new surge of global protests -- perhaps even greater in scale and political consequence. These protests could play a determining role in setting national and global agendas post-COVID-19. Or they could simply deepen the disorder now gripping the world.<sup>215</sup>

Apparently not, as huge protests and riots have erupted in the USA and elsewhere around the globe, seemingly on queue when the lockdown-virus story was starting to fall apart.

What scientific data is being utilised by governments globally to make such dire and drastic changes to our civilisation? Well, in the UK you're not allowed to know:

UK's scientific advice on coronavirus to be secret until after pandemic

There is now serious doubt over the correlation between lockdown and saving lives. Reality is creeping into the COVID-19 dialogue. It is becoming apparent that people are getting sick because they are being isolated and effectively living under house arrest, condemned as "murderers" if they so much as think about breaking curfew, being snitched on by neighbours for "gathering" more than two people together in their back gardens.<sup>216</sup>

### The Models Were Wrong. Does Anyone Care?

Everyone who has been paying attention knows that the epidemiological models on which the current shutdown mania is based have been proved to be wrong, wrong, wrong. Yet, zombie-like, they continue to influence our ill-informed policymakers.<sup>217</sup>

### TAIWAN: No Lockdowns, No Closed Businesses, Non-WHO Member, & Relatively Unaffected by COVID-19, April 28, 2020

Johns Hopkins University had predicted that Taiwan would have the second most COVID-19 cases in the world, due to its close proximity to Mainland China. But astonishingly, in spite of being only 80 miles from the coast of China with over 400,000 of its 24 million citizens working in China, as of mid-April, the country only had 400 cases of COVID-19, and only 6 deaths. And the vast majority of their 400 cases came into the country from abroad. All of this has happened without shutting down the country with lock downs, and with almost all of its businesses continuing to operate.<sup>218</sup>

Our founders were intimately familiar with pandemics, viruses and plagues, yet they did not allow any to suspend our Constitutional liberties. Not one word in the Constitution about plagues or pandemics to exempt the government from any of our Bill of Rights. Why do our current courts allow it? Because the public is asleep at the wheel. Think the pandemic threatens to kills us all? A review of the data shows the pandemic is more panic than plague.

“People shouldn’t be afraid of their government. Governments should be afraid of their people.” Only when an awake public asserts their human liberties to protest the loss of their liberties will, then, governments quit using public health crises to seize power that does not belong to them. The answer to 1984 is still 1776.<sup>222</sup>

While many protests globally were shut down due to the pandemic, protests against these human rights violations started to erupt in many places, mostly US States at present. We can expect the human spirit to rise further against these unjust diktats. But will the protests be hijacked by nefarious forces?

#### Coronavirus shutdown: What states have seen protests against stay-at-home orders

Demonstrators rallied in states across the country this month to protest governor-imposed stay-at-home orders that have kept Americans out of work for weeks to prevent the spread of coronavirus, with many arguing that the strict measures attack their constitutional freedoms and liberties.<sup>223,224</sup>

Meanwhile, many jurisdictions are going full police state, taking advantage of the situation to implement totalitarian measures under the guise of saving people from COVID-19.

#### In Italy, opponent of lockdown thrown into psychiatric hospital

In the Sicilian city of Ravanusa, 33-year-old Dario Musso drove down the street with a megaphone, wanting to wake up his fellow citizens to the cry of "The pandemic is not deadly! Come out, take off your masks! Open up the stores!" All witnesses claim that he was perfectly sane, simply outraged. He was arrested and sent to a psychiatric hospital, where he was bound to a bed for 4 days, drip fed and sedated.<sup>231</sup>

And of course the people on lockdown will have to pay for their safety:

- United Nations wants 10% of entire planet's annual income in fund for coronavirus response<sup>232</sup>
- Coronavirus: Tax changes coming to pay for Covid-19 response: What could they look like?<sup>233</sup>
- Coronavirus crisis could plunge half a billion people into poverty: Oxfam<sup>234</sup>

We must point out the mass humiliation ritual of having people wear masks. The science goes against mass wearing. They are being seen as a symbol of censoring free speech, which goes in tune with the active suppression and censorship on major electronic platforms, such as YouTube, Google, and Facebook, of anything questioning the official narrative. The purpose of surgical masks, when used properly, is so that the doctors and nurses don't infect the people they are operating on.

#### A cluster randomised trial of cloth masks compared with medical masks in healthcare workers

The aim of this study was to compare the efficacy of cloth masks to medical masks in hospital healthcare workers (HCWs). The rates of all infection outcomes were highest in the cloth mask arm, with the rate of ILI [influenza-like illness] statistically significantly higher in the cloth mask arm compared with the medical mask arm. This study is the first RCT (Random Control Trial) of cloth masks, and the results caution against the use of cloth masks. This is an important finding to inform occupational health and safety. Moisture retention, reuse of cloth masks and poor filtration may result in increased risk of infection.<sup>235</sup>

## Conspiracy?

### WHEN CONSPIRACY BECOMES REALITY

It wasn't long ago microchipping and drone surveillance were figments of the sci-fi movie-goers imagination. Today, those 'conspiracies' are on the horizon, and we must decide soon if we want them to be a part of our future. -- Del Bigtree<sup>241</sup>

The complex COVID-19 situation seen through the myriad of facts as presented herein implies a covert, agenda-driven program of which the official narrative is merely a well-planned cover operation. We find the same players at every turn of a page, William "Bill" Gates of Microsoft fame, and Dr. Anthony Fauci of the NIAID and the Epidemic Intelligence Service.<sup>242</sup>

Look at the people advising the **U.S. President Donald Trump** on this issue, from the swamp he promised to drain:

**Dr. Anthony Fauci**, head of the National Institute of Allergy and Infectious Diseases NIAID is on the Leadership Council for the Bill and Melinda Gates Foundation. He has been implicated in massive scientific fraud and malfeasance for decades, including with Robert Gallo and the HIV controversy exposed by Peter Deusberg, who was discredited by Fauci's directives. It is a wonder that Fauci is now, at 79 and well past retirement age, in control of billions of dollars of public spending, a healthy portion he directs to himself. Along with Bill Gates these two most of all represent the face of the drive to vaccinate everyone on the planet, except of course them and their families.

DOD LEAK: Feds Investigated Birx & CDC Director [Redfield] for “Scientific Fraud & Misconduct”; Fabricated, Falsified HIV/AIDS Vaccine Trials

Dr. Robert Redfield, the director of the CDC, and Dr. Deborah Birx -- the Coronavirus Coordinator for the White House -- were the targets of a damning Department of Defense investigation after colleagues in the U.S. Army and U.S. Air Force blew the whistle on scientific fraud during clinical trials of a HIV/AIDS vaccine.<sup>254</sup>

Gates' Globalist Vaccine Agenda: A Win-Win for Pharma and Mandatory Vaccination

Promising his share of \$450 million of \$1.2 billion to eradicate polio, Gates took control of India's National Technical Advisory Group on Immunization (NTAGI), which mandated up to 50 doses of polio vaccines through overlapping immunization programs to children before the age of five. Indian doctors blame the Gates campaign for a devastating non-polio acute flaccid paralysis (NPAFP) epidemic that paralyzed 490,000 children beyond expected rates between 2000 and 2017. In 2017, the Indian government dialed back Gates' vaccine regimen and asked Gates and his vaccine policies to leave India. NPAFP rates dropped precipitously.

In 2017, the World Health Organization (WHO) reluctantly admitted that the global explosion in polio is predominantly vaccine strain. The most frightening epidemics in Congo, Afghanistan, and the Philippines, are all linked to vaccines. In fact, by 2018, 70% of global polio cases were vaccine strain.<sup>257</sup>

Bill Gates Has Been Controlling WHO

We have a major crisis on our hands. Bill Gates is a VERY SERIOUS threat to not just the world economy, but to world peace. ## Bill Gates and his coronavirus conflicts of interest<sup>259</sup>

So who is Bill Gates? His mythology is as a computer nerd pioneer of DOS and Windows software, and now a visionary hero, seeking vaccines to save the world. What is the real story?

His mother, Mary Maxwell Gates, whose grandfather James Maxwell was a Federal Reserve director for Seattle, was the first woman chair of the United Way charity national board along with John Opel, CEO of IBM. The United Way “shunts a portion of all donations to Planned Parenthood.”<sup>260</sup>

As the legend goes, Opel set up a meeting with Bill Gates at the behest of Mary in 1980. However, IBM was under heavy anti-trust action from the US Department of Justice for their computer monopoly, starting in 1969, going to trial in 1975, ending in 1982. IBM would be in a better strategic position with an independent software front. Bill got the plum.

IBM's background? It's first CEO, Thomas J. Watson, had a close business relationship with Nazi Germany, both in financial and technological investments, the later including equipment for managing inmates of concentration camps.<sup>261</sup> His son Thomas Watson Jr. succeeded him as CEO. Opel, as top salesperson, became personal assistant to Watson Jr. in 1959.

Prescott Bush, of the political dynasty family, was banker to the Nazi regime, assisting in Hitler's industrial expansion into war machines. He was also active in USA eugenics circles; he was a director of the Mental Hygiene Society (MHS), a project of Yale's Skull and Bones Society of which he, his son George HW, and grandson George W were also members in their time. The MHS "would evolve into the CIA's cultural engineering effort of the 1950s, the drugs and brainwashing adventure known as 'MK-Ultra'."<sup>262</sup> In 1947, following his stint as “Hitler's Banker” for Brown Harriman Brothers Bank, where the US-funded NAZI industrial buildup was based in part on the eugenics programs in the concentrations camps, managed with IBM equipment overseen by Thomas Watson Sr, Prescott was noted as the national treasurer for Margaret Sanger's Planned Parenthood, an organisation he was an active supporter of, “instrumental in launching and securing federal funding for the group” when he later became a U.S. Senator.<sup>263</sup>

Bills' father William Henry Gates II was head of Planned Parenthood, years unknown and shrouded in mystery. Planned Parenthood grew out of Margaret Sanger's eugenics programs, her philosophy to “protect society against the propagation and increase of the unfit.” “We do not want word to go out that we want to exterminate the Negro population.”<sup>264,265</sup> Planned Parenthood profits from fetal tissue sales, which they have denied despite clear evidence.<sup>266</sup> Aborted fetal tissue are utilised in production of vaccines,<sup>267</sup> as well as many food products.<sup>268</sup>

The Gates family are very well connected, elitist, multi-generational eugenicists,<sup>269,270</sup> protecting society against the “unfit,” or however Bill Jr. puts it these days with his global vaccination and ID tracking push. This is the real story behind COVID-19.<sup>271</sup>

## CORONAVIRUS TRACED TO THE BRITISH CROWN

The Pirbright Institute (UK) has been awarded 11 U.S. Patents, including Coronavirus U.S. Pat. No. 10,130,701. The Pirbright Institute is controlled by the Queen's Golden Share along with SERCO and QinetiQ (pron. kinetic). Pirbright's controllers track back to SERCO, QinetiQ & Sir Geoffrey E. Pattie, Chairman Marconi and the British Intellectual Property Institute. Outrageously, British SERCO -- today runs the U.S. Patent Office, U.S. FEMA Region 04, and Zone 02, websites for U.S. Obamacare, OPM, GSA and U.S. Navy SPAWAR, Virginia, New York, 63 U.S. city air traffic controllers, and more. SERCO used its control of the U.S. Patent Office to issue its British bio company a patent on the Coronavirus in record time -- that's pure fraud.<sup>279</sup>

## Dr. Anthony S. Fauci running damage control for Pirbright Institute

CDC propagandist Anthony S. Fauci, M.D. received major funding from The Bill and Melinda Gates Foundation -- who also funded the Coronavirus patent holder The Pirbright Institute (UK). Fauci just recently received a \$100 million grant from Gates. The Gates Foundation is also a major funder of The Pirbright Institute (UK) with DARPA, The Wellcome Trust (UK), DARPA, WHO, EU, DERA. The Pirbright Institute (UK) is the patentee of the CORONAVIRUS U.S. Pat. No. 10,130,701.<sup>280</sup>

## Bill Gates funded the PIRBRIGHT institute, which owns patent on coronavirus

The coronavirus strain that's currently spreading throughout China and abroad is a patented virus that's owned by an entity called The Pirbright Institute, which is partially funded by the Bill and Melinda Gates Foundation. ... the Bill and Melinda Gates Foundation co-hosted a "high-level pandemic exercise" back in October that involved discussions about how "public / private partnerships will be necessary during the response to a severe pandemic in order to diminish large-scale economic and societal consequences." Held in partnership with the Johns Hopkins Center for Health Security and the World Economic Forum, this latest endeavor by Bill Gates is highly suspicious, to say the least, especially when considering that it was held just in time for the coronavirus outbreak.<sup>281</sup>

## Gates Foundation Trust Ups Stake in U.K. Prison Firm

The trust, the Gates foundation's investment arm, added nearly 200,000 shares of Serco Group Plc in May [2019].<sup>282</sup>

## Chinese Coronavirus is a Man-Made Virus According to Luc Montagnier, Man Who Discovered HIV

Professor Luc Montagnier, 2008 Nobel Prize winner for Medicine, claims that SARS-CoV-2 is a manipulated virus that was accidentally released from a laboratory in Wuhan, China. Chinese researchers are said to have used coronaviruses in their work to develop an AIDS vaccine. HIV RNA fragments are believed to have been found in the SARS-CoV-2 genome.<sup>283</sup>

*"We have carefully analyzed the description of the genome of this RNA virus. We weren't the first, a group of Indian researchers tried to publish a study showing that the complete genome of this virus that has within the sequences of another virus: that of HIV."*<sup>284</sup>

## Renowned Microbiologist Claims Wuhan Lab 'Did Absolutely Crazy Things' With Coronavirus

Dr. Peter Chumakov of the Engelhardt Institute of Molecular Biology and Russian Academy of Sciences claims that while the Wuhan scientists' goal in creating the coronavirus was not malicious -- instead, they were trying to study the pathogenicity of the virus.

"In China, scientists at the Wuhan Laboratory have been actively involved in the development of various coronavirus variants for over ten years," he said. "They did absolutely crazy things, in my opinion," he said, adding, "For example, inserts in the genome, which gave the virus the ability to infect human cells. Now all this has been analyzed."<sup>285</sup>

### U.S. Government's \$3.7 Million Grant to Wuhan Lab at Center of Coronavirus Outbreak

Following the 2002-2003 SARS coronavirus outbreak, NIH funded a collaboration by Chinese scientists, US military virologists from the bioweapons lab at Fort Detrick, and National Institutes of Health (NIH) scientists from NIAID, to prevent future coronavirus outbreaks by studying the evolution of virulent strains from bats in human tissues. Those efforts included "gain of function" research which is "accelerated viral evolution" to create COVID Pandemic superbugs, enhanced bat-borne COVID mutants more lethal and more transmissible than wild COVID.

Fauci's studies alarmed scientists around the globe who complained, according to a December 2017 NY Times article, that "these researchers risk creating a monster germ that could escape the lab and seed a pandemic." Dr. Marc Lipsitch of the Harvard School of Public Health's Communicable Disease Center told the Times that Dr. Fauci's NIAID experiments "have given us some modest scientific knowledge and done almost nothing to improve our preparedness for pandemic, and yet risked creating an accidental pandemic."

In October 2014, following a series of federal laboratory mishaps that narrowly missed releasing these deadly engineered viruses, President Obama ordered the halt to all federal funding for Fauci's dangerous experiments. NIAID-funded gain-of-function research continued after the moratorium in a Wuhan laboratory. Congress needs to launch an investigation of NIAID's mischief in China.<sup>286,287,288</sup>

### Dr. Fauci Backed Wuhan Lab with Millions of U.S. Dollars for Risky Coronavirus Research

In 2019, with the backing of NIAID, the National Institutes of Health committed \$3.7 million over six years for research that included some gain-of-function work. The program followed another \$3.7 million, 5-year project for collecting and studying bat coronaviruses, which ended in 2019, bringing the total to \$7.4 million.<sup>289</sup>

Here is a concerned paper on "*SARS-related coronaviruses (SARSr-CoV) have been detected in horseshoe bats since 2005 in different areas of China*" with NIAID listed as co-funder:

### Discovery of a rich gene pool of bat SARS-related coronaviruses provides new insights into the origin of SARS coronavirus<sup>290</sup>

Research in this manuscript was supported by grants from the National Institute of Allergy & Infectious Disease and the National Institute of Aging of the U.S. National Institutes of Health (NIH), and by the National Natural Science Foundation of China. Published online 2015 Nov 9.<sup>291</sup>

Some sources claim that the release of the virus was accidental, while acknowledging in a technical manner that it was man-made.

Mistakes may have been precipitated by the need to quickly finish research that was being rushed for Johns Hopkins' Event 201 which was held this past October and meant to gameplan the containment of a global pandemic. Research may also have been hurried due to deadlines before the impending Chinese New Year -- the timing of these events point to increased human error, not a globalist conspiracy. Beijing has had four known accidental leaks of the SARS virus in recent years, so there is absolutely no reason to assume that this strain of coronavirus from Wuhan didn't accidentally leak out as well. As would be expected, this virus appears to have been bio-engineered at the spike-protein genes which was already done at UNC to make an extraordinarily virulent coronavirus.<sup>292</sup>

### American Pravda: Our Coronavirus Catastrophe as Biowarfare Blowback?

The timing of an accidental laboratory release would obviously be entirely random. Yet the outbreak seems to have begun during the precise period of time most likely to damage China, the worst possible ten-day or perhaps thirty-day window. As I noted in January, I saw no solid evidence that the coronavirus was a bioweapon, but if it were, the timing of the release seemed very unlikely to have been accidental.<sup>293</sup>

And in case you don't want to believe any of this, you can always rely on some fact checkers!

### Facebook 'Fact Checker' Worked At Wuhan Biolab; Ruled Out Virus-Leak While 'Debunking' Articles

A Facebook fact checker who has "debunked" articles suggesting that COVID-19 may have leaked from the Wuhan Institute of Virology (WIV) has a giant conflict of interest; she worked at the Institute -- which is now suspected of accidentally leaking the hyper-virulent virus which has killed over 130,000 people and cast the global economy into chaos.

Danielle Anderson, who works at Duke University's NUS Medical School lab in Singapore, also contributes to Science Feedback -- which Facebook has been using to slap "**False Information**" labels on articles claiming that COVID-19 may have originated at the Wuhan Institute -- where Anderson worked with bat coronavirus.<sup>294</sup>

### Bill Gates Continues To Push "Immunity Passports" & Tech-Enabled Surveillance State To Combat COVID

Bill Gates has inserted himself into the national dialogue as a self-proclaimed coronavirus sage who will lead the world out of dark times through a digitally-assisted brave new world of testing, contact tracing, and of course -- a **vaccine**. *"The new approach I'm most excited about is known as an RNA vaccine. (The first COVID-19 vaccine to start human trials is an RNA vaccine.) Unlike a flu shot, which contains fragments of the influenza virus so your immune system can learn to attack them, an RNA vaccine gives your body the genetic code needed to produce viral fragments on its own. When the immune system sees these fragments, it learns how to attack them. An RNA vaccine essentially turns your body into its own vaccine manufacturing unit."* -- Bill Gates <sup>295</sup>

### Are immunity passports and 'vaccine tattoos' coming?

"McHugh et al. developed dissolvable microneedles that deliver patterns of near-infrared light-emitting microparticles to the skin. Particle patterns are invisible to the eye but can be imaged using modified smartphones. By codelivering a vaccine, the pattern of particles in the skin could serve as an on-person vaccination record."<sup>296</sup>

### Your "Immunity Passport" Future Begins to Materialize as Airlines Call for Digital ID Tracking Systems

The World's Largest Airline Trade Group has called for Immunity Passports, Thermal Screening, Masks, and Physical Distancing to be part of the industry's strategy for returning to "normal" operations. *"We foresee the need to collect more detailed passenger contact information which can be used for tracing purposes," the report states.*

Dr. Charles Lieber is a nano-scientist at Harvard University. He was recently charged by the American authorities for secretly being a Chinese agent. However, there is a mystery surrounding the nature of his work. It is said he was recruited for advanced research into nanowire-batteries. Lieber was in fact working on virus transmitters that could penetrate cell membranes without affecting the intercellular functions and even measure activities inside heart cells and muscle fibers. Lieber could create nanostructures using nothing but simple and inexpensive chemical techniques. He even went a step further to show how these nanowires could be used as transistors, complex logic circuits, data storage devices, and even sensors.<sup>315</sup>

One narrative evolving in the present COVID-19 pandemic is that 5G is a cause or catalyst for its pathogenesis. People are comparing maps of 5G distribution with confirmed COVID-19 cases. Looking at population densities shows this to be a probable correlation without causation.

However, there is massive evidence that EMFs weaken the proper functioning of biological systems. 5G is a new, untested technology, in the frequency range of microwave weaponry.

There are numerous mainstream articles writing this all off as just a “conspiracy theory,” there may well be more to it.

In conclusion, our results indicate that exposure to low-power radiations around 60 GHz does not cause any significant effect. However, they do not exclude a possibility of existence of effects or effects potentially induced by prolonged exposures. Moreover, we cannot neglect possible synergistic effects and eliminate the possibility that other exposure parameters, like frequency, exposure time, or field polarization may have effects on biosystems. Therefore, additional gene markers and radiation parameters should be further analyzed for an extensive investigation of the potential biological effects of millimeter waves.<sup>328</sup>

The degree of unfavourable effect of mmWaves depended on the duration of the radiation and individual characteristics of the organism ....<sup>329</sup>

### 5G Uses Same Frequencies As Pentagon's "Active Denial System" Crowd Control Weapons

The U.S. military is also already well-versed in 5G technology, having long utilised it as a non-lethal form of crowd control. The same 5G wavelengths utilised in the military's so-called Active Denial System, or ADS, are described as "weapons," seeing as how they penetrate the top 1/64th of an inch layer of skin when directed at human bodies.

U.S., Russian, and even Chinese military forces all utilise 5G as a crowd control weapon, which bodes ominous for its eventual release into local communities all around the world. This is why many such communities are fighting back, or at least they are trying.

Dr. Ben-Ishai from The Hebrew University of Jerusalem discovered as part of a recent investigation that human skin acts as a type of receptor for 5G radiation, drawing it in like an antenna.<sup>330</sup>

### 5G: Great risk for EU, U.S. and International Health!

Compelling Evidence for Eight Distinct Types of Great Harm Caused by Electromagnetic Field (EMF) Exposures and the Mechanism that Causes Them, by Martin L. Pall, Ph.D., Professor Emeritus of Biochemistry and Basic Medical Sciences<sup>334</sup>

Even weak electro-magnetic fields cause significant long-term damage:

The Biological Effects of Weak Electromagnetic Fields: Problems and solutions -- *Dr. Andrew Goldsworthy, retired lecturer from Imperial College London, renowned for its expertise in electrical engineering and health matters.*

Many of the reported biological effects of non-ionising electromagnetic fields occur at levels too low to cause significant heating; *i.e.* they are non-thermal. ... Virtually all of the non-thermal effects of electromagnetic radiation can be accounted for by the leakage of cell membranes. Most of them involve the inward leakage of free calcium ions down an enormous electrochemical gradient to affect calcium-sensitive enzyme systems. This is the normal mechanism by which cells sense mechanical membrane damage. ... Damage to the thyroid gland from living within 100 metres of a cell phone base station caused hypothyroidism. ... Inward calcium leakage in the neurons of the brain stimulates hyperactivity and makes it less able to concentrate on tasks, resulting in attention deficit hyperactivity disorder (ADHD).

Cell phone radiation damages DNA indirectly, either by the leakage of digestive enzymes from lysosomes or the production of reactive oxygen species (ROS) from damaged mitochondrial and plasma membranes. The results are similar to those from exposure to gamma rays from a radioactive isotope. Effects of DNA damage include an increased risk of cancer and a loss of fertility, both of which have been found in epidemiological studies. The effects of cell phone and WiFi radiation have also been determined experimentally using ejaculated semen. The results showed the production of ROS, and a loss of sperm quality and, in some cases, DNA fragmentation.<sup>335</sup>

### Influence of Ionizing Radiation on Exosome Composition, Secretion & Intercellular Communication

A large variety of vesicles is actively secreted into the extracellular space by most type of cells. The smallest nanoparticles (30-120 nm), called exosomes, are known to transport their cargo (nucleic acids, proteins and lipids) between diverse locations in the body. Specific content of exosomes and their influence on recipient cells depends primarily on the type of the secretory (donor) cell, yet several studies highlight the importance of environmental stress on which the donor cells are exposed. Ionizing radiation, which induces damage to DNA and other structures of a target cell, is one of well-recognized stress conditions influencing behavior of affected cells.<sup>336</sup>

We are bioelectric beings. These unprecedented synthetic signals are detrimentally affecting biospheric functions. This is an excellent source of worthy data on the subject. A detailed synopsis is [here](#).<sup>339</sup>

### Increased Radiofrequency Radiation and The Decline of Birds, Bees and Wildlife

Biologists have noted that wildlife are susceptible to harm from manmade ambient electromagnetic fields. Researchers are now attributing RFR from cellular telecommunications to be a contributing cause of bee “colony collapse disorder”, insect disappearance, the decline in house sparrows in London, as well as the steady deterioration of the world’s bird population with now than 40% of bird species under critical threat. Scientists note a serious lack of radiation monitoring and protocols to study the impacts and call for precaution in the placement of cell towers and further expansion of wireless broadband.<sup>340</sup>

There is at present no direct causation proven for 5G as a vector of COVID-19. However, there is massive direct evidence of the damaging effects of the electrification of our planet over the last 100+ years, on many levels in the biosphere.<sup>341</sup> Implementation of 5G will increase the damage to biological health on a planetary scale. In this perspective, it should be investigated as an indirect causative agent in the current situation.<sup>342</sup>

One of the potential uses for 5G will be the robotic AI monitoring of people via drones and “dogs” such as the Boston Dynamics robot Spot now being used to enforce “social distancing” in Singapore.<sup>343</sup>

## Conclusion

The conclusion is that one must keep an open mind. Consider the data presented here, a perspective-based snapshot of an evolving global crisis. Further research by everyone is promoted. One must be dedicated to awareness and vigilance in acquiring and assessing data. Calling people “conspiracy theorists” for simply investigating beyond the official narrative is simply a sign of a closed mind, especially when one can see from the limning of facts presented here that there is far more to the picture than a single deadly virus with a wanted poster that the world should be cowering in fear from, until saved by agenda driven uber wealthy people of questionable character.

The science is definitely not settled, on viruses, vaccines or EMF pollution. There is no doubt that the global lockdown has been perpetrated by very powerful people appearing to be involved in massive fraud and anti-human eugenics programs, contrary to numerous laws and moral ethics.
