GUERRILLAS AGAINST

1. [Rubikon: Digital publication openly against. From Germany. \(In German\).](#)
2. [Off-Guardian: Uncensored digital posting on people's comments. From England \(In English\).](#)
3. [Movement founded by Prof. Sucharit Bhakdi. Doctors and scientists for health, freedom and democracy. Anyone from any country can sign up to support this movement. As of May 26, more than 15,000 people have signed up. \[This is the page for it.\]\(#\)](#)
4. [Doctors for Enlightenment : 700 doctors in Germany who are publicly against.](#) You can see the doctors who have joined this research process in Germany so far. That in Spain there are hardly any doctors who say anything publicly (such as journalists or jurists or epidemiologists or geneticists), as you can see, it does not mean anything about the thing itself, and it does about how the Regime is suffered in an especially brutal way around here. And it is not that the measures they take here are the most extreme and cruel and bloody of which there is news and that is why no one speaks. It's the other way around:

when you don't talk about normal; when, for example, Universities and Education in general are so quiet and so at the service of Money (it is the same public money as private), it is when the Regime can be more cruel and deadly and when its media can fanaticize and deceive people more viciously,

5. [Extra-parliamentary Committee for the Investigation of the Crown \(ACU\)](#). Promoted by the German platform "Doctors for Clarification" (about 700 doctors), this publicly open committee aims to investigate the information and actions by governments and the media that are being suffered, inviting experts in Different materials. They say that: *"All citizens can make proposals to experts. The ACU spokesmen's table invites experts to the public presentation of evidence. Many experts have already accepted the invitation of the ACU. No one is given more importance than others, whether male or female, politically higher or lower, fat or thin. Everyone is invited to support and participate. With content and with help."*
6. **La Cuerda Loja (The Highwire)** , Del Bigtree's program. It can be found at these links: General [website](#) of the program. [Bitchute channel](#) where your videos can be seen after the sudden YouTube censorship. [Twitter Page](#) and [Facebook Page](#).
7. **Group "Sair de Casa" in Portugal**. This is the page of the group "Leaving home" on facebook, which is people against the confinement. There are more than 20,000 registered. And this is [the page on Telegram](#).
8. **UKColumn**. Site in England where journalism is clearly against.
9. **Youtube censors "Doctors for the truth" in Spain**. Along with the brutal censorship offensive in the US against Americas's frontline doctors and Del Bigtree, in Spain they have censored the videos of the Doctors for the Truth press conference. This is another link where you can see.
10. **Covidinfos.net (In French)**. It is a site in France that collects and reviews useful information against all this. This is how they are presented: "The site Covidinfos a été créé par une poignée de citoyens concernant the treatment catastrophiste de l'épidémie de Coronavirus en France, the character hautement anxiogène des informations presented dans les medias, leur unilatéralité, l'absence total , d'opinions ou d'informations contradictoires; l'absence tout aussi totale de mises en perspective des chiffres et des statistiques ... spectateurs ... "
11. **New "America's Front Line Doctors" Web Site**. After the furious attack of censorship on the part of the television mass-media and of Internet, the page of this association of doctors of the USA appears again.
12. **Dr. Peter C. Göttsche's Blog** , titled "Deadly Drugs and Organized Crime." His page Twitter [is at this link](#).
13. COUNTERPROPAGANDA channels, which continue to war with their translations and continue to censor and close the channels: **Telegram**: <https://t.me/counterpropaganda20> . **Youtube**: [Counterpropaganda 2](#) . **Youtube**: [Counterpropaganda 3](#) . **Youtube**: [Counterpropaganda 4](#) . **Facebook** . **Twitter** . **Lbry** . **BrandNewTube** . **UGETube** . **Bitchute** . **Altensored**: Videos censored on YouTube.
14. **Web "cvpandemicinvestigation.com" (In English)**. Site made by Andrew Johnson in England with great desire to disappoint. Above all, it collects every day entries on the network of all kinds.
15. **Site "Uncut-news" (In German)**. Swiss site where they collect news "from free and non-manipulated media". They put quite a few things.
16. **Youtube Channel of Argentine Epidemiologists**.
17. <https://t.me/resurgente2020> : Channel RESURGENTE 2020 of Telegram: information against.
18. Scabelum is the name of the association of Luis de Miguel Ortega, nurse and lawyer, which is doing many things against it: talking and interviewing people and also actions as a lawyer in Spain. Here are some of their web sites: [Web Page](#) , [YouTube Channel](#) , **Channel Telegram**: t.me/scabelum_acus **Scabelum TV**. Scabelum TV information channel that will start operating shortly. One can sign up with an email to be notified.
19. **Reiner Fuellmich Website (In German)**.
20. **Site "Children's Health Defense" (In English)**. Site of the organization founded by Robert Kennedy that especially attacks vaccines and the damage and deaths they are doing to children. It has a lot of information in general and also from scientific studies.

1. [Message from Robert Kennedy \(Now with Spanish subtitles \)](#) . "I wait for you at the barricades."

21. **Doctors for Truth in Spain**.
22. **STOP VACUNAS Facebook Group**. They are hiding it in search engines. They add a lot of information every day. His Telegram group is <https://t.me/grupoSTOPVACUNAS> , although they don't put almost anything there, unfortunately. Their website is <https://stopvacunas.wordpress.com/>
23. Dr. Bodo Schiffmann, en route through Germany against the Regime. Youtube censors and deletes its channels. These are some of their channels: [Channel in Bitchute](#) . **Telegram Channel**: https://t.me/alles_ausser_mainstream .

REBELLION IN SERBIA

- **EuroNews reports**. Despite the biased way of presenting the news, it seems that the rebellion is being serious.
- The government [has reversed the new confinements](#)
- Here images [of the attempted assault on parliament](#).

- [Another video with information in English](#). The information is seen to try at all costs to say either that the rebellion is not due to the confinement or that it is because the pandemic has not been "managed well", but at the same time they cannot stop reporting that this is why that people have taken to the streets: because of the new confinement decreed (already pushed back, because of what they say here).
- [The protests seem to continue today](#). Video uploaded at 5 pm on July 9. Lots of people.
- [Information from June 9](#). The protests against the confinement continue. There are comments in these videos saying that it is not against the confinement, comments in English: against the dictatorship, they say. The journalist himself says that they join the protests against the enclosure of other things and football ultras.
- [Images of the mogollón of people in rebellion](#). Nothing so clear in the news of the Regime, which focuses a lot on those who throw stones, but they do not put an image as simple as this, where it is seen that they are not "ultras soccer teenagers."
- [BELGRADE yesterday July 9: they rebel against the ban on gathering](#). You can see the images of tens of thousands of people who do not accept the ban on gathering. They don't want more prison.
- [Mass demonstrations continue in Belgrade](#). One minute home video showing the streets of Belgrade. It seems from July 12.

PROTESTS IN BULGARIA

- [Protests in Sofia](#). Images maybe from July 11 or 12.
- [Protests in Sofia](#). Images of July 10.
- [July 14: Protests continue in Sofia](#).
- [Protests continue in Bulgaria](#). This may be from July 31st.

PROTESTS IN SPAIN

- [Speech by Dr. Ángel Ruiz Valdepeñas at the June 11 demonstration \(In Spanish\)](#). Among other things, you can read in this link the speech of the good Dr. Ruiz Valdepeñas.
- [Speeches on July 11 in Madrid \(Video in Spanish\)](#). Of the few people who decide to go out (in Cibeles) and speak out against it. They are an example. [And here I walk with a megaphone through Gran Vía and Callao on the same day](#).
- [Protests in Madrid on August 16](#).
- [Protests in the Canary Islands on August 16](#).
- [Madrid to the streets!](#) Poster that is on the net today. I don't know, but if they don't even complain when they are being killed in the hospitals, and if they obediently take the children to be tortured in the schools every morning: Why would they take to the streets because Madrid is ruined? Out in the street and let the sun rise wherever you want! And let whoever be ruined!
- [Protests in Bilbao, November 21](#). A protest in which they speak out. You have to speak and reason in public against what those in command say. Because, as we know, they have banned the public, the common, the street, where anyone speaks, where anyone comes out, where anything is heard, the unexpected. That Money hates and forbids it. The unexpected, those above, is the only thing they really fear. The other: the plans, the forecasts, the Future ... that is the kingdom of the Lord. Nothing will come from there but death.

PROTESTS

- [Images of demonstrations in various US sites against the confinement](#). The people who speak say that it is like a flu and that it goes against the freedom of the people.
- [Ring in the street of people united against the confinement in Germany](#). The government stops them.
- [Protests in California against the closure](#). Youtube warns below the video that the channel is fully or partially financed by Russia! (this grotesque has no limits)
- [August 1: more than 1 MILLION people demonstrate in Berlin \(Video\)](#). The police break up the demonstration by preventing speeches. The official media say only "thousands of people".
- Two images of Berlin on August 1: [Photo 1](#) and [Photo 2](#).
- [Demonstration in Berlin on August 1 \(Video\)](#). This was a live broadcast of the demonstration. It was massive.
- [The Regime press lies about the number of participants](#) in the August 1 demonstration in Berlin. They have been systematically saying that there were between 10,000 and 20,000 people, and it seems that it is not outrageous to say

that there were more than 1 million people demonstrating against the Regime in the streets. In this article (in English) you can see the "retouched" photographs that the successive versions of the newspapers put to try to pretend those 20,000 participants that they say. It seems that in Germany, with a confinement and measures in general much less strong than in Spain, people no longer massively believe all this.

- [Demonstration in Berlin on August 1 \(Video\)](#). One hour of images in 4 minutes. Video to deny the figure of 17,000 protesters that the regime's media gave.
- [Protests in Seoul on August 15 \(Pictures\)](#). There is also a newspaper entry here [that reports this](#).
- [Becoming like children](#).
- [Protest in Ireland \(Video in English\)](#). It is from the 22nd of August.
- [A court annuls the ban on the demonstration](#) tomorrow August 29 in Berlin. The judge says that the protesters should take care to keep their distance (but not to wear masks).
- [Robert Kennedy Jr: speech in Berlin \(subt. In Spanish\)](#). In the demonstration of yesterday August 29 in Berlin (that they say there were between 1 and 4 million people) Kennedy Jr. took the stage to give this speech. It says things like this: "Governments love pandemics. And they love pandemics for the same reason they love wars: because it gives them the ability to impose control over populations that populations would not otherwise accept."
- [Demonstration in London on August 29](#). Speaks in Trafalgar Square, among others, the virologist Dolores Cahill.
- [David Icke's speech in London on August 29 \(In English with Spanish subtitles\)](#). I scream for freedom. Too bad he believes too much in people who rule in the shadows (when those billionaires are bullies who don't paint anything) and that you see a lady on stage ordering people what to do, like on TV.
- [Dr. Schiffmann and Dr. Schöning speak on August 30 \(In English with Spanish subt.\)](#). Bodo Schiffmann and Heiko Schöning: August 30th. They speak after the Berlin demonstration on August 29.
- [Protests in Greece on September 6](#). While in Spain there are children who have remained confined since March because of the fear that has been put in their parents and while the unions plan protests to demand even more sanitary control measures in schools and institutions, thousands of Greeks took to the streets the day September 6 in Athens, Thessaloniki and many other cities to protest against the mistreatment of children in schools due to the pandemic. What the posters of the convocation said, which coincides with the banners and the things that people shout in the video, was: "Demonstration throughout Greece against barbaric measures in schools. Our children do not touch each other. . No to the mandatory tests. No to the mandatory mask in school. "
- [Protests in Warsaw on September 11](#).
- [Montreal: March for Freedom on September 12 \(11-second video\)](#).
- [It seems that Argentina is getting fed up with the new normal](#).
- [Dr. Heiko Schöning arrested in London](#) on September 26, in the peaceful protest in which he had been invited to speak. Dr. Schöning is one of the German spokespersons for the ACU Committee for the investigation of government measures against people by the virus. They don't want anyone to talk. They have hijacked the streets and any attempt at public life outside the orders of the Regime.
- [Protests in Germany](#). "The requirement to wear masks in classes in Baden-Württemberg [one of the 16 federal states of Germany], abolished by mass protests."
- [Protests in Toronto. October the 17th](#). People on the street! Posters that say things like "Freedom is everything."
- [October 18: Protests against the Regime in Prague](#). People on the street.
- [Naples rebels against a new confinement. Naples: Freedom!](#) They refuse to be locked up. "[All Naples raised](#)."
- [In Naples they go out on the streets: October 23rd](#). People take to the streets against the Regime. [The police tear gas](#) at people in the street.
- [Bratislava protests on October 17](#). On the street!
- [October 23: Protests in Melbourne](#).
- [Protests October 23 in London](#).
- [In Portugal: "Freedom!"](#) Pela Verdade Journalists Page.
- [Barcelona October 26: FREEDOM! Here more images](#).
- [Protests in Catania](#).

- [Protests continue in Milan](#). Molotovs are thrown at the police. [More images](#).
- [The protests in Naples continue](#).
- [Paris: Freedom!](#) More images [here](#).
- [Barcelona: Freedom!](#)
- [Barcelona: The people in the street!](#) 30th of October.
- [Rebellion in Burgos \(Gamonal\)](#) or is it something planned by those above? 30th of October. [A video](#) , [another video](#) and [another](#).
- [Protests in Bergamo](#). Shouts of "freedom", among others less accurate: for example, that of "for our Future". The Future has always been one of those who rule and now too. Not for the Future (which does not need it more than Money): The cry is against what they are doing to us now. Against the torture of now. Against that comes the cry of "NO".
- [Demonstration in Leipzig November 7](#). Despite attempts by the mayor and the police at a ban, a higher court in extremis has said that these bans are illegal, against the ruling of a lower court, and the demonstration is taking place.
- [Leipzig November 7: People who don't believe it, on the street](#).
- People in Leipzig on November 7 stay on the street: [Crowd on the street](#). After the demonstration dissolved, [another spontaneous demonstration by the forbidden route](#). People are still on the street.
- [Victoria Park in London](#). Images of November 8: People skip the confinement.
- [Manchester on the street: November 8](#).
- [Tractors block the road in Holland](#). No media reports.
- [Protests in Bonn November 14](#).
- [Copenhagen, November 13](#). Demonstration against the "law of epidemics". They seem to have managed to get him to retire. This law seeks: (1) That people infected with dangerous diseases can be subjected to medical examination, hospitalized, treated and forcibly isolated. (2) That the Danish Health Authority has the right to define groups of people who must be vaccinated in order to contain and eliminate a dangerous disease. (3) That people who oppose the foregoing may, in some circumstances, be coerced into physical arrest, the police being able to collaborate in this.

REVOLTS

- [Revolt against the confinement by covid in the Moria refugee camp ends in a fire that destroys the entire camp](#). By Virginia (In Spanish).

EPIDEMIOLOGISTS, VIROLOGISTS and OTHER SCIENTISTS

1.- KNUT WITTKOWSKI

1. [Epidemiologist KNUT WITTKOWSKI. April 10: Interviewed by Del Bigtree \(Subt. In Spanish\)](#). This researcher has spent 20 years at the Rockefeller University in New York as Head of the Department of Biostatistics and Epidemiology. Before that, he spent 15 years working with Klaus Dietz, one of the world's leading epidemiologists. He says that the confinement can only serve to lengthen the epidemic and that there is a second wave in the autumn, which will mean many more sick people. The confinement is totally inefficient, prevents group immunity and goes against people's mental health. Confirm that it is an epidemic like so many flu. Schools must be opened immediately and normal life returned. [\(Original link from Del Bigtree. Many comments.\)](#)
2. [Epidemiologist Knut Wittkowski. Interviewed by John Kirby April 1 \(In English with Spanish subtitles\)](#) --- CENSORED after more than 1 million views. They don't want a voice to contradict their lies. -> [HERE ANOTHER LINK](#).
3. [Epidemiologist Knut Wittkowski. April 12: Interviewed by Punkt. Predarovic \(In German\)](#). Again he says that nothing happens different from other years, that most epidemiologists are of that opinion, but they do not speak; He says again that the most important thing is that the children go back to school, that any confinement ends, and as with the flu, older people stay more at home. And in New York? (He is in New York): Everything normal, the hospital has been set up in central park and the figures follow the course of every year. And in Spain and Italy? The same, the usual figures for all years, nothing special .--- REDACTED by youtube ... [ANOTHER LINK](#).

1. **Video of Prof. SUCHARIT BHAKDI from Germany. (In German with English subt.).** This professor directed the Institute for Microbiology and Medical Hygiene at the Johannes Gutenberg University in Mainz for 22 years. He is one of the most renowned medical researchers in Germany. He says the lockdown measures are grotesque, outrageous and downright dangerous. The confinement is a collective suicide. (Note that the confinement in Germany is much, much softer than in Spain). REDACTED: **Here's another link** . Here a good part of the interview with subt. in Spanish. REDACTED: **Here's another link** .
2. **Letter from Prof. Sucharit Bhakdi to the German government. (Translated into Spanish).**

4. **Video of Prof. Sucharit Bhakdi explaining the previous letter. (In german with english subtitles)**
5. **Dr. Sucharit Bhakdi examines and analyzes the very important results made public by Dr. John Ioannidis (Video in German).** This is the summary they make in the presentation of this video: *"We hear every day the new numbers of those infected by corona, which distress people and are the foundation for the current confinement. But the numbers say nothing about how dangerous the virus is, and that is what is really important. Milena Preradovic talks with Prof. Dr. Sucharit Bhakdi, a specialist in Microbiology and Epidedemiology of infections, about the effective danger posed by SARS-CoVid-2. He presents the new studies by Professor John Ioannidis from Stanford University in the USA and says: This corona virus is not so dangerous as to justify a lockdown, and concludes that the development of a vaccine is not the solution. "* REDACTED: **Here is another link and with subtitles in Spanish** .
6. **Prof. Sucharit Bhakdi interviewed on April 29 by Servus TV (In German now with Spanish subtitles: convenient to see).** "Professor Bhakdi explains that politicians and the media have instilled intolerable fear and carried out an irresponsible campaign of disinformation. According to Professor Bhakdi, masks are not needed by the general population and can in fact be harmful sources of infection. The current situation has been created by politicians themselves and has little to do with the virus. Furthermore, it says that the coronavirus vaccine is unnecessary and dangerous, as was already the case with bird flu. The World Organization de la Salud has never been held responsible for its many wrong decisions over the years (Note: The video was temporarily deleted by YouTube). " (Translation of the review of the website "A swiss doctor"). **Here is another link . And here another one.**
7. **Prof. Bhakdi interviewed by ACU (In German with Spanish subt.).** REDACTED: **Here's another link** . Long interview with Prof. Bhakdi in which he talks especially about the vaccine and immunity. It was done around August 8. The video is presented like this: "Why is 80% of the population in European countries sufficiently protected against Sars cov 19? 99% of those under 65 are immune. A vaccine represents only risks and no use. Vaccines gene-based are highly dangerous for all kinds of people. " These are important links from the scientific literature (in English) given by Professor Bhakdi himself in the video presentation:

Lecture titled "Immunity and Vaccination" recorded by Professor Sucharit Bhakdi for a medical congress held in Budapest on August 21, 2020. (Translation by Ricardo). "The latest infection figures are announced every day. Is there really cause for concern? Is a vaccine the salvation in the fight against COVID-19 - as announced by the government? In Hungary, on August 21 a meeting of doctors and scientists in which I was asked to give a presentation on immunity and vaccination. This was the first time that experts with different opinions had the opportunity to discuss among themselves. My personal opinions are summarized in this film. The conference is made with the support of our association MWGFD, here and on the association's website it is made available to the public. As a supplement we have revised the subject for the next edition of our book. The new, considerably expanded text on the topic of vaccination / immunity can be downloaded free of charge from the website of our publisher (Goldegg). 3.- WOLFGANG WODARG

1. **IMPORTANT: Video of Dr. WOLFGANG WODARG (In German with Spanish subtitles).** This doctor and epidemiologist was president of the Health Council of Europe. In 2009 he managed to launch an investigation into what happened to the role played by pharmaceutical companies in the panic campaign unleashed over the influenza A virus. Now he is also fighting to denounce this false pandemic, with very precise attacks: 1) There are no different number of deaths than in other flu seasons. 2) Take a closer look at the tests and how they don't work. 3) The way of accounting for deaths from this virus is falsified at the root: it says that you have to distinguish between dying WITH the virus and dying FROM the virus. 4) The mortality of the virus is unknown. 5) Give an explanation of how this new virus was discovered and how this world information bomb was created, while continuing to attack experts in the service of Money. [Nickbakhs S. et al. "Virus-virus interactions impact the population dynamics of influenza and the common cold" (2019) Study that Wodarg uses in the interview.]
2. **Wolfgang Wodarg: The solution to the coronavirus problem is to isolate the alarmists. (Translated into Spanish.)** Labeled at the beginning of the article by the newspaper that publishes it as a kind of heresy and as if the author was already dead or as if it were with his publication to document an unprecedented madness that, in any case, is already invalid.) [Here the same article in Italian.](#)
3. **Wolfgang Wodarg: What does the test measure? (Translated to Spanish).**
4. **Wolfgang Wodarg: Fake corpses pave the way for Covid statistics. (Translated to Spanish).**
5. **Video of Wolfgang Wodarg sent to the demonstration against the lockdown in Stuttgart on May 16 (In German).** The video begins with a sign that reads "It has never happened in history that the healthy and sick are quarantined." He begins his message like this: "Hello, people from Stuttgart. How good that you are so many and that you come together again to defend our freedom, reason and so that this senseless confinement ends at once. Thank you with all my heart."
6. **Stefan Noordhoek's interview with Wolfgang Wodarg (In English).** A long interview where Wodarg gives a fairly detailed view of the false pandemic: what are its precedents (other pandemic attempts that he himself dismantled years ago), how this event started now, clinical clarifications on flu and respiratory diseases and many more things. They speak in English and also the automatic subtitles work quite well.
7. **Newscast of 2009: a similar attempt with the Flu A.** Wolfgang Wodarg also denounced the thing then, [AS NOW \(you can see it by clicking here\)](#).
8. **Dr. Wolfgang Wodarg and Adelheid von Stösser (Video in German with Spanish subt.).** They talk at the end of July about the old people, the attendance and how they have died.
9. **Dr. Wodarg talks about pregnancy (In German with Spanish subt.).** He says they are forcing mothers to give birth with a mask and forbidding fathers to be in labor.
10. **Dr. Wolfgang Wodarg "Where is the second wave" (In German with Spanish subt.).** 2 minute video of one of the sessions of the ACU (Extra-Parliamentary Investigation Commission in Germany). It is very clear: there has never been a second wave of coronavirus.

4.- JOHN IOANNIDIS

1. **Video of Dr. JOHN IOANNIDIS. March 23 (In English with English subt.).** John Ioannidis is Professor at Stanford University School of Medicine. He is Professor of Disease Prevention and Professor of Research and Epidemiology, as well as of Statistics and Biomedical Data Science. He is one of the most cited scientists in the world literature. He is Co-Director since 2013 of the Stanford Meta-Research Innovation Center. He is the Editor-in-Chief of the European Journal of Clinical Research since 2010. His research article "Why most of the findings published in Research are false" is the most downloaded article from the US Public Library of Science. John Ioannidis says in this video, that the infection rate is NOT KNOWN, that the death rate of the virus is NOT KNOWN, but he gives three examples of general sampling that can guide us: 1) Iceland 2) A cruise ship and 3) the Italian town of Voè. In the Icelandic sample, mortality is about half that of influenza. On the ship, in the style of the flu (the mean age was 65 years) and in the study of the city of Voè, the same: comparable to the seasonal mortality of the flu. He says he is afraid that medieval medicine will be made: that measures will be applied to the entire population around the world with closed eyes. REDACTED by Youtube --- comparable to seasonal flu mortality. 2. **Dr. JOHN IOANNIDIS. 17 APRIL. VERY IMPORTANT (In English with Spanish subt.).** Dr. John Ioannidis of Stanford Univ. Presents the results of the serological study in a three-minute video: The coronavirus has the same mortality rate as the flu. Below is the full video from the same date, with Spanish subtitles.
 - **Dr. John Ioannidis. April 17th. (In english with subtitles in spanish).** Dr. John Ioannidis of Stanford Univ. Presents in detail some of the latest studies that have just been published. Two examples: 1) The consequences of the lockdowns are devastating compared to the virus. 2) The probability that someone under 65 years of age will die from this virus (during the time of the epidemic), is less than the probability that they will die when they drive one day from home to work.

5.- MIKKO PAUNIO

- Epidemiologist MIKKO PAUNIO. "Has SARS-CoV-2 Driven the Whole World Crazy? Rejected MedRxiv and PLOS Medicine Paper. Dr. Mikko Paunio, Master of Health Sciences (Johns Hopkins Bloomberg Epidemiological School of Public Health) , is an adjunct professor of General Epidemiology at the University of Helsinki, and a civil servant in the Ministry of Social Affairs and Health. This is the abstract with which the article begins: *that his team "had not seen evidence that a large number of mild cases of the new disease called Covid-19 escaped detection." He also assured that SARS-CoV-2 would be roughly as lethal as the Spanish flu. In this article I present irrefutable evidence of the extremely rapid (though undetected) spread of the SARS-CoV-2 virus. So rapid has the spread been that New York has probably already achieved group immunity, and that this is the case is what would explain (more than the closure) the recent abrupt end of the outbreak. The world economy must reopen as soon as possible. The cure now appears unequivocally worse than the disease. " He also assured that SARS-CoV-2 would be roughly as lethal as the Spanish flu. 6.- JOEL KETTNER

- Audio of an interview with Dr. Joel Kettner on Canadian radio. (In English). Very good example of how the media brings its purpose of what the interviewee (in this case an epidemiologist) should say. The journalist cuts to the expert who begins to speak directly against this whole matter: The Dr. begins by saying that he has lived through 30 epidemics like this and nothing has ever happened in the media. The journalist cuts it once to try to redirect the interview within what is commanded, asking what he had planned: if "social distance" is very effective or not, and when - as he should do - the Dr. attacks again to the root thing, the journalist cuts him off and dismisses him abruptly.

7.- JAY BHATTACHARYA

- Dr. JAY BHATTACHARYA. April 17th. An interview by Peter Robinsons. Dr. Jay Bhattacharya is Professor of Medicine at Stanford University. In a March 24 article in the Wall Street Journal, he questioned the premise that "without lockdowns and quarantines, the coronavirus would kill millions of people." After sampling 3,200 non-ill citizens, he says he finds antibodies to this virus in many people who have not had symptoms. Thus, he says that the death rate is roughly like that of the flu: about ten times less than the assumptions of the WHO, which are being used as a scientific excuse for the confinement of people.
- Dr. Jay Bhattacharya. March 27th. An interview by Peter Robinson (In English). Very cautious when speaking, he recognizes that, at the moment, he does not have enough data to know the exact mortality of this virus, but he cannot help saying that THEY do not have them either: See above interview of April 17 with new results .

10.- STEFAN HOCKERTZ

1. [Immunologist and Toxicologist Dr. STEFAN HOCKERTZ, interviewed on the radio \(German audio with German transcription\)](#). Prof. Hockertz says: "This virus has the same pathological course as respiratory diseases and in that it is comparable to influenza. Its course is comparable to influenza and especially - what is more important to us - in its rate of mortality. In the flu we have between 0.5% and 1%. And this virus also reaches those magnitudes. In other words: We are dealing with a corona virus that has roughly the same danger as the flu. Only now we have put more seen in it; we look at it more closely and that is why the thing catches our attention."
2. [Interview with the immunologist Prof. Stefan Hockertz about the vaccine \(Spanish translation\)](#). This interview on the radio was granted by Professor Hockertz on July 8 ([You can listen to it here](#)). MC has dedicated himself to translating and writing it so that anyone can find out about these important things. It is priceless information that comes from an immunologist and tossychologist who believes that vaccines, when they work, are good drugs that save many lives.
3. [Hockertz et Walach: "What association do political interventions, environmental and health variables have with the number of Covid-19 cases and deaths?" \(In English\)](#). Technical article entitled "What relationship do political interventions, environmental and health variables have with the number of cases and deaths of Covid-19?". This is the Summary that the article brings to the beginning:

***Background and questions** : It is not clear which variables contribute to the variance in Coronavirus disease (Covid-19) related to deaths and cases of Corona-2 virus (Cov2). We wanted to know what is the contribution of public health variables, in addition to those of health, health and population systems when explaining the cases and deaths of Covid19.*

***Method** : We model the relationship of several predictors (health system variables and population and population health indicators) together with variables that indicate the political measures imposed (school closings, border closures, lockdowns) in 40 European countries and outside Europe, using generalized linear models and minimized information criteria to select the simplest and most direct models that best fit.*

***Results**: We have linearly adjusted two models with logarithmic variables linked to output variables of a Gamma distribution (CoV2 cases and deaths related to Covid-19, standardized in the population). The CoV2 cases were the best predicted with the number of tests ($b = 2 \cdot 10^{-7}$, $p = 0.00005$), life expectancy in a country ($b = 0.19$, $p < 0.000001$), and the closure of borders ($b = -0.93$, $p = .001$). The standardized deaths of the population were those that were best predicted with the time the virus had been in the country ($b = 0.02$, $p = 0.02$), life expectancy ($b = 0.2$, $p = .000005$), smoking ($b = -0.08$, $p = .00001$) and school closings ($b = 2.54$, $p = .0001$). The model fit statistics and model adequacy were good (model 1: $\text{Chi}^2 / \text{DF} = 0.43$; model 2: $\text{Chi}^2 / \text{DF} = 0.88$).*

***Discussion and interpretation** : Only a few variables were good predictors. Of the public health variables, only border closures had the potential to prevent cases, and none was predictive in preventing deaths. School closures, likely as a proxy for social distancing in seriously ill patients, were associated with increased deaths. [In other words, in places that have closed schools, there have been more deaths].*

***Conclusion** : The pandemic seems to run its course autonomously and only the closure of the borders has the potential to prevent cases. None of them contribute to preventing deaths.*

The danger of the virus is around that of the flu. In a more recent interview, Streeck believes that the death rate is probably even lower than what is said in this study (he says it may have an IFR of 0.2%)

14.- JOHN LEE

- [Dr. John Lee: \(In English\)](#). Dr. John Lee is a professor of pathology. In this article, among other things, he says: (1) That the cases of death from the virus are overestimated. It is one thing to die with the virus and another due to the virus. (2) That mr. who made the famous Imperial College prediction that in the United Kingdom half a million people would die (from this information the confinement of people was established in the country), and that later the figure was lowered to 20,000 dead, has now said that two-thirds of those deaths would have also occurred without the virus. (3) That the rate of infected has been greatly underestimated. (4) That the mortality rate of this virus is at the same level as that of influenza or less.

15.- GIULIO TARRO

- [Virologist GIULIO TARRO. Written interview \(In Italian\)](#). "*Interviewer: You have stated that you consider the real number of infected in Italy at least 4 or 5 times higher than what the Government has said. - Dr. Tarro: I want to specify that my estimate is based on the interpolation of the referred data to those infected in respiratory viral epidemics verified in Italy in recent decades. From this it follows that the death rate of Covid-19 is considerably less than 1%: a cost also made in a study by colleague Anthony Fauci, of the National Institute of Allergy and Infectious Diseases, based on information focused on 1099 laboratory-confirmed Covid-19 patients from 552 Chinese hospitals. This suggests that the general clinical consequences of Covid-19 may be similar to those of a severe seasonal flu.*"

- [Epidemiologist JAYAPRAKSH MULIYIL. Interviewed about India \(In English\)](#). He says that the virus cannot be contained and that what must be done is to spread as much as possible; and advises the weakest to beware of catching it.

17.- JEAN-DOMINIQUE MICHEL

- [Anthropologist JEAN-DOMINIQUE Michel, specialist in Public Health. Interviewed \(In French\)](#). It begins by stating that this is no more dangerous than the winter flu of every year. Most of the dead are political dead, because the state and the media have created them with a pure propaganda campaign, where they have been preventing, hiding and persecuting the voices against this official error. He says that "the characteristic of a scientific theory is that it can be refuted (...) The abc of intelligence is to verify if the hypotheses resist in their confrontation with the facts, and from the beginning we are trapped in the same absurdity (...) When everything confirms that the decisions have not been good and that better ones should be taken urgently, they are unable to recognize this fact and correct the shot. It is unfortunate (...) There is too much weakness of thought to find appropriate responses (...) I feel an ethical decline (ruin), but also certainly intellectual in our civilization (...) We cannot first generate a psychosis in people and then hope that they think reasonably (...) It is monstrous (...) the aberrant political decisions that the rulers continue to justify through thick and thin. (...) The fundamentals of scientific production in the medical domain is falsified. (...) People die because what has been done has been done, not because of the virus. ") The fundamentals of scientific production in the medical domain is falsified. (...) 18.- IANG DETLEV KRÜGER

- [Virologist Prof. IANG DETLEV KRÜGER. Interview of April 25 \(In German\)](#). These are some of the things he says in the interview: "It is said that the waves of corona and flu should not be compared. However, they can be compared in many things, both in the way viruses are transmitted and in the group of risk, to which in the flu we must add pregnant women and children. And the fact is that every year, on average, we have more deaths from flu than there are until now from corona, at least in Germany. " (...) "With the protection of the mouth and nose [masks], it is intended to make believe in a Security that there really is not, and rather it is a risk for other infections when staining. 24.- CLAUD KÖHNLEIN

1. [Dr. Claud Köhnlein is a specialist in internal medicine. Radio interview \(audio in German\)](#). "Dr. Köhnlein affirms in the interview that the disease process can be compared to a mild flu. Between 80-90% of those infected would have no symptoms or would have mild symptoms. Therefore, locking up an entire country is totally disproportionate and counterproductive. At the end of the day, measures against the virus do more harm than the virus itself. "
2. [Interview with Dr. Köhnlein \(video in German\)](#). "At first I did not suspect anything bad when I heard that there was a virus in China. But then things became violent, and now we are locked up, no one can communicate with another, we would say. Measures hitherto unknown. 3. [Interview with Dr. Köhnlein \(video in German with English subt.\)](#). Very interesting because it talks about the treatment of a patient (perhaps a normal way of acting, he says) where it says that the treatment itself is what kills the patient. He talks about vaccines and his big business. There is no new disease and you don't even think there is a new virus. What to do then?: Stop testing and return to normal life. 25.- DOLORES CAHILL

- [The virologist Dolores Cahill, professor at the University of Dublin explains very well what it is about](#). They interview her on the "Gran Torino" channel. Explica: How does a vaccine that works (gives the example of chickenpox). Why have they not been able in 17 years, since it appeared in 2003, to have a vaccine for human Corona-1. He speaks of a very possible interference of influenza vaccinations with the virus of now (which makes the disease much more serious in those vaccinated in certain campaigns). The difference that Corona viruses have from each other. How these viruses and flu viruses circulate around the world. What happens in a specific person in whom the virus enters (the cycle of the virus, with the appearance of two types of antibodies: first IgM and then IgG). How long these antibodies are in the blood afterwards. How then is one immune for life to this virus. It explains very well the types of tests that there are: He talks about the PCR tests and the antibody tests (and suspects that the antibody tests that are now being used are also positive for the human Corona virus of the year 2003, that is, it is difficult that there are specific tests for the antibodies of the Corona-2, because it takes months to make them: it is the field where she has worked the most, that of antibodies). It explains how the immune system deteriorates with isolation, lack of sun and especially stress, and how the confinement of people is causing (in addition to any other psychological consequences, suicides, depressions, etc.) direct deaths on the people. Of course, what is concluded is that the confinement must end immediately. In addition, it also talks about the disease itself and the symptoms (if any) and the ways to proceed in terms of treatment; speaks highly of hydroxychloroquine pills. He does not allow the interview to end without once again threatening the political leaders, ministers and presidents, that the deaths due to not ending the confinement should fall into his account, and he offers to support the people, who are for that (he says) Universities and those who work in them.
- [Virologist Dolores Cahill, Professor at the University of Dublin speaks with Del Bigtree](#). Challenge the scientists who defend the closure to a public debate against it. Give a deadline until May 25 to end the confinement, otherwise it will begin to file complaints with those responsible for causing unnecessary deaths. 26.- DIDIER RAOULT

- [April 14: Professor Didier Raoult interviewed \(In French with Spanish subtitles\)](#). He says that this epidemic has no special impact on the life expectancy of the French. That there have been much worse flu epidemics, for example in 2017. He talks about the very good results in the treatment of the hydroxychloroquine disease, and how it seems that the poorest countries do better with the old and practically free medicines And the richest, who the pharmaceutical industry always imposes new things on them, seem to be doing worse. He is surprised at the campaign against the use of hydroxychloroquine, especially accusing it of side effects and toxicity, when it is one of the most prescribed general drugs in the world. He speaks very badly of a scientific article that tries to defend a drug: Remdesivir, and says that it seems to be the work of a writer who has been commissioned, without any evidence of biological, medical, virological data, and especially without any comparison. Although it seems that the drug itself does not work, however, since the WHO spoke well of it, it has served for the pharmaceutical company to have astronomical profits on the stock market.
- [Professor Didier Raoult interviewed \(In French with Spanish subtitles\)](#). He talks about several things, but the most remarkable thing is that he says that epidemics are a mystery. It is not known why, but the infections disappear without infecting the entire population. And it always is.
- [May 26. Interview with Didier Raoult on SUD Radio \(Video in French with Spanish subt.\)](#). Dr. Raoult talks about censorship; falsified studies; global campaigns against medicines that work; of the pharmaceutical companies that own the world's leading scientific publishers and more.

from the virus, hospitalization time and viral load. For a ridiculous price (not like the drugs that drug companies are promoting - like Redemsivir, which has zero decrease in deaths and costs \$ 4,000).

27.- JUDY MIKOVITS

- [Robert F. Kennedy, Jr. presents Dr. Judy Mikovits, her discoveries and the reaction against her from power \(Video in English\)](#). "Dr. Mikovits entered the NIH [National Institute of Health] in 1980 as a post-doctoral researcher in molecular virology at the National Cancer Institute where she began a 20-year collaboration with Frank Ruscetti, a pioneer in the field of retro -virology. Helped Dr. Ruscetti isolate the HIV virus and link it to AIDS in 1983. His NIH boss, Anthony Fauci, delayed the publication of that critical article for 6 months to get his protégé Robert Gallo to copy it, publish The delay in mass HIV testing allowed AIDS to spread around the globe and helped Fauci achieve a promotion to director of the NIAID [National Institute of Allergy and Infectious Diseases].

In 2006, Dr. Mikovits became director of the Whittemore Peterson Institute for Neuroimmune Diseases and collaborated with Dr. Ruscetti in the search for the cause of Chronic Fatigue Syndrome (CFS), which suddenly became an epidemic in the 1980s. The male-dominated medical community relegated CFS to a psychosomatic "yuppie flu" caused when frail women broke down in the jobs of big companies.

Dr. Mikovits found that 67% of affected women carried a virus - which she called XMRV virus: xenotropic virus related to leukemia in mice - which appeared in healthy women only 4% of the time.

XMRV is also associated with prostate, breast, and ovarian cancers, leukemia, and multiple myeloma. Many women with XMRV had children with autism.

In 2009, Drs. Mikovits and Ruscetti published their explosive findings in the journal Science. But the question remained: how did XMRV get into people?

Other researchers linked the first outbreak of CFS to a polio vaccine given to doctors and nurses that led to the "Los Angeles County Hospital Epidemic of 1934." That vaccine was grown in powdered mouse brains. Dead animal retroviruses can survive in cell lines and permanently contaminate vaccines.

Studies by Dr. Mikovits suggested that the XMRV virus was present in the MMR [MMR [MMR vaccines against measles, mumps and rubella], Polio and Encephalitis given to American children and soldiers. XMRV is so dangerous that the mere presence of mouse tissue in a laboratory can contaminate other tissues in the same room.

Dr. Fauci ordered Mikovits to keep his mouth shut. When she refused, he illegally confiscated her workbooks and hard drives, fired her as a government worker, and deprived her of NIH grants, thus ending her scientific career. XMRV is still in American vaccines. "

- [Virologist Judy Mikovits briefly talks about her career in an interview prior to the documentary Plandemic \(In English with Spanish subtitles\)](#).
- [Plandemic: the virologist Judy Mikovits speaks in this documentary \(In English with Spanish subtitles\)](#). It assumes an origin manipulated in the laboratory and related to vaccines. Whether it was intentionally released or escaped, you don't know. He says that any vaccine for this virus will be destructive. They have failed in many decades to create a vaccine for an RNA virus. It is seen that it is close to the thing; who knows very well what things are done, what institutions, etc. Speaks clearly how Science is at the service of Money.
- [Dr. Judy Mikovits responding to criticism surrounding the documentary "Plandemic"](#). "Judy Mikovits responds to criticism of the documentary Plandemi". [Here it is also in two parts with English subtitles: [Part 1](#). [Part 2](#).] Very interesting explanations from the Virologist Judy Mikovits. It tells very well the work that is done and how it is done in these virological laboratories. He talks about the immune system and how the introduction of strange viruses and retroviruses into it through vaccines and transfusions is the cause of many deaths and diseases. It seems like the most reliable and first-hand information you can find. Talk to the heart of all this (and not hearsay). It is normal that they have come for her and have defamed and discredited her for no reason: just for speaking out.

2. [Interview with Professor María José Martínez Albarracín \(In Spanish\)](#). In this interview (or rather article) the doctor focuses on the sources on the manipulation of viruses in the laboratory and on the interference of influenza vaccines.
3. [Dr. María José Martínez Albarracín speaks with the friend Last name Required \(Video in Spanish\)](#). He says such dangerous things that he has been censored to protect citizens. It talks about the fundamental issue of virus isolation and, therefore, whether there is one or not. The PCR tests with which people are being judged to lock them up depend on that: them and anyone who was close. There is also talk of the advance by the authorities of the vaccination plans for influenza and meningitis to August, and of the relationship between vaccines and deaths. Among other things, Dr. Martinez Albarracín also speaks of the peregrine criticisms of those things that they call "verifiers", which are companies contracted by the Regime, and that rather are dedicated to insulting and discrediting people who are not directly subjected to censorship.
4. [PCR and cycles \(In Spanish. 5 minutes\)](#). Dr. Martínez Albarracín again briefly explains the absurdos of this test and also speaks of the "cycles" that are being used.
5. [Dra. Martínez Albarracín \(In Spanish\)](#). In a talk of more than half an hour, he talks about the PCR tests and also at the end of the antigen and antibody tests. He is making points and drawing out contradictions, even if the official statements are admitted. He talks about the syndrome (the disease, which he says is not new). He insists that PCR tests are not used to diagnose diseases (but as a complement). Talk about how the genomic bits this test is looking for are about 200 letters out of a total of 30,000. That of those 200 letters, they speak of the RDRP Gene as specific (which she denies). They talk about Gene E, which is also in many viruses, as everyone recognizes. He talks about the amplification cycles: in the most famous tests (that of Dr. Drosten from Berlin and that of the Instituto Pasteur) 40 or 45 cycles are used, etc.
6. [Dossier Dra. Martínez Albarracín: "STUDY OF ANALYTICAL TESTS FOR THE DETECTION OF SARS-COV-2" \(In Spanish\)](#). A good attack on PCR tests (and the rest of the antigen and antibody analysis): it is in Spanish and brings detailed and written information quite plainly. It is the best we have seen. One of the things that he looks at is the null mathematical correlation between positive PCR tests and excess deaths: that is, these tests (which nobody knows the meaning of) cannot have anything to do with any fatal illness (not even with something flu-like). [In this link, you](#) can see Dr. Martínez Albarracín explaining this study to the friend José Miguel of "Last Name Obligatory".
7. [Maria José Martínez Albarracín: The flu vaccine and covid 19 \(In Spanish\)](#). Analysis of the studies on the efficacy of the flu vaccine and also its relationship with "covid 19". As always, María José Martínez Albarracín is well aware of the studies and knows how to select and explain them. It is fortunate for the people who speak Spanish that this voice assists us. The detailed Fluzone prospectus can be found listed in Against the Lockdown. One of the studies mentioned by Dr. is this: [EBMPHET Consortium: "COVID-19 severity in Europe and the USA: Could the seasonal influenza vaccination play a role?" \(In English\)](#). Another of the studies that he uses, but that he does not expressly mention, [is translated into Against the Confinement: The flu vaccine and Covid19.](#)

8. [Dra. Martínez Albarracín. Declaration "Against confinement, against the closure of the economy and against the dictatorship" \(In Spanish\)](#). 5 minute video. In the end, he makes an endorsement for "non-violence", which is to fall into the trap set by those above. They are the violent ones: in every imaginable way and way; with all the force and cruelty that Money is capable of. What Dr. inadvertently says in this ending, that it would be our fault that they took the army out onto the streets (as if they hadn't already taken it out), is what Power constantly repeats: that the culprits are the down; that the things that they are forced to do, is because those below do not obey; because they are not respectful; they are not responsible. This projecting the guilt of what the Power itself does on the one who receives the damage (blaming the punished person) looks very good in the mandate that people have been giving from the beginning that they have to wash themselves many times hands. In other words, that they have to clean up their guilt; that it is the people who are to blame. As if they weren't the ones who really have blood stained hands. This is one of the main ways that the Power has to try not to talk about what they do: they always put the magnifying glass on people, so that, if anything, we spend our efforts trying to defend ourselves against their accusations without being pointed at them. to them. An example of the same can be seen in a video that we put yesterday, [This is the video](#), and the comment is the first there is, on behalf of "Antonia Molina".

Reflections by the Dean of the Euskadi College of Biologists, Jon Ander Etxebarria Garate, on the measures adopted in the COVID-19 crisis. Nothing new, in short, that has not been said already, but it is noteworthy that it is one of the few critical voices that lash out at the measures adopted by the Spanish (and Basque) Government with data on the table and against the lies they spread. mass media daily. 36.- STEFAN LANKA

- [Stefan Lanka: "The virus interpretation error I" \(Translated into Spanish\)](#). (The original in English, "The virus misconception", [can be read here](#). It is the same article that has also appeared published with the title: "The Misconception called Virus", that is, something like "The error of interpretation called virus" or "The misconception of what is called a virus" and that can be read here). Stefan Lanka is one of the most clearly speaking voices from within Science. Denial from within, that is, betrayal of what one was believing, is the way in which reason always presents itself. Hiding from others and oneself what comes to warn us of the lie in which we believe or believed, is what is called Money or Future or Person. One is personally interested in being loyal to the Faith, of course. The problem that one has personally (individually), is that there is something down there that does not support lies and comes to speak against my ideas, against my interests, against my forecast. He comes to say no, that it is a lie, whoever falls. The problem with Money is that there is something under there that does not want to account, because he doesn't think there is anything to keep track of; something that does not believe this is beans counted; something that does not believe that it is necessary to survive, because it is already living now; who feels that there is always more and more and more. The problem that the Future has is that there is something down there that does not buy into the change they want to give it: "Now don't breathe, now don't talk, now don't sing, now don't kiss, now don't live: you'll live in it. Future"; He doesn't buy it because he feels that in the Future there is no God who lives. - [Stefan Lanka: "The error of the interpretation of viruses II: Beginning and end of the coronavirus crisis" \(Translated into Spanish\)](#). Virologist Stefan Lanka criticizes this attack against people from the very foundations of the matter: He says that no virus has been isolated and explains what the PCR tests that have been invented mean then. Says Dr. Lanka that "From many short genetic sequences, virologists can only imaginatively build long genetic chains with the help of computer programs." The translation of the link is sent by Ricardo. [Here you can find another Spanish translation](#), and the article in German [can be read here](#).

The presentation of this video reads: "The [German] virologist Stefan Lanka who is recognized for the discovery of the Ectocarpus silicosus virus, denies that the measles virus has ever been isolated in laboratory tests. Lanka offered a prize of € 100,000 to who demonstrated the existence of the

measles virus with laboratory tests. Barnes, a young doctor presented 6 external studies and a German Court of First Instance ruled in his favor. The international media outcry ridiculing Lanka was notorious. However, none of the 6 Studies showed the "virus isolated" in the laboratory, so Lanka appealed to the German Supreme Court and won the case. No major media published the new verdict. "

Article of the year 2015 where Stefan Lanka tries what he says in the title, and also talks about the challenge he launched to other virologists to prove that there is a measles virus. In this challenge, as is known, the Supreme Court had to recognize that, indeed, it has not been proven that there is any virus that causes measles, despite the fact that they have been manufacturing, selling, promoting and putting vaccines all over the place for decades. the world, based on the hypothesis that there is such a virus. 37.- KARY MULLIS

- [Nobel Prize winner K. Mullis: "Why did I start to doubt AIDS?"](#) (In english with subtitles in spanish). Kary Mullis recounts how she started looking for information about AIDS and realized that there was no scientific article to back up the statement "AIDS is probably caused by the HIV virus." It is noteworthy how this interview ends: Saying that the last thing these great names in Science want is to be asked directly about the fundamentals of the thing. He says they go to a lot of trouble to avoid that situation. It is an accurate analysis of what Power does and what Power fears. Fear a simple thing like this that any child does: ask "What is that?" In this 13-minute video, other scientists and journalists also talk about how the doubt entered them and how they began to investigate. They are interviews made for the documentary "[This is the entire documentary with Spanish subtitles](#)."
- [Interview in 1993 with Kary Mullis \(Simultaneous translation\)](#). Kary Mullis was the inventor of the now famous PCR Test and a Nobel laureate in Chemistry. This interview is very significant: it talks about AIDS and the virus that supposedly was its cause. The same things can be seen reproduced as now (it was the first attempt, quite essitous, to terrorize people worldwide with a "virus"). Dr. Mullis says it very clearly: Where is the evidence that this virus causes this disease? It is nowhere to be found. As much as you ask and try to analyze the scientific literature, nothing can be found about it. Money has been moving around this virus for 10 years and there is no way to find any scientific evidence that this virus causes disease. Further,

40.- M. ZELMAT

- [Zelmat, M. "Facing COVID-19 by the confinement: EBM," MBM "or" SBM "?" \(In English\)](#). Article by a clinical biologist. It brings very relevant data and is full of common sense. For example, about Imperial College and its death prediction models (astronomically wrong, as John Ioannidis said) it says this:

"Some say that there is a study done by Imperial College London that has shown that confinement saves lives. We answer them as follows: First, the Imperial College London" study "did not study anything. It's just modeling, "theoretical basis", "simulation", "predictions", "estimates", basically astrology with a scientific apparatus. And medicine is certainly not that. Medicine is based on evidence and real evidence. And it is not It is not for nothing that epidemiologists reject their astrological predictions:

- Imperial College London overestimated the impact of HIV / AIDS six times
- It estimated that mad cow disease would kill 50,000 Britons (but 177 died).
- They predicted that bird flu would kill 200 million people worldwide (while 282 died).
- The Imperial College of London also overestimated the danger of swine flu (mortality rate: 0.4% vs 0.026% and 65,000 deaths in the UK vs 457). The H1N1 pandemic ended up being milder than originally anticipated (prompting some to report the considerable money, time and resources consumed by the response) and the press found that Roy Anderson, the rector of Imperial College London at the time (he now chairs a WHO scientific advisory board, is a member of the Bill and Melinda Gates Grand Challenges

advisory board, chairs the advisory board of the Gates Foundation-funded Schistosomiasis Control Initiative, and continues to work on the College), which of course advised WHO and governments, received a salary of 116.

For this case, based on the same flawed model, developed for influenza pandemic planning, they gave their astrological predictions about the COVID-19 epidemic: 500,000 will die in the UK, 70,000 in Sweden and between 300,000 and 500,000 in France! Who can believe these wild figures? They also told us that the death rate from SARS-CoV-2 is 3.4% when it is actually 30 times lower. "

Then he says that it seems incredible to him that they could be raising something so dangerous.
- [Dr. Luis Marcelo Martínez, geneticist \(In Spanish\). Part 2](#). It talks about the media, the pharmaceutical multinationals and the scientific and medical associations subsidized by them. He says that he would not come if they called him to the mass media: Very sensible. Any vaccine says it takes years to make. That in July they already had a vaccine ready means that they had it prepared before. He goes on to talk about the possible consequences of such a vaccine: cancer, infertility, and autoimmune problems.

"Basically what these two doctors do is analyze the results of the tests carried out by them directly, as well as compare the models of countries with and without confinement and their results, coming to the conclusion, in light of these results (based exclusively on facts and not on opinions) that confinement is absurd as a strategy to treat this virus. Furthermore, they clearly explain what the effect of confinement on health is people and their immune system." (RM Summary). [In this link there is a summary video with subtitles in Spanish](#). SWEDEN: Counterexample where they have not locked up people, they take it as a flu and have fewer deaths per million inhabitants than in Spain

1. [Stockholm, November 19](#). This video is intolerable to murderers talking about the virus. Nothing they say can fight this. You don't need anything more than this video.
2. [Epidemiologist Johan Giesecke interviewed on May 1 \(In English\)](#). "Statistics are problematic because of how deaths are counted at each site" (...) "Now everyone is getting closer to the Swedish model." (...) "I don't think anything is learned from this: neither from a medical point of view nor from another point of view. This will be totally forgotten."
3. [THE BLOGMIRE: "Is confinement essential? Comparing the Swedish experience with the Imperial College model suggests otherwise](#). The Imperial College model is the one that served as a justification for the confinement in the UK and the USA, and was in line with the WHO catastrophic predictions: This model predicted that if people were not locked up, half a million people would die in the UK. In this analysis of this blog (done by an Englishman) those Forecasts to Sweden (where effectively they have not locked up people, and therefore serves to see what the model was true). Even if you do not understand English, just go and see the very clear graphic that they have made on the page (it is the personal website of an uncle, and how wise! If you compare it with all the confusing information in the media): It is the Graphic titled: "An estimate of what the Imperial College model would have predicted for Sweden under ...". There are three bells there. They represent the number of deaths (per 100,000 inhabitants) over time, in three different scenarios. Blue: It is the prediction of the Imperial College model of what would happen in Sweden if they did absolutely nothing of confinement. Cream color: It is the prediction of the model about what would happen in Sweden if they did a moderate confinement. Red color: is the number of real dead in Sweden. With seeing the figure,
4. [Comparison between a country with and without a confinement \(In English\)](#). The comparison is made on April 11 between Sweden and the United Kingdom: There are hardly any differences between the figures of the two countries. In other words, the confinement is useless. There is also talk of the pressure that Sweden receives to lock up people like other countries. (Obviously, this is a scandal and an immediate denunciation of the uselessness of the confinements).

And Faith needs a constant defense. They lock up people for that Faith (those who lock them up and treat them do it for Faith) and the deaths of those people who make up the Faith, turn back into more numbers that are used to reinforce the Faith. So, neither elites world, no milk. It is the Lord (who now has his new epiphany in Money) who does this. And those of "the elites" neither live better nor plan anything personally, the poor. So neither elitists, nor freemasons, nor spiritualists, nor Zionists, nor Quakers, nor diabolics, nor communists, nor Catholocoids: is it that any of any sect, hidden or not hidden, can or wants to lift a finger against the Faith? in the Money?: No. They are your brothers, your children, your parents, yourself, yourself personally in your work, I personally quiet to prosper and to give a Future to my children. No to the Money Regime, whoever falls! (One personally is the first to fall. Fortunately, there is something else around here besides me: 'person' which means 'mask', that is, 'muzzle').

Everything else he says before is not valid. That the boys do not make bottle? And because? Without going to the heart of the matter, nothing is done: Is there a killer virus or not? Has there ever been one or not? Even if there is: who can, in the name of Health, prevent whoever wants to go out, touch, speak, sing, laugh? Money, Science and Authorities are against people, and they are doing all this against life. Money is against life. You have to go against Security. We don't want to be sure. We must end the doctrine of Protection and Security. If not, there's nothing left to do.

This is the translation of the summary with which it begins: "This phenomenological study evaluates the impacts on the reduction of the COVID-19 outbreak in 2020 of the total closure strategies applied in Italy, France, Spain and the United Kingdom. Comparing the trajectory of the epidemic before and after the closure, we did not find any evidence of any discontinuities in the rate of increase, doubling time and numerical trends of reproduction. By extrapolating the pre-closure trends of the rate of increase, we give estimates of the death toll when there is no lockdown policies, and we show that such strategies may not have saved any lives in Western Europe.

[April 15: London Times Article: "Record Weekly Deaths As Fearful Patients Avoid Hospitals."](#) It begins like this: *"England and Wales have had a record number of deaths in a week, with more than 6,000 above the average for this time of year. Only half of this excess is attributed to the coronavirus. Experts have said that they are particularly surprised by the increase in deaths not due to Covid-19 and expressed concern that the lockdown could have unexpected consequences on people's health."* Below it is read that the professor of new infectious diseases, Martin Hibberd said that: *"We know that for some situations, we may be overestimating the role of Covid-19, for example when it is mentioned in a death where it has been able to play a minor role. In other situations, in a death the coronavirus may not be mentioned although it may have contributed, possibly due to indirect consequences of the confinement and the busy health services "*.

But in nursing homes there are more than twice the normal number of deaths, and in people's homes, more than 70%.
12. [The effect of the closure on epidemics is zero.](#) This graph for England compares (very sensibly) deaths from respiratory diseases (flu and pneumonia) this year with those of other years. It is seen that since the closure is decreed there is no impact

on the line of deaths from flu that are not covid and respiratory diseases with respect to the trajectory of previous years. If the lockdown were to be effective in stopping the spread of these infections, there would have to be a drop in the line for deaths from non-covid flu and infectious diseases this year. But there isn't. Which indicates that the confinement does not stop these epidemics. At the same time, it is seen that from the confinement, the total number of deaths increases, which shows once again the "collateral" consequences

The April 2020 peak is actually lower than January 2000 (with totals adjusted to reflect population growth of 14%). In the long term, there will be a huge price to pay for closure in terms of damage to the economy and effects on health and mortality. Everyone expects this. However, it may be that the impact of the lockdown is already having a measurable negative impact on mortality. At the end of the outbreak, compared to the five-year average, there were more than **15,000** deaths in excess (compared to the five-year average)**not** attributed to Covid (dark blue in graph). Are some of these excesses of deaths not attributed to Covid the result of a reduction in the provision of normal hospital services due to the confinement? **Thousands have already paid for the confinement with their lives?** "(Translated from" inproportion2 ").
Always bear in mind that many of the deaths attributed to Covid have nothing to do with it, but are simply dead with the positive test. On the other hand, the confinement in the The United Kingdom is much softer than in Spain, which is the most brutal in the world and where the "collateral" deaths are in proportion much more.
17. [Dr. Jorge Almeida, Director of the Internal Medicine Service at Hospital de São João \(1 minute in Portuguese\)](#). 20. [Homburg, S. and Kuhbandner, C.: "The 2 illusory effects of non-pharmaceutical interventions for Covid-19 in Europe" \(In English\)](#). These authors comment on the article presented in Nature by Flaxman and others (2020, Nature, <https://doi.org/10.1038/s41586-020-2405-7>), in which they calculate the millions of lives that the confinements have saved in Europe. The contradictory ridiculousness of the calculations in that article is revealed by the authors of the comment in the opening paragraph. It should be noted how a nonsense like this is published with great fanfare in one of the most prestigious magazines in the scientific world, and serves to try to justify the thousands of deaths and the endless suffering that the Regime is doing on the people. This is Science.

The monotonous decrease is due to the fact that the number of individuals susceptible to infection but not yet infected decreases as the virus spreads. Of course, the $R(t)$ function can be influenced by non-pharmaceutical interventions (NPI), as well as voluntary changes in behavior. However, in the case of a finite population, the number of effective reproduction automatically and necessarily decreases over time, since the number of infections would otherwise diverge.

The model of Flaxman et al. contradicts this elementary view. They estimate $R(t)$ from the daily deaths associated with SARS-CoV-2 using as a prior restriction that $R(t)$ can only change on the dates that the interventions become effective. This approach does not demonstrate that non-pharmaceutical interventions have been effective, but rather implies the result, that is, it implies a circular logic. The true effective reproduction number is continually decreasing, and when its estimates are allowed to change only at intervention points, it is clear that deep discontinuities will emerge which they attribute to strong effects of interventions. Flaxman et al. (P. 2) conclude that while most NPIs had unidentifiable effects, the running of

the bulls instantly reduced the number of reproductions by 82%. Taking the UK as an example, Fig. 1 illustrates the ineffectiveness of social distancing, etc. in Flaxman's analysis, as well as the enormous effect of the closure as of March 23. "

HYDROXYCHLOROQUINE

1. [Scientific article of May 8. Study on 932 patients in New York treated with Hydroxychloroquine](#). The study compares covid-patients treated with Hydroxychloroquine and with azithromycin, some with treatment without zinc and others adding zinc to treatment. The results say that those treated in addition with zinc, have a much greater chance of improving before or not dying (about 44% more chances). The conclusion of the abstract is just as vague: "This study provides the first *in vivo* evidence that zinc sulfate in combination with hydroxychloroquine may play a role in the therapeutic management for COVID-19."
2. [Bo Yu et al. Scientific article of May 15. Study on Hydroxochloroquine in critically ill patients in Wuhan](#). The study is a retrospective analysis of 550 critically ill patients treated in Wuhan. 48 of them were treated, in addition to the "basic treatment", with low doses of Hydroxychloroquine. The result says that 47.4% of severe patients not treated with Hydroxychloroquine died, while of those treated with this substance, 18.8% died. He concluded, of course, that hydroxychloroquine should be used in treatment.
3. Comparison of the information to the user that the US government had been giving on Hydroxychloroquine [since 2016](#), with the one it began to give on [April 15, 2020](#). It seems that this is a medicine that has been used for more than 50 years in millions of patients. It is a very well known and very cheap medicine. Aside from the introductory warning about covid-19, there are two major changes:
 1. **The diseases for which it is prescribed:** It was included in the group of drugs called antimalarials. Now that information disappears. It was also said: *"This medicine may also be prescribed for other uses; ask your doctor or pharmacist for more information."* This has been removed. If you think about it, it is very rare that such a phrase can be removed.
 2. **Side Effects:** It was said that *"Although the side effects of hydroxychloroquine are not common, they could occur ."* But now they have changed it to: *"Hydroxychloroquine can cause side effects. Talk to your doctor about eating grapefruit (grapefruit) and drinking grapefruit juice while taking this medicine."* . In other words, the side effects of something administered for more than 50 years were not common. They are supposed to be common now all of a sudden. And, above all, side effects are added that were not previously: 1) "Mental" changes. 2) Decreased consciousness or loss of consciousness. 3) Thoughts about hurting yourself or killing yourself!

The results were 2 deaths. 4 in respirators that have survived and the rest fully recovered. He asks him why he thinks there is this resistance to such an effective treatment. Give these reasons 1) Political: Because as it is an election year in the US and Trump has spoken well of this treatment, the more the drug is discredited, the more Trump is discredited. 2) The big pharmaceutical interests: Some pharmaceutical companies try to implant their medicines, such as Remdesivir or vaccines. And when this treatment goes global, these pharmaceutical companies will lose 95% of their market share. 3) The arrogance of academics and researchers, who cannot tolerate that an ordinary doctor, not even a researcher, is the one who comes out with such an effective treatment. 4) Because of the doctors' fear of the consequences and the possibility of being sued. The evidence for the use of hydroxychloroquine alone, or hydroxychloroquine + azithromycin in hospitalized patients, is irrelevant regarding its efficacy in the early stages of the disease with high-risk outpatients. Five studies, including two controlled clinical trials, have shown significant efficacy of outpatient treatment. Hydroxychloroquine + azithromycin has been used as a standard of care in more than 300,000 older adults with multimorbidities, with an estimated proportion of diagnosed cardiac arrhythmias attributable to drugs of 47 per 100,000 users, of which the estimated mortality is less than 20% : 9 out of 100,000 users, compared to the 10,000 Americans currently dying each week. These studies are designed to test hydroxychloroquine with a very high dose (such as 4 times more than normal for any pathology), but above all, a dose that the WHO itself in 1979 studies recognized as a lethal dose. 17. [Martin, J. et al. "Chloroquine is a potent inhibitor of SARS coronavirus infection and spread".](#) Scientific article of the year 2005. As you can see, it is published by the US government. This is what the Abstract at the top of the article says:

Background: Severe acute respiratory syndrome (SARS) is caused by a recently discovered coronavirus (SARS-CoV). There is currently no effective prophylactic or post-exposure treatment available.

Results: However, we report that chloroquine has strong antiviral effects on SARS-CoV infection in primate cells. These inhibitory effects are seen when cells receive the drug before or after exposure to the virus, suggesting both prophylactic and therapeutic advantage. In addition to the well-known functions of chloroquine, such as elevations in endosomal pH, the drug appears to interfere with terminal glycosylation of the cell receptor, the angiotensin-converting enzyme 2. This can negatively influence receptor-virus binding and nullify infection. , with new ramifications due to the elevation of the vesicular pH, which leads to the inhibition of the infection and the spread of SARS-CoV in clinically tolerable concentrations.

Conclusion: Chloroquine is effective in preventing the spread of SARS-CoV in cell cultures. Favorable inhibition of virus spread was observed when cells were treated with chloroquine before or after SARS-CoV infection. In addition, the indirect immunofluorescence assay described herein represents a simple and rapid method to test for SARS-CoV antiviral compounds.

1. [Doctor and Senator Scott Jensen speaks \(In English\)](#). This senator from Minnesota (USA) and doctor speaks again. It tells how Money works among US doctors normally and how it is doing especially with this virus. It seems that when the doctors speak, the Regime bothers a lot, a lot. Science is crushing people. Science, knowledge, is at the service of Money. In other words, it is there to command the people, as theology was in the previous form of the Regime. That is why those who speak of their tricks (especially from within) are the ones who do the most damage and attack them the most.

Dr. Escudero says things as clear as this: "Peace of mind and ... to ignore the media, which have turned something insignificant, a vulgar flu, a very slight flu, into a biological weapon through terror". In the end, Dr. Escudero says goodbye very sympathetically. Cheers man!

He says things like "We are creating a catastrophic situation in health, because the idea of stopping Covid-19 at all costs is the cause of not seeking medical help for serious and often urgent cases. (...) In addition, isolation is there preventing the development of group immunity. "
16. Dr. ANDREW KAUFMAN
 1. [Dr. Andrew Kaufman speaks with Maya Washington \(In English with Spanish subtitles\)](#). Very common sense, the doctor and the girl: they both see clearly in the examples that put how the sick and the doctors are put into the wheel of Money.
 2. [How to Talk to the More Believers: Dr. Andrew Kaufman \(In English with Spanish subt.\)](#). Always quite wise this doctor. Of course there are no recipes to speak well (it is not known how to speak well. It is not known. It is something that is tried without knowing how). But nothing prevents us from talking about how it is spoken. Also there that common sense will do, if it visits us, what it always does: deny lies. It seems that in reality reason appears to us doing things such as making clear the contradictions of what is being said or assumed. Or also, like making us see that sometimes lies come from or are supported by other lies; that is, the lies are in solidarity with each other. Ultimately, however, no lie has a cause or explanation (neither logical, nor "natural", nor biological, nor historical, nor psychological, nor evolutionary, nor social, nor personal), because if it were so; if it had reason to be,
 3. [Dr. Andrew Kaufman speaks with Del Bigtree \(Dubbed into Spanish\)](#). It is a piece of the interview in which Dr. Kaufman talks about the non-isolation of the virus and how what the tests look for are fragments of RNA that it is not known what they are, but that it is known that they are in components such as microbes, human cells and more. Explication of what they call bacteriophages and exosomes. He talks about the nonsense of the PCR test being used, and more things like "environment theory" and "pleoformism". The article mentioned by Dr. Kaufman [can be read here in translation](#).
17. Dr. LEONARDO GONZÁLEZ BAYONA

1. [Testimony of May 1 of the doctor González Bayona from Rio de Janeiro \(Video in Spanish\)](#). He does not speak as a doctor, but as a witness. It is very good and it is appreciated that you do not shut up, friend.
2. [Letter from Dr. Leonardo González Bayona](#). Letter published in the Argentine newspaper "La prensa", which the author reads here in a radio program (at the beginning of this reading it has the link that we put). Earlier on the program, cardiologist Cecilia López also reads the letter that she also published in that newspaper. From what we have heard, they then make interventions as clearly against as their letters. It is important what Dr. González Bayona says about the idiocy of many doctors, who are fundamentally dedicated to complying with the "protocols", that is, to obeying what comes from above, against common sense and clinical practice habitual.
3. [Dr. Bayona on November 8 \(In Spanish\)](#). Dr. Bayona speaks very accurately from a demonstration on November 8. It is sad to see people muzzled and "estranged", pretending to protest. It is absurdo. You have to go out to the streets and not leave them!

18. ANDREW MATHER

1. ["The spontaneous lie": Mathematician Andrew Mather analyzes the epidemic figures in graphs \(In English\)](#). It is a presentation with 180 graphics. It shows that the data that existed before the confinements clearly showed that the virus does not spread spontaneously, but normally. It has many details and stops to see a popular science article that was made to defend the spontaneous thesis and in what way the author himself presents the thing biased to deceive. There are people who do not shut up and it is a joy. On his YouTube channel he has many more presentations.
 2. [Andrew Mather: "Does this make sense?" \(In English\)](#). Presentation read about "contact tracing" applications. It is full of common sense and brings to light all the absurdes that this attempt at control implies.

21. MICHAEL LEVITT (Nobel Prize)
1. [Prof. Michael Levitt, Nobel Prize in Chemistry in 2013: "The confinement is a big mistake" \(In English\)](#). This prof. From the US, he recounted in the interview that, as he happened to be in China when the virus started there, even though he was not an epidemiologist, he was interested in analyzing the numbers that were coming out (therefore, he analyzed them very early). By analyzing those numbers, he made some predictions of how the epidemic was behaving. When later, already in the US, he heard the official catastrophic predictions of millions of deaths, he came out to publicly contradict them with his analysis (as the real data now contradict them). Most interesting of all, is this: that when he publicly denied those official predictions, his family and colleagues got angry with him! They did not want to admit that contradiction and considered it in some forbidden way to say (that is, that the information of the seriousness and obligatory nature of the greatness of this had arrived beforehand). He also says that since he appeared in an interview on Fox network explaining his analysis, CNN no longer wanted to interview him. That also says that the confinement is a big mistake, is the least.
 2. [Prof. Michael Levitt, Nobel Prize in Chemistry in 2013: "The running of the bulls is a big mistake" \(In English with Spanish subt.\)](#). 10 minute translated excerpt of this interview with Professor Levitt.
 3. [Nobel laureate Michael Levitt: In which mathematical function do the data fit? \(Video in english\)](#). In a very simple explanation and using the data from the epidemics (which have already ended) it shows in which functions the contagions of the epidemic fit. It uses some computer program that does that of trying to fit the data (a type of program that is sometimes called Artificial Intelligence). It says it fits into a function known as the Gompertz function. This function never grows spontaneously, but it does decrease spontaneously.
22. [This is Dr. Ángel Ruiz Valdepeñas, from the Emergency Service of the Hospital de Formentera \(In Spanish\)](#). 5 minute video. The pandemic is over, and the muzzle is of no good use.
23. [Dr. Sandra Félix speaks \(In Spanish\)](#). Ten minute explanation on the matter. (1) The flu vaccine appears to be the cause of the severe cases: they have inoculated the virus with this vaccine in massive quantities. (2) The transmission between people (of the same virus: it has not mutated) is a slight thing: normally the body defends itself against it without problems. (3) Chlorine dioxide treatment is demonized, which seems like a good remedy.
24. [Coronavirus crisis in France: epidemic ended versus organized panic. Why? \(Translated into Spanish\)](#). By Nicole Delépine, French MD, pediatrician and oncologist, published in FranceSoir on July 31. Although he refers to France, what he says can be perfectly extrapolated to the situation in our country, where a stricter confinement was practiced than the French one. The attitude of the French press is significant, which, unlike the Spanish, gives rise to dissenting voices from the official discourse such as that of Dr. Delépine, as can be seen in her critical and well-documented article and in the reflections she makes at the end of he about how once the epidemic in France (and in Europe) is over, instead of being happy about it, fear continues to spread from governments and the media, promoting the harmful use of masks and the prohibition of social events in order to ensure the submission of the people. 25. [Dr. Daniel Rodenstein "Pandemic is confused with deadly threat." \(Translated to Spanish\)](#). Professor Daniel Rodenstein, retired pulmonologist, published on July 29, 2020 in the Belgian weekly magazine Le Vif an interesting opinion article entitled "Pandemic is confused with mortal threat", denouncing the situation in Belgium, which does not differ much from the

Spanish, so his analysis is perfectly valid for our country. It also highlights the mass psychosis and hysteria, which make no sense when hospitalizations and deaths decrease day by day, although the measures taken by governments against the disease "generate and will generate disastrous consequences." The original article [can be read here](#). (RRG review and translation)

26. Dr. LUIS DE BENITO

1. [Something not entirely anticipated on TV](#): One of the Regime's propaganda programs connects with a hospital to verify the collapse it is entering and to advertise a book in favor of a vaccine: The interviewed doctor, Luis de Benito, contradicts the presenter constantly: 1) That there is no collapse. 2) That doctors are not on alarm, but on vacation, like the government. 3) That the "cases" are not sick, but healthy people. That what they give by the media as an increase in cases, is simply due to the increase in evidence: that what it is about is the normal circulation of viruses. 5) That no vaccine is necessary, because as you can see, most people have already passed the infection. Worthy of analysis is the small altercation with a journalist who first paternally threatens the doctor. In the urgency of the discussion, the doctor tells the journalist: "Have you signed death certificates?" and the journalist (that is, the media) unwittingly says what the media really want: "Unfortunately, I'm not that lucky." It lasts 40 minutes and more than half is answering people's questions. Also, reply to comments. 1. [Gerard Delépine: "Balance of the international health policies against Covid-19. Toxic confinement, effective chloroquine" \(Translated into Spanish\)](#). "Dr. Gerard Delépine writes this article in FranceSoir, one of the few critical French media. He takes stock of health policies against covid-19. His conclusions are in view of the data that presents that the indiscriminate confinement of the entire This population has been counterproductive, in the face of the selective confinement of the sick, and the early treatment with chloroquine, which the generally poorer countries have carried out with some success, effective ". (Review and translation of RRG). [Here is the original article in French](#).
2. [Dr. Gerard Delépine and Dr. Nicole Delépine: "The mandatory use of the mask in children is child abuse!" \(Translated to Spanish\)](#). "Article of August 21 published in FranceSoir against the use of children's masks now that the beginning of the school year is approaching in many countries and the issue is highly topical. They are not ambiguous: the measures that governments want to impose on minors (masks, social distance, confinement, distance learning ...) constitute mistreatment of children and are clear abuses of minors. They provide numerous studies that show that children are not contagious and that the contagion in them is practically null." (Review and translation of RRG). They also review the studies that supposedly support the use of masks, against all the scientific literature to date. They end the highly documented article with things like this: "Everybody knows today that the epidemic is over, that the virus, if it is circulating, has mutated and hardly threatens serious colds, that if this famous wave returned against all expectations, there will be an effective economic treatment even if its existence is not to the liking of multinationals. Let's not sacrifice our children for this ended pandemic and for the financial appetites that manipulate our media. [Here is the original article in French](#).
3. [Gérard Delépine "NatureGate and the Fable of General Confinement" \(Translated into Spanish\)](#). Dr. Gérard Delépine, who with his wife - also Dr. Nicole Delépine - have been fighting for 40 years to improve the situation of cancer patients and inform the population about the current state of science based on proven facts, denounces in this article the prostitution of the once prestigious international scientific journals The Lancet, NJEM (New England Journal of Medicine) or Nature, now discredited, to the pharmaceutical industry. In particular, they look at the articles that have tried to justify the confinements in the countries and show how these confinements have not only not stopped any contagion, but have caused more deaths. They are set in countries like Holland, Sweden, Spain, Italy and France. (Review and translation of RRG). [Here is the original article in French](#).
4. [Gerard Delépine: "Covid-19: The epidemic is over in Europe and there will be no second wave. STOP blind PCR tests." \(Translated to Spanish\)](#). 5. [Dr. Delépine: "I'm a doctor, I'm 74 years old and I'm not getting a flu shot this year!" \(Translated to Spanish\)](#). "Before deciding to get vaccinated or not, you should read it. Delépine is 74 years old, is a doctor and will not be vaccinated this year. His reasons are in his documented article, where he concludes that flu vaccination, far from being a remedy, seems to increase the mortality from the coronavirus. If supposedly health authorities recommend it to us, what do they

want? " (RRG translation and review). [Here is the original article in French in the French newspaper FranceSoir](#) . A pdf version of the translation for mailing [can be downloaded here](#).

6. Gérard Delépine: "The closure of schools: factor that aggravates the negative consequences of confinement" (Translated into Spanish). It deals with how the closure of schools and universities during the first confinement and during the current one, has considerably aggravated the negative consequences, already quite serious in themselves, of the confinement. This closure was decided out of fear, without any scientific evidence, and as the author reasons, fear "does not prevent danger, but on the contrary, by paralyzing reflection, it can lead to or aggravate the catastrophe that is feared." We are faced with a crisis in which "keeping silent is collaborating with the greatest abuse that has ever been perpetrated on the Portuguese population." Support Dr. Bodo Schiffmann, who is being attacked and pressured not to speak about the dead children. He supports it, of course, by not saying anything like eg "We are all Bodo Schiffmann" and so on. She supports him by reasoning against the lies they spill on TV that the mask is even good for health, and speaking especially about children. You have to deny the official Science and the Science of TV (which are the same). Doctors in general, in the service of Money, have become a plague. They are the enemies of the people. Teachers too. One should only go to those jobs to operate head-on to what Power (Money) is doing or if not, not go; no parent should take children to these institutions.
37. Dra. Margarita Griesz-Brisson, neurologist (In German with Spanish subt.). Public statement in a video. Speak common sense. This is what you would expect to hear from any doctor.
38. Dr. CRISTIAN DURÉ
 1. [Dr. Natalia Prego interviews Dr. Cristian Duré in Stockholm](#). Very interesting, because he is an Argentine doctor who works in an emergency hospital in Stockholm. Only this serves to see that all this has nothing to do with any disease. [This is the website of Dr. Cristian Duré](#).
 2. [Interview with Dr. Cristian Duré](#). This doctor continues to speak, giving double testimony of the lie told by those above: they live normally in Sweden (this is where he lives) and the measures they take against the people are based on nothing more than the effort to crush people. It places special emphasis on the torture of children.

39. [Dr. Juan Diego Areta Higuera](#). A doctor who asks himself some questions, what less! ... but not others. For example, when you say that there is a pandemic, you are not asking if there is a pandemic or what is a pandemic. And when he says that there are two sides, and that he does not want to be part of either, he is not right either. There are no two sides with different opinions. Money is imposing its lies on people, who are not any side. As he takes care of himself a lot about talking about himself or how they will judge him from above, we have to tell him not to worry so much about that. If you take care of that, you won't be able to speak well. Is there a killer virus? Is it a new virus? Is there any evidence of their isolation? Has anyone "sequenced" this virus without inventing it from the sequences of the genetic databases? What validity, if so, do you have the PCR test being done? Does it make any sense to make diagnoses or talk about "cases" with that test that tests positive, as you can see, in 10% of any population? What sense, then, does these murderous measures imposed manu militari have? Talking about all this has nothing to do with sides, or with his friends withdrawing his word.

Covid-19 should not be on the A list, as we now know that it is a common flu virus. We have also started a legal claim against the State of Holland together with a very large group of doctors and nurses. We are in contact with 87 thousand nurses who do not accept the vaccine that is being prepared nor do they want to be anyone's guinea pigs ... I wonder: If there is no pandemic, why are our children wearing masks at school? ... They are trying make its use mandatory, and we are fighting against that measure together with our lawyers. I invite you to do the same in your countries. Find lawyers. I assure you that there are absolute constitutional rights that cannot be violated for any medical reason.... There is no reason to panic. Panic is created by false-positive PCR tests ... so doctors should stop using those tests. It's very important. And you have to be calm. In the Netherlands, the press is already publishing that PCR tests do not work. I am very happy about it. There is hope." (Translation from trikooba.com).

1. JOSÉ ANTONIO CAMPOY

1. [Interview with José Antonio Campoy \(Video in Spanish\)](#). Enrique de Vicente interviews José Antonio Campoy, who is the director of Discovery Salud magazine, on July 2. The long interview is worth listening to. REDACTED. [Here another link](#).
2. [Scabelum interviews José Antonio Campoy](#), director of the magazine Discovery Salud. It talks about many things: the non-isolation of the virus, the PCR test, the censorship and more. Very sensible and clear. The interviewer insists on the stereotypical question "What needs to change (in Health, in Journalism ...) so that this does not happen again?". Obviously, no answer comes out, because the question itself asks for a solution within the Regime. And he does not get any answer because he feels that this is what the Regime itself consists of. The root of this is Money itself. Without analyzing what Money consists of ("analysis", which is properly "dissolution") there is nothing to do. This is the form the Lord has taken. You have to try to attack him. It is the fight of what is here alive against the Faith.

2. JON RAPPOPORT

1. ["COVID: It is not a single thing, it is not a single disease." \(Translated to Spanish\)](#). Article of April 1, 2020 by Jon Rappoport. In the cases and deaths that are labeled as 'covid' cases and deaths, very different things are confused: pneumonia, flu, heart problems, kidney problems, old age, damage caused by medication, deaths caused by respirators, PCR positives of perfectly healthy people, etc. [Here is the original in English](#).

Article by Jon Rappoport, where he brings to light one of Dr. Drosten's technical articles that shows how they have done the infamous PCR tests: without having the virus they have created a "validated diagnostic workflow for 2019- nCoV." [Here is the original in English](#).
8. ["If the virus is not there, why do you think it is?" \(Translated to Spanish\)](#). Jon Rappoport article. [Here is the original in English](#).
9. ["But I have spoken with my virologist friend and he says that ..." \(Translated into Spanish\)](#). Jon Rappoport article. [Here is the original in English](#). A new blow of common sense from this researcher who has been denouncing the lies of the

Science sector (economic sector at the service of Money) for many years. It draws, as is not surprising, the words of the scientist who most thoroughly dismantles this whole shebang: the virologist Stefan Lanka (See the translation from the German that Contra el Encierro has published of one of his articles: [Stefan Lanka: "The error of the interpretation of viruses II: Beginning and end of the coronavirus crisis"](#)).

[Here is the original in English](#).
3. [James Corbett speaks \(In English with Spanish subt.\)](#). In an 8 minute video, he talks about the faith that he is trying to establish that being together is criminal action. He wants to make it clear that that faith is being established. That is the principle of the attack on any Faith: bring it as clearly as possible here in front (not letting it catch us without realizing it from behind, which is what any lie is properly trying to do).
4. JESÚS GARCÍA BLANCA
 1. [Explication of Jesús García Blanca on the non-isolation of the virus \(In Spanish\)](#). Article that simply tells what is meant by isolating a virus and the problems that this has. This is the heart of the matter, because everything else comes from there: the possible tests, proving that this new virus causes a disease, etc.
 2. [Enrique Costa Vercher, physician, and Jesús García Blanca interviewed. \(Video in Spanish\)](#). Very clear denials. In addition, it speaks very simply about how professionals are transmitted and trained from above, teaching them the same jargon and doctrines (as in general happens with "management" and with multinational "consultants" of all kinds, which make the reports governments). However, insisting on the difference of money, whether public or private, is not wise. There's no difference. It is the same as the WHO is financed by laboratories and by states. This distinction, false, is promoted by the Regime itself. (NB: García Blanca, speaking of the year 2004-2005, confuses at one point the total deaths with the deaths from influenza in Spain, as he himself warns in a comment).
 3. [Jesús García Blanca: "The scam is confirmed: the PCR does not detect SARS-CoV-2" \(In Spanish\)](#). Article of the month of November in the magazine Dsalud.

TOTAL DEATHS

1. [Total deaths in Spain in the last six years](#).
2. [Overall graph: "Overall mortality in Europe is better than it was in 2016/17"](#). See below in this link the graph with the title "Overall European Mortality is better than it was in the 2016/17".
3. [Counting dead. By Virginia \(In Spanish\)](#). Analysis of the matter, paying special attention to the total deaths in Spain and the inexplicable appearance on May 27 of some 12,000 new deaths assigned half and half to March and April.
4. [Graph of "excess deaths"](#). In many countries, predictions of expected deaths are made (in which flu epidemics are not usually expected, for example). They call "excess deaths" the number of deaths that are counted in a country above that expected number. These graphs are concerned with painting the excess deaths of the countries in question. The first graphs you see on this page represent the deaths officially assigned to the virus (in red) in each country, the expected deaths (dotted line), and the rest of deaths not assigned to the virus in gray. It can be seen that, for example in Spain, there are 15,000 excess deaths that are not caused by the virus, which can only be caused by the confinement. The harder the confinement, the more it has killed (It can be seen in Sweden, that there has been no confinement, that there are no excess deaths other than those assigned to the virus). In Spain they continue at it: persecuting people, forcing them to wear terrible masks against their health and terrorizing the media with the lie that there really is a killer virus.

Keep in mind that these graphs (where the dead that undoubtedly have made the confinements are seen with the naked eye) are made with the dead that are officially assigned to the virus. But we know that as a rule any deceased who tests positive in the tests is assigned to the virus, although clinically it is known that this death has nothing to do with the virus, so the deaths that have made (and continue to do) the confinements there are many more than those that appear in these graphs.
5. [Dr. Paulo Costa: "Mortality, confinement and Stockholm syndrome" \(Translated into Spanish by EAR\)](#) . Very good and clear article in which Dr. Costa focuses especially on deaths from any cause. The confinements and the treatment or lack of treatment of the sick are highlighted as the main cause of deaths not assigned to the virus. Deaths in Portugal and Sweden are within the margins of seasonal flu. The monstrous cases of Spain and Italy are also mentioned. [This is the article in Portuguese](#).
6. [England: Weekly death totals reveal large number of 'collateral' deaths \(Graph in English\)](#). "The graph shows the proportion of weekly deaths due to Covid-19 out of the total deaths in the same time period during 1999/2000 - another bad flu / respiratory disease season. The April 2020 peak is actually lower than January 2000 (with totals adjusted to reflect population growth of 14%). In the long term, there will be a huge price to pay for closure in terms of damage to the economy and effects on health and mortality. Everyone expects this. However, it may be that the impact of the lockdown is already having a measurable negative impact on mortality. At the end of the outbreak, compared to the five-year average, there were

more than **15,000** deaths in excess (compared to the five-year average)**not** attributed to Covid (dark blue in graph). Are some of these excesses of deaths not attributed to Covid the result of a reduction in the provision of normal hospital services due to the confinement? **Thousands have already paid for the confinement with their lives?** "(Translated from" inproportion2 ").

Always bear in mind that many of the deaths attributed to Covid have nothing to do with it, but are simply dead with the positive test. On the other hand, the confinement in the The United Kingdom is much softer than in Spain, which is the most brutal in the world and where the "collateral" deaths are in proportion much more.

7. Iain Davis: "Deaths from the confinement, not deaths from Covid" (In English). Article that begins by saying this:

"COVID-19 has been in circulation for at least a year and yet there was no appreciable increase in non-seasonal mortality anywhere until confinement regimes were imposed between the end of February and the end of March 2020. Allow me to repeat it: Across the sites, the overall mortality data ("from any cause") consistently tell us the same thing: There was no appreciable deviation from the statistical norm in any country until the lockdown measures were imposed. MASKS

1. Dr. Denis G. Rancourt "Masks Don't Work. A review of science relevant to COVID-19 social policy". Scientific article comparing the best bibliography on masks for respiratory infections such as influenza and corona. The bottom line regarding masks not working is this: *"No RCT (Randomized Controlled Trial) study with verified results shows any benefit in wearing masks or respirators for healthcare personnel or for members of nursing homes. There are no exceptions. Similarly, there are no studies showing any benefit from a general policy for wearing the mask in public. Also, if there is any benefit to wearing a mask (due to blocking power against aerosol droplets and particles) then there should be more benefit to wearing a respirator (N95) compared to a surgical mask. However, various meta-analyzes and all RCTs also prove that this relative benefit does not occur. Masks and respirators do not work. "* **Below is in Spanish**
2. Dr. Denis G. Rancourt "Masks do not work: Review of relevant scientific knowledge in relation to social policy on COVID-19" (Translated into Spanish). Scientific article comparing the best bibliography on masks for respiratory infections such as influenza and corona. The abstract at the top of this article says this:

"There have been very large randomized controlled trial (RCT) studies and meta-analysis reviews of RCT studies that all show that masks and respirators do not work to prevent flu-like respiratory illnesses or respiratory illnesses that are believed that are transmitted by droplets or aerosol particles.

What's more: the relevant physical and chemical knowledge, which I review here, is consistent with masks and respirators not working. It would be paradoxical if masks and respirators worked, in view of

what we know about viral respiratory diseases: the main route of transmission is aerosol particles with a long residence time, whose size is less than 2.5 µm. These aerosol particles are too fine to be blocked, and the minimum infectious dose is smaller than an aerosol particle.

This article on masks illustrates the extent to which governments, mainstream media, and institutional propagandists may decide to operate in a scientific vacuum or to select only partial scientific studies that serve their interests. This recklessness is the same that is taking place in the case of the current global confinement of more than a billion people, an experiment unprecedented in medical and political history. "

This study has been censored on the scientific platform "ResearchGate". [Here you can read the censorship process](#) they have used on the platform, justifying the elimination of this scientific article with two contradictory emails. In one they said they did not consider it scientific. In another, rectifying, that it could cause harm to people (That is, that people find out what scientific studies say about masks, it can cause harm!).

A wicked new mantra is on the lips of every public health official and politician in the global campaign to force universal use of masks on the general public: "There is a growing body of evidence." This propaganda phrase is a vector designed to achieve five main objectives: (1) To give the false impression that a body of evidence now proves that masks reduce the transmission of COVID-19. (2) Falsely assimilate comments made in scientific places with "evidence." (3) Hide the fact that decade-long policy evidence proves the opposite: that masks are ineffective against viral respiratory diseases. (4) Hide the fact that there is now direct observational evidence that cloth masks do not prevent the exhalation of clouds of suspended aerosol particles; not up, not down and not through masks. (5) Disregard the considerable damage and known risks due to face masks applied to entire populations.

17. Xiao J. et al: "Nonpharmaceutical Measures for Pandemic Influenza in Nonhealthcare Settings — Personal Protective and Environmental Measures". May 2020 study of the American CDC itself on masks and other measures to prevent the spread of the flu. **It shows that the masks do not work: They have no effect on the minor or major transmission of the influenza virus** . The article summary begins like this:

"There were 3 influenza pandemics in the 20th century and there has been 1 so far in the 21st century. Local, national and international health authorities regularly update their plans to mitigate the next influenza pandemic in light of the latest available evidence on influenza. effectiveness of various control measures to reduce transmission Here, we review fundamental evidence on the effectiveness of non-pharmaceutical personal protection measures and environmental hygiene measures in non-sanitary settings, and discuss their possible inclusion in plans for pandemic Although mechanical studies support a possible effect on hand hygiene or face masks,the evidence from 14 randomized controlled trials of these measures did not support a substantial effect on transmission of laboratory-confirmed influenza. "

It brings a section dedicated to masks, which reads this:

"In our systematic review, we identified 10 RCTs that reported estimates of the efficacy of masks in reducing laboratory-confirmed influenza virus infections, based on literature published between 1946 and July 27, 2018. In the pooled analysis, no significant reduction in flu transmission was found with the use of face masks. "[...]

"Disposable medical masks (also known as surgical masks) are designed for use by medical personnel to protect accidental contamination from patient wounds, and to protect the wearer from splashes or sprays of bodily fluids. There is limited evidence for its effectiveness in preventing the transmission of the influenza virus, either when worn by the infected person to control the source or when worn by uninfected people to reduce exposure. The systematic review found no significant effect of masks Facials in Laboratory-Confirmed Flu Transmission. "

20. ["Analysis of the guidelines published by the WHO regarding the generalized use of masks" \(In Spanish\)](#). This detailed analysis is sent by Ricardo. It is only necessary to see that the enemy of the people (WHO) does not lie so much as to say that there is evidence of the usefulness of these muzzles among the people. They are quite daring to go against the entire bibliography up to the date on which it is said otherwise, and to censor their own spokesmen what was well known until now: that someone who is not sick is not going to infect another.

The pediatrician (on the phone, it is not known why he does not see the patients, an essential thing in the trade he seems to be doing), says that the six-year-old should wear a mask; and that neither he nor any doctor can give him a certificate that frees him. He also says that more than a medical question, it is a question of education (that is, that the child is rude). He says many more nonsense to justify that we must obey (as he obeys against the health of the people, starting by obeying not seeing, feeling or hearing his patients, continuing with the defense and confirmation of the unhealthy prescription that they give from above for each child). "Required Last Name" comments the call very well. It serves as a good testimony for those who still trust doctors (or health workers, as they say); in which they will open their mouths against this massacre. No. Nothing is going to come from there. It will be the people who take to the streets against the cults, the teachers, the judges, the journalists, the scientists and other types of office workers, who are there to serve the Money that death administers to us. People will take to the streets without being summoned by anyone. So, it is not simply the "political class": it is every daddy and every mommy of every one of the little children who go to the University to get higher in the "social" pyramid, as they say. Reach higher by keeping quiet and lying, as you can see what Dad has to do. It will be what is below those interested; what's left of people, of town, down there. Common reason; common sense against the reasons of the wise. Common reason that simply says 'no' to their lies, to their knowledge, to their Future. And those who want to save themselves (save their person, their position, their country and other tricks), they have nothing to do but obey the Lord, who is the one who creates them, maintains them and the one who "guarantees their Rights" , as they say).

2. [Prof. Michael Levitt, Nobel Prize in Chemistry in 2013: "The confinement is a big mistake" \(In English\)](#). This prof. From the US, he recounted in the interview that, as he happened to be in China when the virus started there, even though he was not an epidemiologist, he was interested in analyzing the numbers that were coming out (therefore, he analyzed them very early). By analyzing those numbers, he made some predictions of how the epidemic was behaving. When later, already in the US, he heard the official catastrophic predictions of millions of deaths, he came out to publicly contradict them with his analysis (as the real data now contradict them). Most interesting of all, is this: that when he publicly denied those official predictions, his family and colleagues got angry with him! They did not want to admit that contradiction and considered it in some forbidden way to say (that is, that the information of the seriousness and obligatory nature of the greatness of this had arrived beforehand). He also says that since he appeared in an interview on Fox network explaining his analysis, CNN no longer wanted to interview him. That also says that the confinement is a big mistake, is the least.

5. [News from a Spanish newspaper about Belarus, a country where the government has done nothing against the people](#). It is curious to see the news. All of it is determined to insinuate that the official data from Belarus are false (it is not known why, rather than because it should not be like that), and above all, they speak of Belarus (where people have not been prohibited from going out, nor see each other, or talk, or touch, or kiss) describing it as if it were the other way around, as a place where people are locked up and cannot find out anything, and where no one wants to go out on the street (yes, there is no one who believe it) by distrust in the government! This is told by the journalist from Spain, where nothing is known at all but the things that are shown on TV and the totally controlled media, and you cannot even look at the portal without being chased by the police or even the army. The impudence is total.
6. [Images of the streets of Belarus perhaps on April 9.](#)
7. [Audio of an interview with Dr. Joel Kettner on Canadian radio. \(In English\)](#). Very good example of how the media brings its purpose of what the interviewee (in this case an epidemiologist) should say. The journalist cuts to the expert who begins to speak directly against this whole matter: The Dr. begins by saying that he has lived through 30 epidemics like this and nothing has ever happened in the media. The journalist cuts it once to try to redirect the interview within what is commanded, asking what he had planned: if "social distance" is very effective or not, and when - as he should do - the Dr. attacks again to the root thing, the journalist cuts him off and dismisses him abruptly.

And that the hospital is empty.
10. [Carmen Paris page on facebook](#). This company is allowed to censor people's videos and also claim that it is "false information, verified by independent information verifiers." Information verifiers? What is that? Independent of what? Of money? From the state? And what is the interest of those independent verifiers in going around verifying what people say with the censorship result? Is it independent of who asks you to do that? Who asks an "independent verifier" to verify, is it independent? Do you verify the information of large companies? Do you verify the information of the State? Do you verify what the media says? Do you commission independent verifiers to verify what the TV says?

11. [Dr. Jensen is attacked for speaking \(Video in English\)](#). The US medical authorities open an investigation against Dr. Jensen for telling what they themselves order doctors to do. Looking at the censorship and the attack on those who speak is the best way to be disappointed that this has nothing to do with public health. It is a war against the lives of the people.
12. [Radical censorship of doctors in the US](#): July 29: The major platforms (YouTube, Twitter, Facebook) have censored the group of doctors in the US that has appeared this week under the name of [americasfrontlinedoctors](#) against all this. Tightrope, one of the few uncontrolled emissions, is under the same threat. Here you can see the video (almost in code) where they warn about it.
13. [Something not entirely anticipated on TV](#): One of the Regime's propaganda programs connects with a hospital to verify the collapse it is entering and to advertise a book in favor of a vaccine: The interviewed doctor, Luis de Benito, contradicts the presenter constantly: 1) That there is no collapse. 2) That doctors are not on alarm, but on vacation, like the government. 3) That the "cases" are not sick, but healthy people. That what they give by the media as an increase in cases, is simply due to the increase in evidence: that what it is about is the normal circulation of viruses. 5) That no vaccine is necessary, because as you can see, most people have already passed the infection. Worthy of analysis is the small altercation with a journalist who first paternally threatens the doctor. In the urgency of the discussion, the doctor tells the journalist: "Have you signed death certificates?" and the journalist (that is, the media) unwittingly says what the media really want "Unfortunately, I'm not that lucky." 3. [Positive tests on cats in New York](#). Wolfgang Wodarg breaks the news on his blog that after testing the test on cats in New York, there have been positive results. Therefore, he says that "the test has no valid basis for either treatment or action in relation to epidemics." And also that: "If the test also reacts positively in animals, then it is not specific for what it is looking for: SARS-CoV-2. Therefore, it seems, it also gives false positives for other viruses of respiratory diseases that Mr. Drosten hadn't even had it in mind. Other than that, the PCR test is by no means a sufficient basis for a medical diagnosis. "

DEATHS FROM MEDICAL TREATMENT

1. [New York Doctor Testimonial: Says He's Seeing Never Seen \(English Video\)](#)
It's Interesting Testimonial: Says Many Patients Are Being Treated With Ventilators Or Ventilators, And Many End Up Dying Asphyxiated: Those respirators are designed for patients who do not have the strength to breathe (he says) and he believes that many patients do, and then these devices are harmful to the lungs. He says he doesn't know what it is, but it seems to him another kind of illness, like when someone climbs a mountain, they run out of air, or something like that.
This testimony can be interpreted as follows: (1) "Never seen before". Of course, this obsession and panic created from the TVs and the states, due to its greatness, is something totally new, never seen before. This doctor is attending one of the fruits of this mega-event. (2) The information, which comes from above, moves the pieces: (a) Patients who would never go to the hospital in normal situations, go. Or, patients who would never be treated as severely respiratory ill are treated that way. (b) Booster respirators that were never ordered arrive at the hospital. (c) The last move is clear: put those two pieces together. (In addition, of course, there are the usual seasonal patients who do suffer from respiratory diseases, and who also suffer all this mega-emergency, but in their own way; that is,
In the video below, Dr. Scott Jensen, denouncing the swelling of deaths that the US government makes with the virus, also says that the government has ordered that "if a patient with the virus enters a hospital, the The hospital receives \$ 13,000, but if that patient goes to respirators, the hospital receives \$ 39,000. "
2. [Dr. Scott Jensen \(Video in English\).](#) Interviewed about the swelling in the statistics of deaths from the virus carried out by the US government. It also speaks of the "extra" money the hospital receives if a patient is put on respirators.
3. [Doctor in Pharmacy STEFANO MONTANARI, expert in nanopathology and medical research. Interviewed \(In Italian with Spanish subt.\).](#) He speaks very clearly: 1) The virus was before 2020. It is not very dangerous, like the flu. 2) Many deaths have been due to the own intervention of the doctors, when applying respirators or oxygen. 3) The vaccine doesn't make any sense. The previous interview they did with him had more than 2.5 million visits, and was censored by YouTube. Detailed [interview summary is here \(by EAR\)](#)
4. [Dr. Montanari: Summarize in 15 minutes the medical history of the thing \(In Italian with Spanish subt.\).](#)
5. [Testimony of nurse Nicole Sirotek from New York.](#) It tells very clearly the chaos of order: "They are murders, it is not the virus." [Here another link.](#)
6. [Erin Marie Olszewski, a nurse at a "COVID" hospital in New York, interviewed by John Kirby \(In English with automatic English subtitles\). Here with subtitles in Spanish . Here is another link .](#) This 37-year-old nurse has been in hospitals since she was 16. It tells from within how patients are murdered through orders from above. It's creepy, sure. The reason that always comes out is: Money. The way these murders are being done (nobody talks about): fear. The justification among doctors: they are orders that come "from above." Most of the doctors are resident doctors: young people without any experience, whose guide is to please those above. Erin calls them "order-keepers." At her hometown hospital where nurse Erin was staying before she was called to go to New York, patients were being treated as such: looking one by one. Covid patients were treated with Hydroxyloquine and Zinc and there were no deaths in his hospital (it was a large city). Why are they not

treated with this medicine here?: "I guess because it works, I don't know." Here no one patient is looked at individually. Everyone has to follow the "COVID" chain until they reach the respirators and die.

7. [From the Bigtree on Hydroxychloroquine \(June 17\) \(Video in English with Spanish subtitles\)](#). After the scandal of "The Lancet" (a super-study that served so that the WHO condemned the treatment with Hydroxychloroquine, and that it was discovered that they did it with invented data), now there are two studies against this effective and cheap drug: both are promoted by pharmaceutical companies that want to impose a worldwide vaccine against the virus on us. These studies are designed to test hydroxychloroquine with a very high dose (such as 4 times more than normal for any pathology), but above all, a dose that the WHO itself in 1979 studies recognized as a lethal dose. In other words, studies are not only made to fail, but to kill patients. What is serious, moreover, is that the US health administration vetoes the use of hydroxychloroquine based on these studies. [This is the original video without subtitles](#).
8. [Dr. Meryl Nass: "WHO" Solidarity "and UK" Recovery "Clinical Trials of Hydroxychloroquine using Potentially Fatal Doses"](#). Article by Dr. Mery Nass translated from [the "antraxvaccine" site](#). It is an addition of June 19 to his investigation and complaint of the clinical trials that the pharmaceutical companies and state health agencies were doing (the first two have paralyzed them) and continue to do in covid-19 patients, in which they were patients with life-threatening doses of hydroxychloroquine. In "contraelenciero" we have translated [Del Bigtree's program](#) dealing with Dr. Nass's report on the first two reported clinical trials: Recovery and Solidarity. 11. [Dr Claus Köhnlein. Interviewed about the deadly experiments of the WHO \(In German now with Spanish subtitles\)](#). Talk about the clinical trials they imposed from above with deadly doses of Hydroxychloroquine. Now Dr. Köhnlein looks at them and gives them as one of the causes of deaths assigned to the virus in some places (where those tests were done). In *against the closure* can find the information they were putting on these tests. It is in the [section dedicated to Hydroxychloroquine](#). We recall that in those trials, doses that have been known to be fatal for at least 40 years were directly prescribed.
12. [May testimony in New York \(In English with Spanish subt.\)](#). There is talk of "murders" in hospitals. The treatments are deadly.

THEY DO NOT CARE FOR THE SICK. PROTOCOLS

1. [You have to give birth according to orders \(In Spanish\)](#). Everybody knows many cases like this (and worse) of the brutality imposed by medical "protocols" ("protocols" is a euphemism for "orders"). You have to go against the protocols (against the orders), and the fundamental way is to ask yourself what they are sending us. What is an "updated PCR"? Which leads to the question: What is the "Covid" PCR? What is it that if a woman who is going to give birth does not have an "updated PCR" we cannot give her anesthesia? They are very simple things to ask. You don't have to have any training (rather you have to not have it). You do not have to have any title. You do not have to have any position. It's just letting yourself speak.
2. [Testimony of a nurse in Spain](#). It tells how the "health collapse" is created and made to believe.

AIDS, FIRST GREAT GLOBAL EVENT OF VIRUSES

1. [Interview in 1993 with Kary Mullis \(Simultaneous translation\)](#). Kary Mullis was the inventor of the now famous PCR Test and a Nobel laureate in Chemistry. This interview is very significant: it talks about AIDS and the virus that supposedly was its cause. The same things can be seen reproduced as now (it was the first attempt, quite essitous, to terrorize people worldwide with a "virus"). Dr. Mullis says it very clearly: Where is the evidence that this virus causes this disease? It is nowhere to be found. As much as you ask and try to analyze the scientific literature, nothing can be found about it. Money has been moving around this virus for 10 years and there is no way to find any scientific evidence that this virus causes disease. Further,

It lasts an hour and a half and is dedicated to looking in detail at the isolation and purification tests of this supposed virus, to know if there is one or not. It is very well done and the research guide (of the denial that there are tests

of the retro-virus that they have called HIV) is maintained with the interview that they do to the Biophysicist Eleni Papadopulos-Eleopulos, who heads [the group "The Perth Group"](#) , busy since the appearance of this HIV in the media and in the scientific literature in its criticism. All this is the crux of what is happening.

8. [Commentary by the "Perth Group" to the documentary The Emperor's New Virus? \(Translated to Spanish\)](#). Once the documentary is released, the Perth Group comments on it in this role, focusing on the responses that experts give in the documentary. It's a very good thing, because they don't let the answers go by just like that. For example, they do not let one of the experts (Nobel laureate) make fun of the question "What is to isolate a virus?" (As if asking for the foundation of something was ridiculous, assuming that those foundations are already well explained in the "testo books").

Kary Mullis recounts how she started looking for information about AIDS and realized that there was no scientific article to back up the statement "AIDS is probably caused by the HIV virus." It is noteworthy how this interview ends: Saying that the last thing these great names in Science want is to be asked directly about the fundamentals of the thing. He says they go to a lot of trouble to avoid that situation. It is an accurate analysis of what Power does and what Power fears. Fear a simple thing like this that any child does: ask "What is that?" They are interviews made for the documentary " [This is the entire documentary with Spanish subtitles](#) .

One of the things you read in the results of the study is this: "We have calculated the number of children paralyzed each year exceeding the predicted number (an NPAFP rate of 2 / 100,000 is assumed) and the results are shown in Table 2. A total of 640,000 children developed NPAFP [became paralyzed] between 2000 and 2017, which suggests there were an additional 491,000 paralyzed children over and above the numbers we expected for children with NPAFP. FLU VACCINE

1. ["Possible Cause of the Coronavirus Pandemic: Immune Interference Between POLYSORBATE 80 from the adjuvanted flu vaccine and SARS-CoV-2." \(In Spanish\)](#). Researchers report from the Hospital de Barbastro, in Spain. It is a report that has been released on the networks, in which it is claimed that the possible cause of the pandemic is a flu vaccine. Other testimonies of this have been appearing in the mouths of virologists and doctors almost from the beginning. It is worth reading this report, because it is clearly written in simple terms and explaining things very plainly, as a fact to circulate on the networks and that people will find out as much as possible. Some means of communication gives an account of him. [For example here](#): You can see how the information is given: marinated with a presentation that says that it is being used by the "conspiranoids" (what is that?) And the anti-vaccines, and accompanied by statements by one of the authors in which he says that the report is not definitive and that it does not say anything against vaccines and things like that (it seems mandatory in any public statement to make that clear: that vaccines are sacred). Despite that, the report does say things that those at the top cannot allow. It should be noted that the link that that newspaper gives to the report itself is censored for readers to see (I don't know what they put it for). In other words, readers are not allowed to read the report that they care so much about establishing what it says and what it does not say.
2. [The flu vaccine and Covid-19 \(Translated into Spanish\)](#). Study that appears in [Home Vaccine Education Work \(In English\)](#), and that analyzes the relationship between populations little or very vaccinated against flu and COVID deaths, and where the very strong statistical relationship between the two is demonstrated. In addition, it analyzes data on excess deaths from past years also based on the percentage of flu vaccination, and also shows the same correlation. In other words, it seems that the "Covid-19" mark on the deaths that are normally called flu is not necessary for this explanation of excess deaths. In addition, in the original site in English -in continuous update- they list and analyze the [studies that appear lately trying to deny this relationship](#).

9. [Juan Gervás: "The flu vaccine in times of covid19. Fifteen questions." \(In Spanish\)](#). Questions answered briefly, but very well documented with studies. It is something devastating against this vaccine that is not worth any good. And the health system of Spain, which refuses to attend to patients, who speaks to them in the last case by phone, overturned with the media in trying to make everyone put on this plague!
10. ["Influenza Vaccine-Associated Interstitial Pneumonia"](#). The respectful summary of this case documentation with the all-powerful (yet ineffective and dangerous) flu vaccine says this: *"Although the flu vaccine is relatively safe and effective, in rare cases serious complications can arise. We found two cases of interstitial pneumonia that developed after vaccination during the 2014-2015 flu season. In total, nine cases, including the two presented here, have been recorded in PubMed and the Cochrane library; eight patients were treated with corticosteroids and all nine survived, suggesting a good prognosis. Interstitial pneumonia is rare; however, we found an increase in its incidence after 2009. Therefore, clinicians should be aware of the possibility of this complication and properly educate all patients in advance. "*

11. [Christian Wehenkel: "Positive association between COVID-19 deaths and influenza vaccination rates in elderly people worldwide"](#). Epidemiological article titled: "Positive Association Between COVID-19 Deaths and Flu Vaccination Rates in Older People Worldwide." Yet another article that shows that the higher the percentage of vaccinated, the higher the number of deaths labeled "COVID-19". This is why they are so interested from above in getting everyone vaccinated against the flu. Medicine is against people's health. They want this to be an ongoing emergency at all costs. For this, as in all the wars that have always been promoted from above, it is necessary to annihilate and bring death to millions. And it is what they do.

New case in the tests of the vaccine of the company AstraZeneca for transverse myelitis. On the one hand, it makes one think that this information is coming out in the mass-media that govern this entire circus (perhaps fights between the vaccine sellers). On the other hand, since they start to give information, it is surprising that these companies calmly refuse to give any information about those vaccinated and sick, their medical evolution, etc. In other words, it seems that the television cameras do not go there to make reports of those sick with the vaccine. Or that the states do not send their armies with "trackers" to find out where those sick are and why they are like that (the "trackers" pursue only healthy people to crush them).

The presentation of this video reads: "The [German] virologist Stefan Lanka who is recognized for the discovery of the Ectocarpus silicosus virus, denies that the measles virus has ever been isolated in laboratory tests. Lanka offered a prize of € 100,000 to who demonstrated the existence of the measles virus with laboratory tests. Barnes, a young doctor presented 6 external studies and a German Court of First Instance ruled in his favor. The international media outcry ridiculing Lanka was notorious. However, none of the 6 Studies showed the "virus isolated" in the laboratory, so Lanka appealed to the German Supreme Court and won the case. No major media published the new verdict."

Article of the year 2015 where Stefan Lanka tries what he says in the title, and also talks about the challenge he launched to other virologists to prove that there is a measles virus. In this challenge, as is known, the Supreme Court had to recognize that, indeed, it has not been proven that there is any virus that causes measles, despite the fact that they have been manufacturing, selling, promoting and putting vaccines all over the place for decades. the world, based on the hypothesis that there is such a virus. 1. [Wastewater study in Barcelona \(In English\)](#). A study of wastewater (which is kept frozen) in Barcelona finds the virus in samples from March 2019, that is, one year before the arrival by plane that tells of the virus. How can everything they tell on TV be compatible with this? How could they have filled what they call the Mariña de Lugo yesterday with the Police and the Civil Guard, locking up a lot of town halls and making the mask mandatory even on the beaches where there may be 40 degrees of temperature? How can they be locking up healthy people in their homes manu militari and forcing them to expose the people they have been with so that they can lock them up? How does Power, with the excuse of this "new killer virus", can

impose a state of siege on a region that was beginning to rise up (with a general strike on July 1, which was followed mostly against the closure of the Alcoa company, without anyone knowing that what they fear is any possibility of an uprising from the people? (Of course, the collection of healthy people who test positive in the tes and the consequent house arrest of known people in a chain, this can be done from above in any place that suits them and without there being even a sick person, with which they can put in a state of siege any place where any protest starts). 3. [Apolone, G. et al. "Unexpected detection of SARS-CoV-2 antibodies in the prepandemic period in Italy"](#). This technical article published on November 11 is entitled "Unexpected detection of SARS-CoV-2 antibodies in the pre-pandemic period in Italy". It assumes, of course, that there has been a pandemic and that there is a new virus that causes it. He says things like this. In the summary: *"Specific antibodies to SARS-CoV-2 RBD were detected in 111 of the 959 (11.6%) individuals, since September 2019 (14%), with an accumulation of positive cases (> 30%) in the second week of February 2020 and the highest number (53.2%) in Lombardy. This study demonstrates an unexpected very early circulation of SARS-CoV-2 among asymptomatic individuals in Italy months before the first patient was identified and clarifies the onset and the spread of the 2019 coronavirus disease (COVID-19) pandemic. Finding SARS-CoV2 antibodies in asymptomatic people prior to the COVID-19 outbreak in Italy may reconfigure the history of the pandemic."* Towards the middle of the article: *an estimate almost 5 times above what the official figures reported. [...] At the international level, there is consistent evidence from two other studies. A first article reported the case of a patient hospitalized for hemoptysis without etiological diagnosis in an intensive care unit in Paris, France, in December 2019. Retrospective molecular analysis on the saved nasopharyngeal smear confirmed the diagnosis of SARS-CoV- infection. 2. A second study conducted by Harvard University showed a significant increase in hospital traffic in the Wuhan region, as assessed by satellite images, and searches related to COVID-19 symptoms in search engines, since the fall of 2019.* The last paragraph reads: *"Our results indicate that SARS-CoV-2 was circulating in Italy before the first official cases of COVID-19 were diagnosed in Lombardy, long before even the first official notifications by the Chinese authorities, which sheds new light on the onset and spread of the COVID-19 pandemic."* (Ricardo's translation).

ORIGIN OF THE VIRUS

1. [Plandemic: the virologist Judy Mikovits speaks in this documentary \(In English with Spanish subtitles\)](#). It assumes an origin manipulated in the laboratory and related to vaccines. Whether it was intentionally released or escaped, you don't know. He says that any vaccine for this virus will be destructive. They have failed in many decades to create a vaccine for an RNA virus. It is seen that it is close to the thing; who knows very well what things are done, what institutions, etc. Speaks clearly how Science is at the service of Money.
2. [Luc Montagnier, Nobel Prize-winning virologist interviewed \(In French with English subtitles\)](#). The virus comes from a laboratory and has genetic insertions of the HIV virus (the AIDS thing). He says he has no doubt. That is a fact. (Montagnier

was the first to isolate the HIV virus). He says that he was not the first to discover this. A top-notch Indian researchers did it earlier in a scientific paper on February 2, but they received a lot of pressure and withdrew the paper. Below is that retired article. This very interview has also been removed from YouTube by the television station that made it, presumably also due to pressure. [Here a good part of the interview is dubbed into Spanish.](#)

3. [Prashant Pradhan et al. "Uncanny similarity of unique inserts in the 2019-nCoV spike protein to HIV-1 gp120 and Gag".](#) Scientific article published on February 2, coming from researchers from the Kusuma School of Biological Sciences in New Delhi. The translated title is "Astonishing similarity of a unique insertions in the spike protein of 2019-nCoV with HIV-1 gp120 and Gag [are two examples of HIV-1 virus]". The abstract of the article reads at the end: "The finding of 4 unique insertions in 2019-nCoV, all identical or similar to amino acid residues in key structural proteins of HIV-1, is unlikely to occur by chance in nature." The article was withdrawn by the authors themselves after receiving a lot of pressure to do so, according to Luc Montagnier.
4. [Interview virologist Nikolai Petrovsky from Australia on Sky news on May 24 \(In English\).](#) This virologist has done a study on the origin of the virus. "It is as if it was designed to infect humans," he says. Although very prudently he does not want to assure anything, but the things he says are those that many said first: that it is manipulated in a laboratory.

VIRUS ISOLATION

1. [Explication of Jesús García Blanca on the non-isolation of the virus \(In Spanish\).](#) Article that simply tells what is meant by isolating a virus and the problems that this has. This is the heart of the matter, because everything else comes from there: the possible tests, proving that this new virus causes a disease, etc.
2. [Na Zhu et al. : "A Novel Coronavirus from Patients with Pneumonia in China, 2019".](#) Scientific article of January 24, 2020. It is the reference that the WHO gave as scientific proof that a new virus had been isolated. Curiously, in the article itself it is expressly read that this research does not comply with Koch's postulates. There are already virologists who when reading the article say that they do not prove that anything has been isolated, and that therefore it is not proven that there is a new virus.
3. ["Scientifically, the COVID19 PCR Test does not make any sense" \(In English\). Now here translated into Spanish.](#) Scientific journalistic investigation in detail. The four scientific articles that somehow claim to have identified the virus, it turns out that they have not isolated or purified it, according to the authors once they have been consulted.
4. [12 official requests for information \(In English\).](#) Here are the results of 12 official requests for information made in Anglo-Saxon countries, under a legal figure that wants to guarantee that any citizen can access the information. The request is to request the documents evidencing the isolation of the SARS-CoV-2 virus. All requests have been answered saying that they have no document in this regard. This is the specific wording of what is requested:

"All records in possession, custody or control that describe the isolation of a SARS-COV-2 virus, directly from a sample taken from a sick patient, where the patient sample was not first combined with any other source of material genetic (i.e. monkey kidney cells -vero cells-; liver cancer cells).

Please note that I am using "isolation" in the everyday sense of the word: the act of separating one thing from everything else. I'm not asking for records where "SARS-COV-2 isolation" refers to other things like:

- the cultivation of something, or
- performing an amplification test (i.e. a PCR test), or
- the sequencing of something.

Please also bear in mind that my request is not limited to records authored by that Institution or that pertain to the work carried out by it. My request includes any type of record, for example (but not limited to) any published record of any peer-reviewed study that they have downloaded or printed.

If any record matches the above description of the requested records and is currently available to the public elsewhere, please provide me with enough information about each record so that I can accurately identify and access each of them (i.e. title , author (s), date, magazine, where it can be publicly accessed). "

9. [Only the kidney cells of poisoned monkeys "raised" the "virus" \(Translated into Spanish\)](#). Article by Dr. Tom Cowan in which he analyzes an article by about 20 virologists published by the CDC. Again, it is discovered that they do not have the virus and that they have "sequenced" it with a computer, looking at only 37 bases out of 30,000. But it is also that, in their culture tests, they only get "that" (whatever it is) to grow in poisoned monkey tissues and NOT IN HUMAN TISSUES.

The [study can be read here](#), and it does not speak at all that the terrible effects - such as suicides or serious suicide attempts in more than 10,000 patients - have to do with an overdose of the drug (that is, doses beyond those indicated by the manufacturer). OFFICIAL DOCUMENTS AND POLITICAL STATEMENTS

1. [Official government document English \(Public Health\) \(In English\)](#). On March 21, this official document says that Covid-19 is no longer considered as an HCID (High Consequence Infectious Disease). He says that on that date much more is known about Covid-19 and that the Public Health bodies in the United Kingdom have reviewed that information, which is against the criteria required for an HCID: In particular, that there is much more information on their mortality rate (generally lower). The Dangerous Pathogens Advisory Committee (ACDP) is also of the opinion that Covid-19 should no longer be classified as HCID. (On March 23, the closure of the people is declared in the United Kingdom).
2. [Los Angeles authorities review a new study from the University of Southern California \(In English\)](#). It seems that the results coincide with the Stanford University studies, in the sense that the virus is very widespread among the general population, which means that its mortality rate is very low.

3. ["COVID-19 epidemic". From April 17. Protocol of the Superior Institute of Health of Rome \(In Italian\)](#). "The latest figures from Italy show (pages 12/13) that 60 of almost 17,000 doctors and nurses who have tested positive have died. This implies that the death rate from Covid19 is less than 0.1% for those under 50 years of age, 0.27% between 50 and 60 years, 1.4% between 60 and 70 years, and 12.6% between 70 and 80. Even these figures are probably very high, since those are deaths *with* and not necessarily *due* to the corona virus In general, the values are in line with those such as South Korea, and give mortality for the general population in the range of influenza. " (Translation of the review of "A Swiss doctor on Covid19").
4. [Italian MP Vittorio Sgarbi speaks in the Chamber of Deputies \(Video in Italian with Spanish subtitles\)](#). He talks very pissed off. In a letter dated May 12 and addressed to the WHO headquarters in Africa, the Ministry of External Affairs said that the four officials "are declared personae non gratae and as such must leave the territory of Burundi" before Friday. The directive spurs the highest WHO official in Burundi, Dr. Walter Kazadi Mulombo, the country's coronavirus coordinator, Dr. Jean Pierre Mulunda Nkata, the head of contagious diseases, Dr. Ruhana Mirindi Bisimwa, and the laboratory expert in testing for COVID-19, Professor Daniel Tarzy.
"They are expelled and the health minister has totally excluded the WHO, accusing it of unacceptable interference in its management of the coronavirus." The letter does not provide a reason for the decision. Diplomatic and administrative sources told AFP that the Foreign Ministry aborted a similar attempt to expel the same four officials a month ago. They protect the "natural" islands, therefore they fill them with surveillance, ecological plans and massive and massively guarded tourists, and thus no one can go to enjoy themselves in them. MANIFESTS AND PUBLIC PETITIONS

1. [Manifesto against the confinement of the population. Prof. Calaza and others. In Spain](#).
2. [Public petition for repeal of all civil liberties limitations](#). It comes out of Germany and is based on scientific data. It is translated into Spanish. As of April 11, it has more than 50,000 signatories, almost all of them from Germany.
3. [Appeal of May 7, promoted by the Archbishop and Nuncio in the Vatican, Carlo Maria Viganò](#). The appeal is signed by a number of cardinals, doctors, lawyers, and more. It is translated into several languages, including Spanish. It can be supported by anyone on that website. It says things like *"Based on official data on the incidence of the epidemic in the number of deaths, we have reason to believe that there are forces interested in generating panic among the population with the sole purpose of permanently imposing unacceptable forms of restriction of freedoms, control of people and surveillance of their movements. This form of undemocratic impositions prelude in a disturbing way a World Government that escapes all control."*

4. [Speech by Dr. Ángel Ruiz Valdepeñas at the June 11 demonstration \(In Spanish\)](#). Among other things, you can read in this link the speech of the good Dr. Ruiz Valdepeñas.
5. [Epidemiologists, geneticists, doctors and more, address the president of the Argentine government \(In Spanish\)](#). Letter signed by dozens of people in Argentina asking crucial questions and serving as a public manifesto.
6. [Dr. Christian Zücker, July 22](#): "Letter to the Swiss Parliament from the doctor and director of the Santé Suisse Association, Christian Zürcher. It is very interesting because it touches on several points, from the scientist who proves the covid lie, denouncing the falsified statistics and the false threat of a second wave, among other things, even the politician, demanding the parliament to repeal all the measures taken and specifically the extension of the state of emergency until 2022 as they have planned there. " (Summary and translation of RRG). The letter was published on Jean-Dominique Michel's blog. [Here is the original in French](#).
7. [International Alert Message \(Translated into Spanish\)](#). "Addressed to the governments and citizens of the world by the United Health Professionals collective (whose list of signatories is periodically updated), where the real danger of the virus, the role of the WHO, as well as the consequences are reviewed over 24 points of confinement and the use of masks, and all governments are asked to lift the prohibitions and obligations they impose on the people. " (RRG translation and review). [This is the document in English](#). --- [And here it is in French](#).
8. [Letter to WHO](#) sent at the initiative of Dr. Antonietta Gatti, attorney Robert Kennedy Jr, Dr. Wolfgang Wodarg, Dr. Chinda Brandolino and attorney Reiner Füllmich. It is a kind of question-manifesto that people can adhere to.
9. [Cardiologist Dra. M. Cecilia López: Open letter \(In Spanish\)](#) . "What's happening to us?"
10. [Urgent appeal from Dr. Ronald Weigl \(In German with Spanish subtitles\)](#). Dr. Weigl explains the deliberate and "perfidious" deception that we are suffering and speaks of the terrible damage of the measures that are being taken and especially of the harm to children. He asks parents, teachers and officials not to participate in the imposition or tolerance of these measures and to warn their superiors of their illegality. He talks about the chilling "Strategy Paper" from the German Interior Ministry "How can we take control of COVID-19?" of which we can [see a short video with the translation of some of its paragraphs](#) . The entire document in German is [here](#) .
11. [The group of health professionals that gave rise to the "International Alert Message"](#) , which already has almost 1,000 signatories around the world, has launched its own YouTube video chain. This is the first they launch: in a mere two minutes they express all the misery of this sinister pantomime that has been hanging over us for seven months.
12. [Open letter from Belgian doctors](#) to the [Belgian](#) authorities and media (translated into Spanish). **Now fully translated, not just the beginning**. It is a long letter and does a broad analysis of the thing, including the media and censorship.
13. [Declaration of "Great Barrington" \(translated into Spanish\)](#). Another statement from doctors. This is the one that they have given some informational support, especially in the US. It is not very forceful and conciliatory. It seems that 12,000 doctors have already signed it.
14. [Interview with the authors of the "Great Barrington Declaration" \(In English with Spanish subtitles\)](#). "Harvard's Dr. Martin Kulldorff, Oxford's Dr. Sunetra Gupta, and Stanford University's Dr. Jayanta Bhattacharya propose building and developing herd immunity, and a 'Targeted Protection' approach to ending the harmful and ineffective confinements of the healthy population. " (review and translation from [elinvestigador.org](#))
15. [Video-manifesto against compulsory vaccination: "We say no" \(In English with Spanish subt.\)](#). They present it like this: *join us in standing up and demanding that our individual rights and medical freedom be protected forever. The time to be brave is now. Share this video everywhere.* "
16. [Statement from doctor Arturo Vinuesa \(In Spanish\)](#). Statement from this general practitioner. He says things like this: *"How is it that this virus has been able to be decoded in weeks, when the normal is months or years ...? How is it possible that this virus is the first respiratory virus in history that is transmitted in asymptomatic patients ...? How can this organism affect so many different organs (from the respiratory mucosa to the vascular endothelium, passing through the epidermis, the conjunctiva and the myocardium ...)? Why did the WHO advise against doing autopsies if they are the scientific way of knowing the etiopathogenesis of diseases ...? Why has this institution changed its difficult version 34 times on the forms of transmission, masks, gloves, prevention, vaccines, etc ...? "*
17. [It is urgent to change the health strategy of Covid-19 \(Translated into Spanish\)](#). Article signed by 350 scientists, censored in the French press. It begins with this notice to the reader: *"This column was originally scheduled to appear in the "Journal du Dimanche "(JDD) newspaper on September 27, 2020. Accepted on Saturday morning by the journalist in charge of the "Tribuna / Opinions "column, it should appear in its entirety on the newspaper's website and to have an article written in the print version the following day. The journalist told us that he was satisfied with this because it would allow a contradictory debate with other very alarmist opinions expressed that day in the newspaper. At 4 pm However, the journalist warned us that its editor-in-chief had prohibited its publication. Is the certainty that what you say is the truth? Cowardice? Won't the government displease? We do not know the reasons for this censorship, which nobody believed that it would be helpful (or just courteous) to explain.* "
18. ["Confinement is a worse remedy than disease for French society" \(Translated into Spanish\)](#). "This article is signed by more than three hundred French personalities, and what is said there that the remedy of confinement is worse than the coronavirus disease is valid for French society, for ours and for any other, so it can be easily extrapolated. Why do they insist on making us

believe that the saturation of the hospitals that they say are collapsing now is something of this bug? " (Review and translation of RRG). [Here is the original article in French.](#)

They ask themselves later "How to explain such an excess?", But in that it seems that they are not right. The word 'society' cannot be used to analyze how Money (that is, Power) works, because it is a Money word: it is rigged at the root. An analysis that really does what the word says cannot be to say what something is like, what its parts are. For example, it cannot be to say what society is like in "postmodern capitalism", even if it is to promote a change in it. Saying "In postmodern capitalism, security is your God, and health your new religion" is worth little. (In general, accepting the words of cults can only serve to deceive yourself.) Anyone can answer that: "Well, it seems good to me that Security should come first." And another, "Well, not me", and little else. The attack can never be there. The attack is always to deny the lies that come from above: to tell them no; that don't tell the truth. There are no majorities, no minorities, no tastes, no opinions. There the analysis does what the word says: it dissolves the realities of Reality (of Money). Reality is made by information and consists of information. But these information, these statements, can be denied; you can ask what they say; the contradictions that his claim to know how things are can be exposed. A child asking "What is dying?" it's rebellion now. The attack is always to deny the lies that come from above: to tell them no; that don't tell the truth. " It is over 200 pages long, and from what we have seen, it brings out interesting and clear things about the multinational institutions that are spearheading this attack on the people.

10. [Torture to the population \(In English subt. In Spanish\).](#) This 5 minute video talks about "torture techniques" used against people. Other times these things are called "mass psychology" or "war propaganda." It's okay to look at them, because they are used as stated here and are planned on purpose. But we must not forget that the first thing of all is Faith: making people believe things, on that any other action of power depends (the motto of the notaries is correct, therefore: "Nihil prius fide" as analysis of Reality). That is why we must not forget that the fundamental attack against life that we are now suffering acutely comes from Science, which is what pretends to know how things are and is the creator of Faith. The new form of God is Money and his theology, of course, is Science. As it was said in the old Regime, that of the priests, when any child raised some contradiction or some question about the dogmas of Faith: he was told "The Church has Doctors, son." I mean, they, upstairs, know how things are and down here there is nothing more to talk about.
11. [Plandemic 2 \(In English\). Now here with Spanish subtitles.](#) Second part of this documentary, which is published with the subtitle "indoctrination". They put a lot of emphasis on the brutal censorship and smear machine against which they speak out and on planning these pandemics for years by Big Money. It's okay, despite the "documentary" format with its music and mysterious voice, and they are fooling themselves into believing that there are some people who are pulling the strings of all this, when they don't paint anything. It is Money that does this. Any of those bullies that appear there as if they command a lot, if they decided to "repent" and abandon their career, absolutely nothing would happen: Money continues to work and choosing other expensive figures. The decisive influence of geographical and seasonal factors on the behavior of the epidemic is analyzed. the hysteria unleashed around the pcr tests and the "positive cases" is analyzed, and the extremely negative effects on people's health of the confinement measures are reasonably denounced, as well as the futility of other coercive measures such as compulsory use of masks."* [Here it is also in .pdf format to send people by email.](#)

9. [Agustín García Calvo: "The role of the intellectual"](#). Transcript of the conference and talk of March 13, 2009 in Lleida. Things like these are said:

- Excuse me again: that the intellectual depends or has to be aware of the force of Capital in the first place to survive or to put himself at its service ... if he did not do so, the only alternative would not be the one that Plato drew? : Philosophers are Power, they hold Power, can't this come? ...

- [AGC](#): From the moment that scientists are privileged employees of Power, they are more than Ministers, scientists already hold it. Plato's ideal, Plato's damned ideal, is fulfilled. It is accomplished, it is especially the philosophers who hold Power, and naturally they are the philosophers of lies, because Philosophy was born precisely to kill the question. That the question, the doubt, can dominate ... is absurd. Doubt is a thing from below, because from Above there can only be doctrine, Faith, positive Philosophy, positive Science. Plato's ideal in The Republic is quite fulfilled, [...] The fondness that I have for him for how well he knew how to write dialogue in the attic and for the dialogues [] that he took, and which allow me to remember Socrates, I cannot say , thus, "all bad",

10. [Video in Spanish of 2014](#): Talk about some possible plans of "the elite". Okay, as long as "the elite" trade for Money. And they were not hidden plans, as they seem to imply (I suppose to keep the "elite" thing). It is what they have been doing in their global promotion of Security in all orders, and it is the emergency plans that the States with the big Money (media and multinationals), with their global institutions such as the UN, WHO, World Summits, etc. they are busy designing and advertising in style.
11. ["How a child is killed to become a man \(or a woman\)"](#). Transcript of the conference and colloquium of Agustín García Calvo on September 26, 1989 in Donostia. Things like this are said:

What does this consist of learning Morals or the Law that I present as the fundamental way to kill a boy or a girl ? : Well, it simply consists of letting them know, and printing them to the bottom, the conviction that it bad is good; at the same time that, for this, they are convinced, they are impressed that good is bad. Without this investment, nothing would work in this world and you could not proceed to kill a boy or a girl. This is the fundamental condition.

15. ["The health system is a true mafia that creates diseases and kills for money and power" \(In Spanish\)](#). 2003 interview with Dra. Ghislaine Lanctôt. Description of how the world health system worked and works. It is Money that does this. Everything that counts is very enlightening and very useful. For example, he realizes one of the deadliest falsehoods that continue to be led to believe from above: the false distinction between public and private healthcare. This entertainment is constantly promoted by power to create false debates and false rebellions. On the other hand, what this Dr. says is missing one fundamental thing. It remains to recognize this so important and so simple: that Money does not need to earn Money. The end of the Money is not that some multinational makes a lot of money selling vaccines, medicines or treatments. Money (which is the new form that God has taken) has another purpose. What does the Lord want? What does he expect from you? Without realizing the supreme reign of this entity of entities; Without analyzing what this astraction of the astractions consists of, any attack against it is futile, because it is beforehand confirming and supporting the Lord, considering him "natural" and innocent in himself. The attack and the authentic heresy (against the majority Faith, of course) is the one that says: "What are you, Money? Do you say that you are" necessary "? Do you say that you give your life? The economy is doing badly for us too? You say we depend on you? How can that be? Isn't it the other way around, puppet? Excellent list that I would like to join but without any metaphysics or transcendence. Personally I have no studies whatsoever, not even the school graduate but I prefer to be dead rather than see that "new world" with hardly any human contact. No hugs, no kisses or caresses. Neither sex and no fairs, concerts, big events. Many thanks to the politicians, the WHO and Bill Puertas for worrying so much but I'm not interested. I'd rather be caught by that "horrible virus" (rather

coronatimo) than not live In a "new normal" where to enter a pizzeria at the entrance they must give me a ridiculous test.Alberigo CARACCIOLA.Los Boliches MÁLAGA).

Very good compilation! I leave a contribution for the Sweden section ...

Johan Giesecke, top Swedish epidemiologist: "The coronavirus spreads like a fire and no matter what one does, everyone will be infected"

First of all, thank you for this blog that has been an oasis in the midst of so much pandemic as they have put us through eyes and ears. It seemed to me that nothing about the Spanish family doctor Natalia Prego Cancelo is included in the links. It may be one of the few voices that have been raised in Spain against confinement, masks, social distance and other pests from medicine. As she says in one of the videos on her YouTube channel, she has been fired from the clinic where she worked, the College of Physicians has opened a file for her and the Ministry of the Interior is also after her ... The YouTube channel where she publishes her videos is: <https://www.youtube.com/channel/UC3d09NieQNUfRcAaoV6YkuQ>

Yes, it does include things from Dr. Prego Cancelo. And it is true, it is an example for doctors, who are going with their silence against the health of the people. They are not ashamed. Thanks in any case.

A few days ago, on the front page of a well-known newspaper in Aragon, it came as "news" that a contagion had occurred in a town. Really, in a region like Aragon nothing more interesting than that happens ?? I understand that politicians and officials are delighted with the "pandemic", but why does the press also support this farce? Because the vast majority do not know how Belarus or Turkmenistan have "understood" (literally: they pass from the WHO and the coronavirus) this "pandemic" of few ambulances. Turning the pizza around: are the self-employed stupid? to live the artists and the showmen ?? On the Spanish coasts and islands, summer is lazy, what will happen when winter comes ?? What are we going to live on ??

People must open their eyes. The virus does not exist, they have murdered old people in nursing homes and hospitals with WATER POISONED WITH A RADIOACTIVE SUBSTANCE, the info of the covid plan delivered by KUBRICK in 1999 in the following link:

Centuries ago, evil minds isolated and locked up human babies. The experiment wanted to know what sounds they would make as adults. They did not even reach adolescents. Lacks of affection, affection and human warmth, they died while still children. I remember this story because I do not I believe that isolation, distancing, teleworking and that I know how many more nonsense than Covidians say "that it has come to stay". Human beings need human contact, hugs, caresses and constant affection as they need to breathe. Without it, mental health deteriorates to vertigo and that is something that we can already perceive in our environment. Not to be confused with the worldwide madness of the coronatimo, that is another type of "buzzard". Albe CARACCIOLA.
